abstract entities, 158, 161, 169
ambiguity, 14, 54, 69, 160
artificial intelligence, 1
atomic diagrams, 116
avoid ⊗-rule, 57, 60–1, 116

background set, 46, 48, 64, 67, 115
Barwise, Jon, 2, 5, 181–4, 188
Boolean algebra, 6, 14, 18, 155

categorical sentences, 12, 14, 36, 111–15, 129, 178
  existential statements, 12, 14, 16, 19, 21, 22, 36, 114, 149, 178
  universal statements, 12, 14, 16, 19, 21, 149, 178
categorical syllogisms, 111–15
completeness, 6–10, 35, 186–9
Completeness Theorem in Venn-I, 98–110
Completeness Theorem in Venn-II, 127–40
compound diagrams, 116
connectives, 63, 111–15, 141
consequence relations, *see* logical consequence
constituents, 116
constraints, 168–9
containment relations, 25–7, 42, 98–100
contradication, 14–16, 32, 87–8, 121, 150, 166–8, 177
conventionality, *see* conventions
conventions, 154, 157–65, 168–76, 178–80
copy, 81–2
counterpart relations (*or* set *cp*), 53–7, 117

deductive reasoning, *see* deductive systems
deductive systems, 3, 9, 13, 16, 31, 39, 42, 80, 187
derivation, 26, 31, 42, 80–1, 187
diagrams (*see also under individual headings*)
  accidental properties of, 4
  as aids, *see* diagrams, as heuristic tool
  as heuristic tool, 1, 2, 6, 7, 8, 10, 39, 40, 165, 185
  misapplication of, 3–5, 185
  mistrust of, 1–10
  misuse of, *see* diagrams, misapplication of
  visuality of, *see* visuality
disjoint sets, 65, 67
disjunction distribution principle, 181–4
disjunctive normal form, 129
domain, 63, 65
Dretske, Fred, 181

elaborated diagrams, *see* maximal diagrams
empty set, 47, 48, 63, 70
equivalence
  equivalent diagrams, 73–7, 119–20
  equivalent representing facts, 77–9, 120
  semantic, *see* equivalence, equivalent representing facts
  syntactic, *see* equivalence, equivalent diagrams
Etchemendy, John, 2, 5, 181–4, 188
Euler, Leonhard
  Euler system, 12–6, 171
Existential Graphs (of Peirce), 20, 28, 114n, 186
expressive power, 3, 9, 48, 112, 113, 153

family trees, 6, 162, 165
first-order logic, 3, 63, 185, 186
  monadic, 9, 112, 141

game-theoretic approach, 186
Gardner, Martin, 6
geometrical figures, 156–7
geometry, 3–4

More information

Graduate Record Exam, 165

heterogeneous reasoning, 188–9
heuristic tool, *see* diagrams, as heuristic tool
Hilbert, David, 1–2
homogeneous reasoning, 3, 188
Hyperproof, 188

identity sign, 64
inductive definition, 51, 57, 116, 118
inference rules, 9, 26, 81
information
  alternative, *see* information, disjunctive
  conflicting, *see* contradiction
  conjunctive, 163–5, 173–6
  disjunctive, 21, 22, 114, 116, 118, 129, 180
  hypothetical, 178
  negative, 178, 179
information theory, 69
infons, 69
intersections, 51, 65
isomorphism, 6, 12, 141–52

Jordan's Theorem, 1

Kneale, Martha, 13
Kneale, William, 13

Lambert linear system, 36–7, 115, 171
linear mode, 165, 174–5
logical axioms, 80
logical consequence, 8, 27–8, 37, 63, 71–2, 81, 119
logical constants, 64, 188
logical diagrams, 11, 20, 38

manipulations, *see* transformation
maps, 161, 162, 165, 167
maximal diagrams
  elaborated, 131
  in Venn-I, 100
  in Venn-II, 128
Maximal Representation Theorem in Venn-I, 101
Maximal Representation Theorem in Venn-II, 128
models, 40, 63
modus ponens, 81
multimodal reasoning, *see* heterogeneous reasoning

nonempty set, 47, 48, 63, 70

obtainability, 92, 125

partial information (partial knowledge, imperfect knowledge, or uncertainty of information), 17, 36, 130, 173
partial-overlapping rule, 57, 58–60
Peirce, Charles Sanders, 20–40, 186
perceptual inference, 157–68
Perry, John, 181–4
picture theory of language, 166
pie charts, 153, 165, 167
power sets, 65
primary diagram, 17, 46, 64, 66, 172
propositional logic, *see* sentential logic

quantifier disjunctive normal form, 147
quantifier-literal, 147
Quine, William Van Orman, 111–12

reading off (a diagram), 41–2
reflexivity, 76
regions, 51
  basic regions, 51
  empty regions, 130
  minimal regions, 51
representing facts and represented facts, 20, 68–70, 159, 161
resemblance, *see* similarity
Roberts, Don, 186
rules of transformation, *see* transformation

Salmon, Merrilee, 21
satisfaction
  of diagram, 71, 118
  of infon, 70
semantic analysis, 35–40, 188, *see also* syntax and semantics,
semantics and syntax, *see* syntax and semantics
sentence symbols, 44, 53–4
sentential logic, 63
sequence of diagram, 70
set assignments, 64–5
  extension of, 65–6
shadings, 18, 47–8, 69–70
similarity, 157–65
single-mode reasoning, *see* homogeneous reasoning
soundness, 6–10, 186–9
Soundness Theorem in Venn-I, 93–8
Soundness Theorem in Venn-II, 125–7
Sowa, John, 186
spatial arrangements, 160–2
spatial relations, 160–2
subdiagrams, 75, 119
  proper, 75, 120
subtraction, 52, 65
syllogisms, *see* categorical syllogisms
symmetry, 76, 165, 167
syntactic devices, 160–5, 169–76
