Index

A Brief History of Time 2, 15, 121
abelian chiral anomaly 377
accretion discs 229
acoustic peaks 735, 760
action complexity 369
active galactic nuclei 225
adiabatic perturbations 762, 782
AdS/CFT correspondence 6, 200, 300, 305, 335, 365, 457, 468, 501, 845
anthropic principle 35
anti-de Sitter space 8, 593
Ashtekhar variables 171, 409, 703
asymmetric orientifolds 573
asymptotically conical metric 527
asymptotically locally Euclidean metric 517
axial anomaly 377
aymptotically flat metric 520

Banks-Fischler proposal 557
Barbero–Immirzi parameter 416, 423
Bardeen formalism 127, 129
baryon density 739, 756
beginning in time 1, 109, 115, 138, 784
Bekenstein bound 545
Bekenstein–Hawking entropy 302, 334, 416, 539
bi-metric theories 763
Bianchi models 140, 144, 518, 707
Big Bang 3, 5, 22, 138, 143, 236, 409, 420, 755
Big Bang tests 24
Big Crunch 816
black holes 4, 52, 75, 121, 203, 289
  accretion discs 229
  axisymmetric 4
  brane worlds 281
  collisions 87
  complementarity 330
  entropy 59, 113, 310, 460, 543
  evaporation 5, 61, 112, 291, 330
  event horizon 292
  formation 220
  information loss 303, 331
  initial data 322
  inner horizon stability 205
  mechanics, first law 293
  mechanics, second law 87, 112
  mergers 91
  microstates 337
  no hair theorems 4, 81, 205, 315
  orbits 82
  pair creation 5, 264
  pair production 353
  positive mass theorems 310
  primordial 5, 236
  singularities 5
  spherical models 212
  spindown 284
  stellar mass 217

black holes (*cont.*)
  strong interaction 307
  supermassive 217, 219
  surface gravity 292, 316
  thermodynamics 4, 177
black strings 310
  critical phenomena 325
Blandford–Znajek process 226
Bogolibov transformation 543
Boomerang experiment 43, 739, 760
Borde–Sorkin conjecture 443
Born–Infeld action 475
Born-rule probability 405
bothrodesy 82
bouncing universes 146, 150, 763, 781, 786
Bousso–Polchinski mechanism 571
brane collisions 785, 790
brane cosmology 137, 152, 839
brane potential 793
brane worlds 10, 172, 178, 281, 511, 781, 839
bulk scalars 851
Bunch–Davies vacuum 654

Calabi conjecture 521
Calabi–Yau manifold 190, 525
Casimir operator 594
category of sets 397
Cauchy horizon 142, 207, 211
Cauchy hypersurface 186
causal metrics 438
causal set hypothesis 447
causality violation 142
Centre for Mathematical Sciences 13
Chandrasekhar mass 292
chaotic inflation 741, 803
chiral fermioins 498
chronology horizon 169
chronology protection conjecture 4, 102, 161, 173, 449
classical state space 387
closed cosmological model 57
closed strings 467
closed timelike curves 4, 164
COBE satellite 759, 808
cocycle function 378
Coleman–DeLuccian mechanism 584
Coleman–Weinberg potential 729
collapse of the wavefunction 63
computational cosmology 755, 773
conference lectures 1
conference mug 6
conformal anomaly 377
conifold 525
correlations, finite entropy 343
cosmic censorship conjecture 88, 96, 111
cosmic concordance model 739, 761
cosmic defects 767, 782, 813
cosmic microwave background 4, 9, 22, 109, 122, 130, 138, 143, 207, 735, 755, 756, 781, 811
  anisotropies 135, 130, 735, 756
  Doppler peaks 28, 735, 760
  experiments 735, 759
  polarization 758, 763, 770
cosmic rays 254, 285
cosmic strings 244, 265, 767, 773
cosmological constant 29, 122, 150, 739, 765, 841, 848
cosmological D-brane model 601
cosmological entropy 505
cosmological horizon 561, 564
cosmological parameters 36, 739, 761
cosmological perturbations 4, 122, 725, 761, 782, 788, 797, 816
cosmological phase transitions 243, 802
cosmological singularities 54, 110, 138, 783
cosmology 121, 725, 755, 777
COSMOS supercomputer 774
cotangent bundle 387
covariant entropy bound 551
covariant perturbations 124, 127
C^*-algebras 386
cyclic universe 793, 813, 819, 830
cylic model 781

D-bound 547
D-term inflation 599
