Abell, George, O., 55, 63, 276, 277, 301
  catalog of clusters, 276, 301
absolute magnitude, 36
  brightest cluster galaxy, 34
  photographic, M_{pg}, 23
  visual, M_{vis}, 21–22
  Type Ia at maximum, 39
action principle, 175–178, 226
  with creation of matter, 186–188
  for general relativity, 175–176, 185
  and probability amplitude, 176–177
  for scale invariant gravity, 231–234
activity galactic nucleus (AGN), 126, 147, 257–258, 304
Adams, Walter, 18, 19, 25, 79, 313, 320
age dilemma, 40–43
α effect, 323
Alpher, Ralph, 45, 80, 81, 83, 94, 97, 98, 101, 102, 106
Alfven, H., 46, 53
Ambartsumian, V.A., 118, 139, 164, 167, 168, 287, 289, 290, 301, 311, 312
Anderson, S., 323, 336
angular momentum, origin of, 321–322
anomalous redshifts, *see* redshifts, non-cosmological
apparent magnitude, 36, 120
  bolometric, m_b, m_{bol}, 23–24, 33–35, 57
  photographic, m_{pg}, 21–24, 56
  visual, 57
Arp, H.C., 121–122, 126, 129, 130, 134, 136, 137, 140, 148, 161, 162, 327
Arp Catalog, 163
Arp 220, 163
Aston, F. 40, 44

Baade, Walter, 19, 25, 28, 30, 35, 43, 47, 48, 50, 54
Bagla, J.S., 42, 44
Bahcall, John, 146, 281, 301
Banerjee, S., 294, 302
Barlow, T., 158, 161
Barnes, E.W., Bishop of Birmingham, 12, 15
Barnothy, J., 290, 302
Barnothy, M.F., 290, 302
baryogenesis, 183
baryon to photon ratio, 80, 98, 103, 115, 179, 183, 184, 248, 308
Beck, R., 324, 336
Bergeron, J., 156, 159, 162
beryllium (^{9}Be), production in stars, 105
Bethe, Hans, 40, 46
big bang cosmology, 41–42, 46, 65, 84, 85, 89, 90, 97, 101, 105, 106, 117, 168, 290, 313, 321
Blaauw, A., 35, 43
black hole–accretion disc paradigm, 166–167, 247, 312, 316, 320
Blandford, R.D., 323, 336
BL Lac objects, 147–148, 150, 258, 259
Boesgaard, A.M., 80, 94, 104
Boissé, J., 159, 162
Bolton, John, 46, 48, 51, 53
Bondi, H., 46, 65, 72, 73, 77, 83, 84, 85, 88, 94, 313, 320
Borgeest, V., 138, 154, 159, 162
Born, Max, 24
boron, production in cosmic ray spallations, 105
Boroson, T., 158, 162
Bowen, Ira, 32
Bowen E.G. (Taffy), 48, 53
Box, T.C., 330, 337
Broadhurst, T.J., 264, 273, 281, 301
Browne, I.A.W., 122, 161
Burbidge, E.M., 44, 129, 158, 160, 162, 168
Burbidge, G., 44, 47, 49, 70, 74, 78, 84, 94, 102, 106, 116, 122, 130, 148, 158, 160, 161, 162, 165, 168, 255, 273, 288, 290, 304, 310, 313, 320, 325, 329, 332, 334, 337
Burles, S., 105, 106, 116
Butcher, H., 59, 63
Butcher–Oemler effect, 59–60, 265–266

2C-Catalog, 68
3C Survey, (3CR: revised) 70, 73, 74, 122, 253
4C Survey, 71, 72

Compton paradox, 120
Compton wavelength, 171, 176–177, 229, 234, 248, 317
conformal invariance, *see* scale invariance
conformal transformation, *see* scale transformation
cooling flows, 259
Cosmic Background Explorer (COBE), 32, 76, 89–94, 305, 307
cosmic microwave background, *see* microwave background radiation
cosmic rays, 165
cosmic time, 13
cosmological constant, 2, 8, 14, 42, 185, 214, 219
cosmological models with matter creation, 189–196
cosmological redshift, 11, 12, 25, 170
cosmological rest frame, 170
counts of galaxies, 28–32, 67, 170, 262–264
counts of radio sources, 28, 67–75, 76, 192, 241
CP-violation, 183–184
Crab nebula, 47
creation centers, 118, 167–168, 239–249, 316–317
  effect on expansion of the universe, 194–195, 218–220
creation of matter, *see* creation centers
creation events, 241–244, 248
CTA 102, 120
Curtis, H. 17, 18, 25
Curtis–Shapley debate, 18
curvature of space,
  attempts to measure, 28–32, 34–35
Cygnus A, 47, 50, 61, 254

damped Lyman α systems, 269–272
Dar, A., 153
dark matter, 102, 134, 164, 281
  baryonic, as low mass stars and stellar remnants, 261, 281
  in groups and clusters of galaxies, 287–290, 312
  in single galaxies, 281–287
    in solar neighborhood, 281, 284
    through flat rotation curves, 284–287
    through X-ray astronomy, 287
  gravitational lensing by, 135, 155, 290–293
  as massive neutrinos 102
  as nonbaryonic hypothetical particles, 102, 293, 306–307, 323
    cold dark matter (CDM) 308
Das Gupta, P., 74, 78
de Sitter, W., 9–11, 12, 13, 15
de Sitter's universe, 9–11
de Vaucouleurs, G., 37, 44, 66, 77, 275, 277, 300
  bright galaxy catalog of, 277
de Vries, H.L., 122, 161
deceleration of the universe, 172–173
deceleration parameter, q_0, 14, 28, 56–60, 66–67, 76, 214, 241
density, *colsure* or *critical* (ρ_c), 41, 81, 101, 102, 179
density parameter, Ω, 41, 292, 293
Dent, W.A., 120, 160
Depaquit, S., 331, 337
deuterium (D), produced in primordial process, 105
  relationship to helium abundance, 105–106
  made in Planck fireballs, 112–115
Dicke, R.H., 76, 84, 101
Dingle, H., 76–77, 78
Dirac, Paul, 176, 225
Dirac equation, 184
distance modulus, 18, 35
