adaptationism, 12
adaptations, 27–28, 175–177
adrenergic cells, 104–106
agency/agents, 6–9; boundaries and, 7, 15, 24, 25, 26–27, 50, 52, 57, 70, 159; causation/causes and, 6–7, 50, 77, 139; having life and, 6; having a mind and, 4–6; physicality and, 6; realism and, 70, 74–95, 220; *See also specific types* (e.g., biological agents, living agents)
agent pluralism, 220, 221, 231, 236
Agrawal, Anurag, 236, 255
Alexander, Richard, 198, 263
Allee, Warder Clyde, 83, 250
altruism, 16, 25–26, 172–174, 176, 177–181, 189, 198
Anderson, James B., 246
Antonovics, Janis, 17
aphids, 63, 154
Arabidopsis thaliana, 235
Archaea, 90
Aristotle, 5, 9–11, 21, 96, 118, 243
Armillaria bulbosa, 47
artifacts, 19, 68, 76–77, 78
artificial intelligence, 5, 6, 32, 91, 94
artificial life, 91–94
asexual clonelines, 117
Atran, Scott, 243, 251
autonomy: artificial life and, 93; cognitive metaphor and, 76; corporate organisms and, 81–83; crystallization thesis and, 76–79; history of life and, 86, 87–89; incommensurability in, 64, 72, 73, 76, 93; normativity in, 64, 72, 73, 76, 93; organisms and, 52, 59, 62–65, 66, 68–69, 71–74, 79–80; realism and, 76; Who's Zoomin' Who Problem and, 81
averaging fallacy, 197, 198, 200–202
Avital, E., 258

backpropagation algorithm, 226
bacteria, 63, 90; *E. coli*, 63, 210; *Wolbachia*, 185
Baltimore, David, 256
Barkow, Jerome, 258
Barrett, James L., 249
Bateson, William, 121, 142, 254
Baumann, Paul, 248
Beadle, G. W., 125
Bechtel, William, 40–41, 246
beetles, 185, 234–235
behavioral sciences, 17
Bekoff, Mark, 258
Belin, Alletta d'A., 92, 251
Bering, Jesse M., 249
Bernard, Claude, 39
