Technique and Application in Dental Anthropology

Bringing together a variety of today's most accomplished dental researchers, *Technique and Application in Dental Anthropology* covers a range of topics germane to the study of human and other primate teeth. The chapters encompass work on both individuals and samples, ranging from prehistoric through recent times. The focus throughout the book is the methodology required for the study of modern dental anthropology, comprising the most up-to-date scientific methods in use today – ranging from simple observation to advanced computer-based analyses – which can be utilized by the reader in their own dental research. Originating from the twentieth anniversary meeting of the Dental Anthropology Association, this is a valuable reference source for advanced undergraduate and graduate students, academic researchers, and professionals in the social and life sciences, as well as clinicians.

JOEL D. IRISH is a Professor in the Department of Anthropology at the University of Alaska Fairbanks.

GREG C. NELSON is an Adjunct Assistant Professor in the Department of Anthropology at the University of Oregon.

Contents

Contributors *page* vii
Acknowledgments xiv

Section I: Context

1 Introduction 3
Joel D. Irish and Greg C. Nelson

2 History of dental anthropology 10
G. Richard Scott and Christy G. Turner II

3 Statistical applications in dental anthropology 35
Edward F. Harris

Section II: Applications in assessing population health

4 Using perikymata to estimate the duration of growth disruptions in fossil hominin teeth: issues of methodology and interpretation 71
Debbie Guatelli-Steinberg

5 Micro spatial distributions of lead and zinc in human deciduous tooth enamel 87
Louise T. Humphrey, Teresa E. Jeffries, and M. Christopher Dean

6 The current state of dental decay 111
Simon Hillson

7 Dental caries prevalence by sex in prehistory: magnitude and meaning 136
John R. Lukacs and Linda M. Thompson

8 Dental pathology prevalence and pervasiveness at Tepe Hissar: statistical utility for investigating inter-relationships between wealth, gender, and status 178
Brian E. Hemphill

Section III: Applied life and population history

9 Charting the chronology of developing dentitions 219
Gary T. Schwartz and M. Christopher Dean

10 Dental age revisited 234
Helen M. Liversidge

11 Primate dental topographic analysis and functional morphology 253
Peter S. Ungar and Jonathan M. Bunn

12 Forensic dental anthropology: issues and guidelines 266
Christopher W. Schmidt

13 Inter- and intra-specific variation in *Pan* tooth crown morphology: implications for Neandertal taxonomy 293
Shara E. Bailey

14 The quantitative genetic analysis of primate dental variation: history of the approach and prospects for the future 317
Oliver T. Rizk, Sarah K. Amugongo, Michael C. Mahaney, and Leslea J. Hlusko

Section IV: Forefront of technique

15 Methods of ingestion and incisal designs 349
Kalpana R. Agrawal, K. Y. Ang, Zhongquan Sui, Hugh T. W. Tan, and Peter W. Lucas

16 Dental reduction in Late Pleistocene and Early Holocene hominids: alternative approaches to assessing tooth size 364
Charles M. Fitzgerald and Simon Hillson

17 Dental microwear analysis: historical perspectives and new approaches 389
Peter S. Ungar, Robert S. Scott, Jessica R. Scott, and Mark Teaford

18 Virtual dentitions: touching the hidden evidence 426
Roberto Macchiarelli, Luca Bondioli, and Arnaud Mazurier

Acknowledgments

We wish to acknowledge the expertise and efforts of the various authors who contributed chapters, and thank them for sticking with us throughout the long duration of this project – from conception to conclusion; without them this book would not have been possible, or at least it would have been considerably shorter! Thomas Moore and several anonymous reviewers of our original book proposal offered useful advice on how to improve the final product's organization and expand upon its content. Heather Edgar, Tammy Greene, Diane Hawkey, Brian Hemphill, Bob Pastor, and several article reviewers provided valuable guidance during compilation of the volume. We are grateful to our editor at Cambridge University Press (CUP), Dr. Dominic Lewis, and appreciate the hard work of the CUP support and production staff.

Finally, JDI thanks Christy G. Turner II, who fostered an already "budding" interest in teeth and dental anthropology, and his parents, Lloyd and Violet Irish, and wife, Carol, for their guidance and support. GCN thanks his wife Charissa for her love and support and daughters Sarah, Greta, and Laura for putting up with a dad who was always looking at their teeth. On the professional side GCN thanks three primary mentors (alpha order) Clark Howell, John Lukacs, and Tim White.
