Preface xiii
Acknowledgements xv
List of abbreviations xvi

1 Efficiency in health care 1
1.1 Introduction 1
1.2 The demand for efficiency analysis in health care 2
1.3 Organisational efficiency 4
1.4 Analytic efficiency measurement techniques 10
1.5 Experience with efficiency analysis in health care 12
1.6 This book 13

2 The components of an efficiency model 17
2.1 Introduction 17
2.2 Unit of analysis 19
2.3 What are outputs in health care? 21
2.3.1 Health outcomes 22
2.3.2 Health care activities 27
2.4 Valuing health care outputs 28
2.5 Specifying inputs 29
2.5.1 Labour inputs 30
2.5.2 Capital inputs 31
2.5.3 Summary 33
2.6 Environmental constraints 33
2.7 Practical challenges 37
2.8 Conclusions 39

3 Stochastic frontier analysis of cross-sectional data 41
3.1 Introduction 41
3.2 Considerations in stochastic frontier analysis 42
3.2.1 Whether to estimate a production or a cost function 42
3.2.2 Whether to transform variables 43

Table of Contents
More information

3.2.3 Whether to estimate a total or an average function 44
3.2.4 Which explanatory variables to include 47
3.2.5 How to model the residual 50
3.2.6 How to extract the efficiency estimates 57
3.3 Application to acute hospitals in England 58
3.4 Conclusions 65

4 Stochastic frontier analysis of panel data 69
4.1 Introduction 69
4.2 Time-invariant efficiency 70
4.2.1 Empirical application 73
4.3 Time-varying efficiency 79
4.3.1 Empirical application 81
4.4 Unobserved heterogeneity 82
4.4.1 Empirical application 84
4.5 Summary and sensitivity analysis 86
4.6 Conclusions 89

5 Data envelopment analysis 91
5.1 Introduction 91
5.2 The DEA methodology 91
5.2.1 Input-oriented efficiency 92
5.2.2 Output-oriented efficiency 94
5.2.3 DEA formulation 96
5.3 Considerations in data envelopment analysis 100
5.3.1 Whether to assume constant or variable returns to scale 101
5.3.2 Whether to assume an input or an output orientation 105
5.3.3 Whether to apply weight restrictions 106
5.3.4 Dealing with 'slacks' 109
5.3.5 Model specification and judging the quality of a DEA model 111
5.3.6 How to adjust for environmental factors 115
5.4 Application to acute hospitals in England 117
5.4.1 The methods and data 117
5.4.2 Model specifications 118
5.4.3 Results 118
5.5 Conclusions 127

6 The Malmquist index 129
6.1 Introduction 129
6.2 The Malmquist methodology 130
6.2.1 A graphical illustration 130
6.2.2 The general form of the Malmquist index 133
6.3 Considerations in using the Malmquist index 137
6.4 Previous literature on the Malmquist index in health care 138
6.5 Application to acute hospitals in England 139
6.5.1 The methods and data 139

Table of Contents
More information

6.5.2 Model specifications 139
6.5.3 Results 139
6.6 Conclusions 149

7 A comparison of SFA and DEA 151
7.1 Introduction 151
7.2 Why SFA and DEA produce different efficiency estimates 151
7.3 Other differences between SFA and DEA 154
7.4 Comparison of different methodologies 156
7.4.1 The methods and data 156
7.4.2 Model specifications 156
7.4.3 Results 159
7.5 Conclusions 164

8 Unresolved issues and challenges in efficiency measurement 167
8.1 Introduction 167
8.2 Output weights 167
8.3 Modelling the production process 171
8.4 Environmental constraints 174
8.5 Dynamic effects 177
8.6 Conclusions 178

9 Some alternative approaches to measuring performance 179
9.1 Introduction 179
9.2 Multilevel modelling 180
9.3 Generalised statistical modelling 187
9.3.1 Illustrative example 192
9.4 Seemingly unrelated regression (SUR) in a multilevel context 197
9.4.1 Illustrative example 199
9.5 Conclusions 204

10 Conclusions 207
10.1 Introduction 207
10.2 Output weights 208
10.3 Partitioning unexplained variation 209
10.4 Unresolved technical issues 211
10.5 For policy makers and regulators 213
