Conference participants xxi

Part 1. THE COSMIC WEB

Section A. The matter distribution

Mapping the cosmic web with the Sloan Digital Sky Survey (I) 5
M.S. Vogeley, F. Hoyle, R.R. Rojas, D.M. Goldberg

X-ray galaxy clusters in the large-scale structure (I) 12
H. Böhringer, P. Schuecker, N. Nowak, P. Popesso, M. Huber

The large-scale environment of groups and clusters of galaxies (I) 19
M. Plionis

Superclusters and voids in the Sloan DSS 26
V. Müller, C. Maulbetsch

Discovery of a large-scale clumpy structure of the Lynx supercluster at $z \sim 1.27$ 29
F. Nakata, T. Kodama, K. Shimasaku, M. Doi, H. Furusawa, M. Hamabe, M. Kimura, Y. Komiyama, S. Miyazaki, S. Okamura, M. Ouchi, M. Sekiguchi, M. Yagi, N. Yasuda

Weak lensing evidence for a filament between A222/A223 34
J.P. Dietrich, D. Clowe, P. Schneider, J. Kerp, E. Romano-Díaz

The faint X-ray source population near 3C 295 39
V. D'Elia, F. Fiore, M. Elvis, M. Cappi, S. Mathur, P. Mazzotta, E. Falco, F. Cocchia

Section B. Theoretical tools

Morphological statistics of the cosmic web (I) 45
S.F. Shandarin

Voids in a ΛCDM universe (I) 51
J.M. Colberg

A hierarchy of voids 58
R. van de Weygaert, R. Sheth, E. Platen

Measuring the Mach number of the universe via the Sunyaev–Zel'dovich effect . . 64
F. Atrio-Barandela, A. Kashlinsky, J.P. Mücket

© Cambridge University Press www.cambridge.org

Edited by Antonaldo Diaferio
Table of Contents
More information

Section C. Clusters in action

Interacting clusters and their environment (I) 71
S. Bardelli

Galaxy cluster formation from the large-scale structure: a case study of the Abell 2125 complex at $z = 0.247$ 78
Q.D. Wang, F. Owen, M. Ledlow, W. Keel

Radio activity in major mergings 83
E. Zucca, T. Venturi, S. Giacintucci, S. Bardelli, D. Dallacasa

Radio halos in merging clusters of galaxies 86
S. Giacintucci, T. Venturi, S. Bardelli, G. Brunetti, D. Dallacasa, P. Rao, E. Zucca

Large-scale velocity flow in the Horologium-Reticulum supercluster 89
M.C. Fleenor, J.A. Rose, W.A. Christiansen, R.W. Hunstead, M. Johnston-Hollitt, M.J. Drinkwater

Multiple merging in the Abell cluster 1367 92
L. Cortese, G. Gavazzi, A. Boselli

Wide-field spectroscopy of a galaxy cluster pair at $z = 0.4$ 95
D.G. Gilbank, F.J. Castander, M.L. Balogh, R.G. Bower

Structure and dynamics of the Shapley supercluster 98
D. Proust, A. Reisenegger, H. Quintana, E. Slezak, H. Muriel, L. Sodré Jr., M.J. Drinkwater, Q.A. Parker

Part 2. FORMATION AND EVOLUTION OF GALAXY CLUSTERS

Section A. Diffuse baryons

The warm-hot intergalactic medium (I) 105
J.S. Kaastra

First detection of WHIM filaments at cosmological distances 111
F. Nicastro

Absorbers in the suburbs: HST views the local Lyα forest 116
J.T. Stocke, J.M. Shull, S.V. Penton, B.A. Keeney, J.L. Rosenberg

Clusters outskirts at X-ray wavelengths: current status and future prospects . . . 122
S. Molendi

XMM-Newton view on cluster outskirts 126
A. Finoguenov

Thermal structure of cooling clusters 131
R. Piffaretti, J. Kaastra, T. Tamura, J.R. Peterson

A note on temperature profiles of rich clusters of galaxies 134
S. De Grandi, S. Molendi

© Cambridge University Press www.cambridge.org

CAMBRIDGE

978-0-521-84908-1 - Outskirts of Galaxy Clusters: Intense Life in the Suburbs
Edited by Antonaldo Diaferio
Table of Contents
More information

Temperature and metallicity maps in cool core clusters of galaxies 137
S. Caffi, F. Gastaldello, S. Ghizzardi, S. Molendi

