List of contributors vii
Acknowledgments ix

Introduction: new approaches to language evolution
Michael Studdert-Kennedy, Chris Knight and James R. Hurford 1

Part I Grounding language function in social cognition

1 Introduction: grounding language function in social cognition
Chris Knight 9

2 On discontinuing the continuity–discontinuity debate
Jean Aitchison 17

3 The origin of language and cognition
Ib Ulbaek 30

4 Mimesis and the Executive Suite: missing links in language evolution
Merlin Donald 44

5 Ritual/speech coevolution: a solution to the problem of deception
Chris Knight 68

6 Theory of mind and the evolution of language
Robin Dunbar 92

7 Old wives' tales: the gossip hypothesis and the reliability of cheap signals
Camilla Power 111

8 Altruism, status and the origin of relevance
Jean-Louis Dessalles 130

9 The evolution of language from social intelligence
Robert Worden 148

Part II The emergence of phonology

10 Introduction: the emergence of phonology
Michael Studdert-Kennedy 169

11 Long-call structure in apes as a possible precursor for language
Mária Ujhelyi 177

12 Social sound-making as a precursor to spoken language
John L. Locke 190

13 The particulate origins of language generativity: from syllable to gesture
Michael Studdert-Kennedy 202

14 Evolution of the mechanisms of language output:
comparative neurobiology of vocal and manual communication
Peter F. MacNeilage 222

15 Systemic constraints and adaptive change in the formation of sound structure
Björn Lindblom 242

Table of Contents
More information

16 The development of sound systems in human language
Klaus J. Kohler 265

17 Synonymy avoidance, phonology and the origin of syntax
Andrew Carstairs-McCarthy 279

Part III The emergence of syntax

18 Introduction: the emergence of syntax
James R. Hurford 299

19 On the supposed 'counterfunctionality' of Universal Grammar: some evolutionary implications
Frederick J. Newmeyer 305

20 Language evolution and the Minimalist Program: the origins of syntax
Robert C. Berwick 320

21 Catastrophic evolution: the case for a single step from protolanguage to full human language
Derek Bickerton 341

22 Fitness and the selective adaptation of language
Simon Kirby 359

23 Synthesizing the origins of language and meaning using coevolution, self-organization and level formation
Luc Steels 384

24 Computational simulations of the emergence of grammar
John Batali 405
