Introduction: Long-Term Potentiation as a Model for Memory Mechanisms: The Story So Far 1
Christian Hölscher

Section One. Long-Term Potentiation *In Vitro* and *In Vivo:* How Can We Fine-Tune the Current Models for Memory Formation?

1 Persisting with Long-Term Potentiation as a Memory Mechanism: Clues from Variations in Long-Term Potentiation Maintenance 37
Wickliffe C. Abraham

2 Long-Term Potentiation in the Amygdala: Implications for Memory 58
Michael T. Rogan, Marc G. Weisskopf, Yan-You Huang, Eric R. Kandel, and Joseph E. LeDoux

3 Multiple Roles for Synaptic Plasticity in Pavlovian Fear Conditioning 77
Stephen Maren

4 Plasticity of the Hippocampal Cellular Representation of Space 100
Kathryn J. Jeffery

Section Two. There is More to the Picture Than Long-Term Potentiation: Theta or Gamma Oscillations in the Brain and the Facilitation of Synaptic Plasticity

5 Synaptic Potentiation by Natural Patterns of Activity in the Hippocampus: Implications for Memory Formation 125
Fenella Pike, Sturla Molden, Ole Paulsen, and Edvard I. Moser

6 Plasticity in Local Neuronal Circuits: *In Vivo* Evidence from Rat Hippocampus and Amygdala 137
Mouna Maroun, Dan Yaniv, and Gal Richter-Levin

Table of Contents
More information

7 Theta-Facilitated Induction of Long-Term Potentiation: A Better Model for Memory Formation? 146
Christian Hölscher

8 Role of Gamma Oscillations for Information Processing and Memory Formation in the Neocortex 167
Matthias H. J. Munk

Section Three. Making Models from Empirical Data of Synaptic Plasticity

9 Toward a Physiologic Explanation of Behavioral Data on Human Memory: The Role of Theta-Gamma Oscillations and NMDAR-Dependent LTP 195
John Lisman, Ole Jensen, and Michael Kahana

10 Neuronal Networks, Synaptic Plasticity, and Memory Systems in Primates 224
Edmund T. Rolls

11 Revisiting the LTP Orthodoxy: Plasticity versus Pathology 263
Jill C. McEachern and Christopher A. Shaw

12 Long-Term Potentiation and Associative Learning: Can the Mechanism Subserve the Process? 294
Louis D. Matzel and Tracey J. Shors

Section Four. Setting the Stage for Memory Formation: Stress, Arousal, and Attention

13 Strategies for Studying the Role of LTP in Spatial Learning: What Do We Know? Where Should We Go? 327
Donald P. Cain

14 What Studies in Old Rats Tell Us about the Role of LTP in Learning and Memory 346
Gregory M. Rose and David M. Diamond

15 Implications of the Neuropsychology of Anxiety for the Functional Role of LTP in the Hippocampus 362
Neil McNaughton

16 Differential Effects of Stress on Hippocampal and Amygdaloid LTP: Insight Into the Neurobiology of Traumatic Memories 379
David M. Diamond, Collin R. Park, Michael J. Puls, and Gregory M. Rose

Section Five. Transgenic Mice as Tools to Unravel the Mechanisms of Memory Formation

17 *In Vivo* Recording of Single Hippocampal Place Cells in Behaving Transgenic Mice 407
Yoon H. Cho and Howard B. Eichenbaum

18 Understanding Synaptic Plasticity and Learning through Genetically Modified Animals 427
Paul F. Chapman