Warm gas in the outskirts of galaxy clusters – The cluster soft excess phenomenon 140
M. Bonamente, R. Lieu, J.P.D. Mittaz

Soft X-ray excess in the cluster of galaxies Sérsic 159-03 145
J. de Plaa, J.S. Kaastra, M. Méndez, T. Tamura, J.A.M. Bleeker, J. Peterson, F.B.S. Paerels, M. Bonamente, R. Lieu

Non-thermal phenomena in galaxy clusters (I) 148
G. Brunetti

Cluster mergers, radio halos and hard X-ray tails: a statistical magneto-turbulent model 155
R. Cassano, G. Brunetti

The *XMM*-Ω project: gas mass fraction shape in high redshift clusters 158
R. Sadat and the XMM-Ω collaboration

Measuring cluster gas mass fractions with X-ray, Sunyaev-Zel'dovich effect, and weak lensing data 163
S. LaRoque, M. Bonamente, J.E. Carlstrom, M. Joy, E.D. Reese

Section B. Building clusters

The state of wide-field surveys and their contributions to the study of cluster peripheries (I) 169
I.P. Dell'Antonio

Optical/infrared observations of high-redshift galaxy clusters (I) 176
H.K.C. Yee

Wide–field spectroscopy of A1689 and A1835 with VIMOS: first results 183
O. Czoske

Optical and X-ray analysis of the galaxy cluster A3921 188
C. Ferrari, C. Benoist, S. Maurogordato, A. Cappi, E. Slezak, E. Belsole, J.L. Sauvageot, H. Bourdin, G.W. Pratt

The distribution of mass and light in cluster infall regions (I) 193
K. Rines

M/L of X-ray luminous clusters from weak lensing 200
H. Dahle

Action model of infall into the Virgo cluster 205
R.B. Tully, R. Mohayaee

Infall from peculiar velocities 212
M.L. Ceccarelli, C. Valotto, N. Padilla, D.G. Lambas, R. Giovanelli, M. Haynes

Dynamical masses of RCS galaxy clusters 215
K. Blindert, H.K.C. Yee, M.D. Gladders, E. Ellingson

978-0-521-84908-1 - Outskirts of Galaxy Clusters: Intense Life in the Suburbs
Edited by Antonaldo Diaferio
Table of Contents
More information

Diffuse intracluster light in 10 clusters at $0.05 < z < 0.31$ 220
J.E. Krick, R.A. Bernstein

Intracluster light at $z \sim 0.25$ from SDSS imaging data. 226
S. Zibetti, S.D.M. White

Suprime-33: Suprime-Cam weak lensing cluster survey 231
T. Hamana

HIROCS – a galaxy cluster survey at high redshifts 233
S. Falter, H.-J. Röser, H. Hippelein, C. Wolf, E. Bell

ESO distant cluster survey: spectroscopy. 236
C. Halliday, B. Milvang-Jensen, S. Poirier, B.M. Poggianti, P. Jablonka, A. Aragón-Salamanca, R. Pelló, R.P. Saglia, G. De Lucia, L. Simard, D.I. Clowe, G. Rudnick, S.D.M. White

Spectroscopy of high-redshift EIS clusters 239
L.F. Olsen, H.E. Jørgensen, E. Zucca, S. Bardelli, A. Biviano, C. Benoist, L. da Costa, M. Ramella, M. Scodeggio

Scaling relations for galaxy clusters 242
C. Marmo, G. Fasano, E. Pignatelli, B. Poggianti, D. Bettoni, C. Halliday, J. Varela, M. Moles, P. Kjærgaard, W. Couch, A. Dressler

Application of the Voronoi tessellation technique for galaxy cluster search in the Münster Red Sky Survey 245
E. Panko, P. Flin

On the ellipticity of galaxy clusters 248
P. Flin, J. Krywult, M. Biernacka

Section C. Theoreticians at work

Intracluster thermodynamics (I) 253
G. M. Voit

Studying clusters of galaxies with hydrodynamical simulations (I) 260
V. Springel

Dynamical evolution of the ICM (I) 267
G. Tormen

The structure of the ICM from high-resolution SPH simulations 274
G. Yepes, Y. Ascasibar, R. Sevilla, S. Gottlöber, V. Müller

The dynamics of cluster substructure. 280
S.P.D. Gill, A. Knebe, B.K. Gibson

Enrichment of the intracluster medium from infalling galaxies 285
E. van Kampen, W. Domainko, W. Kapferer, S. Schindler, S. Kimeswenger, O. Mangete, M. Ruffert

