additivity number, add($\mathcal{I}$), 22, 73
  for s_0, xv, 71
Agronsky, S., 97

Balcerzak, M., xii
Banach class (T_2), 5, 23
Bartoszyński, T., 11, 37, 40
Baumgartner, J., xii, xiii, xx, 12
Berarducci, A., 22
Blass, A., 34, 136
Blumberg, H., 10, 21
Boolean algebra, xiv, 12, 14
  cofinality of, 23
Borel conjecture, 22, 37
Brendle, J., xv, 73, 75
Brodskiĭ, M.L., 6
Bruckner, A.M., 97

Ceder, J., 46
Cichoń, J., xvi, 96, 114
Ciesielski, K., xii, xvi, 4, 11, 12, 15, 17, 19, 21–23, 29, 32, 34, 37, 46, 69, 73, 78, 91, 96, 110, 116, 117, 128, 136, 148
cofinality
  of an ideal, cof($\mathcal{I}$), xix, 22, 72
  of Boolean algebra, cof(B), 23
  of the null ideal, cof($\mathcal{N}$), xii–xiv, 11, 12, 19–24, 47, 73
continuous images, (A), xii, xv, xvii, 4, 28, 29, 71, 148, 150
continuum hypothesis, CH, xi, xii, xvi, 18, 22, 28, 48, 90, 95, 114–116, 126, 142, 155, 157, 160
covering
  Borel functions by "$\mathcal{C}^1$" functions, xvi, 92, 94, 106
  by disjoint compact sets, xiv, 32, 33, 93, 110
  number cov($\mathcal{A}, \mathcal{F}$), 94, 95, 105, 106, 108
  number cov($\mathcal{B}_1$, Perf($\mathbb{R}$)), 10
  number cov($\mathcal{C}^n, D^{n+1}$), 95, 107
  number cov($D^n, \mathcal{C}^n$), 95, 108
  number cov($\mathcal{I}$), xix
  number cov(Sc, $\mathcal{C}$), 96
  number cov(s_0), xvii, 72, 145
  of $\mathbb{R}^2$ by continuous functions, xii, xv, 92, 94
  Σ^1_2 sets with compact sets, 8
  ω-, 37
Covering Property Axiom, CPA, xi, xiii, xvii, 1, 133, 143–146, 154, 155, 157, 160
  $\mathrm{CPA}_{\mathrm{cube}}$, xiii, xiv, 1, 3–5, 8–12, 14–17, 21, 22, 27–30, 32, 52
  $\mathrm{CPA}^{\mathrm{game}}_{\mathrm{cube}}$, xiv, xv, 32–34, 36, 37, 39–42, 44–48, 52
  $\mathrm{CPA}^{\mathrm{game}}_{\mathrm{prism}}$, xi, xv, xvi, 51, 52, 88, 89, 93, 95, 110, 112–117, 122, 126, 128, 133, 134, 136, 138–142, 144
  $\mathrm{CPA}_{\mathrm{prism}}$, xv, 52, 69–73, 75, 77, 78, 88, 90, 92–95
  $\mathrm{CPA}^{\mathrm{sec}}_{\mathrm{cube}}$, 145, 147, 148, 152, 154
  $\mathrm{CPA}^{\mathrm{sec}}_{\mathrm{prism}}$, 144, 148
  multi-game, $\mathrm{CPA}^{\mathrm{game}}_{\mathrm{prism}}(\mathcal{X})$, xv, 88
cube
  constant, 31
  density, 2, 3, 11, 28, 29, 33, 34, 40, 46, 47, 49, 78, 80, 82, 147
  in a Polish space, xiii, xv, 2, 51, 112
  perfect, 2, 6, 15, 31, 49, 53, 63, 64, 144, 154
  subcube of a, 2, 31, 51

Darji, U., 9
Davies, R.O., 46
Dikranjan, D., 22
dominating number $\mathfrak{d}$, 20, 24

Eggleston, H.G., 6
