Preface xv

I Comparative and functional fungal genomics **1**
1 Genome and proteome analysis of industrial fungi
S. E. Baker, C. F. Wend, D. Martinez, J. K. Magnuson, E. A. Panisko, Z. Dai, K. S. Bruno, K. K. Anderson, M. E. Monroe, D. S. Daly and L. L. Lasure 3
2 The rice blast story: from genome sequence to function
R. A. Dean, T. Mitchell, R. Kulkarni, N. Donofrio, A. Powell, Y. Y. Oh, S. Diener, H. Pan, D. Brown, J. Deng, I. Carbone, D. J. Ebbole, M. Thon, M. L. Farman, M. J. Orbach, C. Soderlund, J-R. Xu, Y-H. Lee, N. J. Talbot, S. Coughlan, J. E. Galagan and B. W. Birren 10

II Bioactive molecules **23**
3 The biosynthesis of polyketides, acyl tetramic acids and pyridones by filamentous fungi
R. J. Cox 25
4 Fungal metabolites as lead structures for agriculture
T. Anke and E. Thines 45
5 Molecular and genetic analysis of symbiosis expressed secondary metabolite genes from the mutualistic fungal endophytes *Neotyphodium lolii* and *Epichloë festucae*
B. Scott, C. A. Young, A. Tanaka and E. J. Parker 59
6 What can genomics tell us about secondary metabolism in *Aspergillus*?
G. Turner 78

Edited by G. D. Robson, P. van West and G. M. Gadd
Table of Contents
More information

III Protein folding and secretion **93**
7 The role of microtubules and motors for polarized growth of filamentous fungi
R. Fischer and D. Veith 95
8 The cellular response to protein unfolding stress
M. Schröder 117
9 Protein secretion and associated stresses in *Aspergillus*: a genomic perspective
D. B. Archer, S. E. Barnes and T. Guillemette 140

IV Fungal bioremediation **159**
10 Metal stress and the single yeast cell: Berkeley Award Lecture
S. V. Avery 161
11 Bioluminescence-based fungal biosensors
H. J. Weitz 187
12 White-rot fungi and xenobiotics
P. J. Harvey and C. E. Scheer 205
13 Metal and mineral transformations: a mycoremediation perspective
M. Fomina and G. M. Gadd 236

V Fungal biocontrol of pests **255**
14 Fungal control of subterranean pests
H. Strasser, S. H. M. Hutwimmer and R. Zelger 257
15 Development of mycoherbicides and evaluation of potential risks (using *Stagonospora* as a model)
M. Maurhofer, D. Boss, M. O. Ahonsi and G. Défago 275
16 A novel understanding of the three-way interaction between *Trichoderma* spp., the colonized plant and fungal pathogens
S. L. Woo, M. Ruocco, R. Ciliento, P. Ambrosino, R. Marra, F. Vinale, S. Lanzuise, D. Turrà, S. Ferraioli, I. Soriente, S. Gigante, F. Scala and M. Lorito 291
17 Fungal parasites of invertebrates: multimodal biocontrol agents?
L. V. Lopez-Llorca and H.-B. Jansson 310