Chemical enrichment of ICM in a hierarchical galaxy formation model including SNe Ia 290
M. Nagashima, C.G. Lacey, C.M. Baugh, C.S. Frenk, S. Cole

978-0-521-84908-1 - Outskirts of Galaxy Clusters: Intense Life in the Suburbs
Edited by Antonaldo Diaferio
Table of Contents
More information

Masclet: a new multidimensional AMR cosmological code 293
V. Quilis

Simulating the formation of galaxy clusters 296
D. Nagai, A.V. Kravtsov

Intracluster entropy from quasar activity 299
A. Lapi, A. Cavaliere

Reproducing the entropy structure of clusters and groups 302
G. González-Casado, J.M. Solanes, A. Manrique, E. Salvador-Solé

Scaling laws of simulated galaxy clusters 305
D. Sijacki, G. Tormen

Modeling DM and ICM in simulated galaxy clusters 309
E. Rasia, G. Tormen, L. Moscardini

Simulating Chandra observations of galaxy clusters 313
E. Rasia, A. Gardini, P. Mazzotta, G. Tormen, S. De Grandi, L. Moscardini

Velocity field in cluster outskirts in ΛCDM models 316
M.C. Pivato, N.D. Padilla, D.G. Lambas

Constraints to cosmological parameters through cluster evolution 319
A. Del Popolo, N. Ercan

Part 3. FORMATION AND TRANSFORMATION OF GALAXIES

Section A. Nurture and genetics of galaxies

The properties of galaxies on the outskirts of clusters (I) 327
E. Ellingson

Galaxy clusters at low redshift (I) 334
M.L. Balogh

Infall and starbursts in $z \sim 0.5$ clusters 341
A. Dressler

Luminous infrared starbursts in a cluster of galaxies 347
P.-A. Duc, D. Fadda, B. Poggianti, D. Elbaz, A. Biviano, H. Flores, A. Moorwood, A. Franceschini, C. Cesarsky

ISOCAM observations of intermediate-redshift galaxy clusters at 7 and 15 μm. . 352
R. Pérez-Martínez, L. Metcalfe, D. Coia, A. Biviano, B. McBreen, B. Altieri, C. Sánchez-Fernández

A submm survey of high-redshift galaxy clusters: a submm Butcher-Oemler effect? 357
T. Webb, H.K.C. Yee, H. Hoekstra, M. Gladders

Newcomers meet the intracluster medium in the Coma cluster 362
B.M. Poggianti, T.J. Bridges, M. Yagi, Y. Komiyama, D. Carter, B. Mobasher, S. Okamura, N. Kashikawa

Edited by Antonaldo Diaferio
Table of Contents
More information

Galaxy evolution in clusters from $z = 1$ to $z = 0$ 367
S. Andreon, J. Willis, H. Quintana, I. Valtchanov, M. Pierre, F. Pacaud

Internal kinematics of spiral galaxies in distant rich galaxy clusters 372
K. Jäger, A. Böhm, B.L. Ziegler, J. Heidt, C. Möllenhoff

Wide field imaging of distant clusters (I) 377
T. Treu

Spectroscopic signatures of galaxy evolution in Cl0024+16 at $z \sim 0.4$ 384
S.M. Moran, R.S. Ellis, T. Treu

Linking star formation and environment in supercluster galaxies 390
M.E. Gray, C. Wolf, K. Meisenheimer, A. Taylor, S. Dye, A. Borch, M. Kleinheinrich

Galaxy evolution in dense environments: a concise HI perspective (I) 394
M.A.W. Verheijen

HI view of the Virgo cluster outskirts: implications on galaxy evolution 401
J.M. Solanes, T. Sanchis, E. Salvador-Solé, G.A. Mamon

Galaxies in present-day clusters: evolutionary constraints from their distributions and kinematics (I) 406
A. Biviano, P. Katgert

Breaking the mass/anisotropy degeneracy in the Coma cluster 413
G.A. Mamon, E.L. Łokas, T. Sanchis

Velocity of galaxies with different luminosity 418
Y.P. Jing, G. Börner

Radio imaging of head-tailed galaxies from an in-falling filament of the Horologium-Reticulum supercluster 423
M. Johnston-Hollitt, M. Fleenor, J. Rose, W. Christiansen, R.W. Hunstead

Populations of galaxy groups in clusters from wide-field multicolor imaging 426
I.H. Li, H.K.C. Yee, E. Ellingson, G. Laurent

