List of illustrations ix

Introduction 1

Acknowledgments, authorship, depository 3

Publications in which the distribution of Cenozoic benthic foraminifera is correlated with planktic foraminiferal zonal schemes 4

Correlation of zones and formations in the areas under discussion 7

Trinidad

Introduction 9

Barremian to Early Albian 11

Introduction 11

The Early Cretaceous formations 13

Remarks 15

Annotated taxonomic list 16

Late Albian to Early Eocene 47

Geologic-stratigraphic background 47

Previous studies in Trinidad 49

Source of the Trinidad material 50

Composition of the fauna 52

Comparisons with other areas 55

Biostratigraphy 56

Paleoecology 58

Sample list 63

Annotated taxonomic list 65

Late Early Eocene to Middle Miocene 229

Introduction 229

The annotated taxonomic list for Trinidad is combined with those from Venezuela (Falcon) and Barbados beginning on page 323

Venezuela

Introduction 261

Early Cretaceous of eastern Venezuela 265

Introduction 265

Table of Contents
More information

The Early Cretaceous formations 266
Remarks on the occurrence and distribution of benthic and planktic foraminifera in the Early Cretaceous of eastern Venezuela and Trinidad, and the zones based on them 267

Oligocene and Miocene of eastern Venezuela 273
Review of foraminiferal investigations 273

The Falcon Basin 277
Introduction 277
Eastern Falcon 278
Central Falcon 283
The annotated taxonomic list for eastern and central Falcon is combined with those from Trinidad and Barbados beginning on p. 323

The Maracaibo Basin 305
Introduction 305
The Late Cretaceous to Miocene formations 307

Barbados
Introduction 311
Middle Eocene to base Miocene 313
The annotated taxonomic lists for Barbados are combined with those from Trinidad and Venezuela (Falcon) beginning on p. 323

Annotated taxonomic list of late Early Eocene to Middle Miocene benthic foraminifera of Trinidad, Venezuela (Falcon), and Barbados
Introductory remarks 323
Agglutinated taxa 324
Calcareous non-trochospiral taxa 330
Calcareous trochospiral taxa 360
