ALIGNóO, 57, 69–73

BE MORAIC, 26, 33
BINSPAN / BINASS(F), 118–19
Blumenfeld (2006), 51–57

coalescence, 108, 110, 116–17
compensatory lengthening, 3, 100–2, 113–15, 120–30, 169, 178
  onsets as a target of, 133–34
  onsets as a trigger of, 203–6
consonant length, 194–97
culminativity, 91

doubled consonants, 196
dual nature of sonorants, *see* voice, and sonorants

economy, 24–25
epenthesis, 58, 66, 116, 120, 124, 140, 205

functional approaches, 36, 193, 236
fundamental frequency (F0), 19, 168, 210, 244
fusion, *see* coalescence

geminate, 164, 166, 194–97
  fake, *see* doubled consonants
  initial, 167–68, 179–80, 199
  onset, 184–91, 199
  typology, 192–94, 197–98
glide formation, 123–24
Gordon (2005), 241–45
gradience, 79

Hayes (1989), *see under* theory, standard moraic

iambic, 70–71, 96, 176

*μ/ONS, 16, 148–52, 153–58, 181–84, 192–94, 236
markedness
  moraic, 16
    coda, 16, 21
    onset, 16, 21, 26, 29, 190
  positional, 70
metathesis, 105, 116, 118
minimal word, *see* word minimality
mora licensing, 156–58
  positional, 111, 149
*MORAIC ONSET, *see* *μ/ONS

nasalization, 41–43, 49, 110

onset
  and compensatory lengthening, *see under* compensatory lengthening
  and geminates, *see* geminate, onset
  and word minimality, *see* word minimality
  moraic
    coerced, 11–14, 26–29
    distinctive, 11–12, 14, 29–32
    geminated, 12–13
*ONSET/r, 114–19
onset weight, 8–11, 175
  coerced, *see* onset, moraic, coerced
  distinctive, *see* onset, moraic, distinctive
  rarity of, 130–33, 193, 213, 235–36

P-DEP-μ, 111–12, 149, 153, 179–80
peak hierarchy, 173
pitch perturbation, *see* voice, -induced pitch perturbation
position correspondence (POSCORR), 107–9, 123–25, 128–30, 179–80
prenasalization, 123–25
