CONTENTS

Preface *page* vii

1 **Introduction: Greek Science and the Recognition of Nerve as a Channel** 1

2 **Galen's Physiology of the Nervous System** 24

3 **Nerve, Brain, and Soul in the Middle Ages** 36

4 **Renaissance and the New Physiology** 50

5 **New Physical and Chemical Models of Nerve in the Enlightenment** 63

6 **New Systematizations of Nerve Function in the Enlightenment** 93

7 **Electricity as the Agent of Nerve Action** 108

8 **Nerve Fiber Form and Transformation** 130

9 **Wallerian Degeneration: Early and Late Phases** 169

10 **Nerve Regeneration** 187

11 **Characterization of Axoplasmic Transport** 215

12 **Molecular Models of Transport** 263

13 **Actions of Neurotoxins and Neuropathic Changes Related to Transport** 284

14 **Purposeful Reflexes and Instinctive Behavior** 305

15 **Neural Events Related to Learning and Memory** 317

16 **Epilogue: With Observations on the Relation of the Nervous System to Mind** 353

Bibliography 367