Photometric properties of dwarf galaxies in the Coma cluster: radial dependence 429
Y. Komiyama, S. Okamura, M. Yagi, N. Kashikawa, B.M. Poggianti, T.J. Bridges, B. Mobasher, D. Carter

Environmental effects in the structural parameters of Coma galaxies 432
J. A. L. Aguerri, J. Iglesias-Páramo, J. M. Vílchez, C. Muñoz-Tuñón

The K-band luminosity functions of galaxies in high-redshift clusters 435
S. Ellis, L. Jones

The luminosity function of galaxies in the Hercules cluster 438
R. Sánchez-Janssen, J. Iglesias-Páramo, C. Muñoz-Tuñón, J. A. L. Aguerri, J.M. Vílchez

The dwarf galaxy population in two compact groups 441
P.E. Campos, C. Mendes de Oliveira, M. Bolte

More information

The environmental dependence of galaxy properties in the local universe: effects of local and global environment 444
M. Tanaka, T. Goto, S. Okamura, K. Shimasaku, J. Brinkman

The relation of the abundance ratios in early-type galaxies with the cluster mass 447
C. Carretero, A. Vazdekis, J.E. Beckman

Intergalactic HII regions in Stephan's Quintet 450
C. Mendes de Oliveira, E.S. Cypriano, L. Sodré Jr., C. Balkowski

A new sample of isolated galaxy pairs 453
V. Zitelli, P. Focardi, B. Kelm, S. Marinoni

Dominant galaxies in 2dF groups 456
B. Kelm, P. Focardi

Section B. Building galaxies

The mass assembly history of galaxies and clusters of galaxies (I) 461
T. Kodama, the PISCES team and the SXDS team

Extended Lyman-alpha emitters in and around a proto-cluster at $z = 3.1$ 468
T. Yamada, Y. Matsuda, T. Hayashino

Observing the build–up of the colour-magnitude relation at redshift ~ 0.8 473
G. De Lucia, B.M. Poggianti, A. Aragón-Salamanca, D. Clowe, C. Halliday, P. Jablonka, B. Milvang-Jensen, R. Pelló, S. Poirier, G. Rudnick, R. Saglia, L. Simard, S.D.M. White and the EDisCS collaboration

Age and metallicity estimates from high-resolution galaxy spectra: application to early-type galaxies 478
A. Gallazzi, S. Charlot, S.D.M. White, J. Brinchmann

E+A galaxies in intermediate redshift clusters 483
K.-V.H. Tran, M. Franx, G.D. Illingworth, D.D. Kelson, P. van Dokkum

The stellar populations of low-redshift clusters 488
C. Harrison, M. Colless, W.J. Couch, B.A. Peterson

The stellar kinematics of the giant halos of Brightest Cluster Galaxies 491
G.K.T. Hau, M. Hilker, T. Bridges, D. Carter, H. Dejonghe, S. De Rijcke, H. Quintana

The kinematic properties of isolated elliptical galaxies 496
G.K.T. Hau, D.A. Forbes, F. Reda

A detailed view of the Fundamental Plane of early–type galaxies in clusters at $z \sim 0.2$ 499
A. Fritz, B.L. Ziegler

Evolutionary status of early–type galaxies in distant poor clusters 502
A. Fritz, B.L. Ziegler

Structure and stellar populations in early-type galaxies 505
A. Vazdekis, I. Trujillo, Y. Yamada

More information

More evidence of substructure in the motions of nearby halo stars 508
P. Re Fiorentin, A. Helmi, M.G. Lattanzi, A. Spagna

Section C. The galaxy melting pot

On the age-radius relation and orbital history of cluster galaxies (I) 513
B. Moore, J. Diemand, J. Stadel

Morphological evolution of cluster galaxies 519
C. Mastropietro, B. Moore, J. Diemand, L. Mayer, J. Stadel

L.O.S.V.D.'s of elliptical galaxies from mergers of disk galaxies 524
A.C. González-García, M. Balcells

Galaxy formation modeling (I) 527
A.J. Benson

The roles of ram-pressure stripping and minor mergers in the evolution of galaxies 534
T. Okamoto, M. Nagashima

On the inclusion of environmental effects in the halo model of galaxy clustering (I) 539
R.K. Sheth, U. Abbas, R. Skibba

How does clustering depend on environment? 546
U. Abbas, R.K. Sheth

Effects of small-scale structure on the progress and duration of reionization 549
I.T. Iliev, P.R. Shapiro, E. Scannapieco, A.C. Raga
