Introduction: The Drake Equation in context 1
*Steven J. Dick*

1 Rate of formation of stars suitable for the development of intelligent life, R*, pre-1961 21
*David DeVorkin*

2 Rate of formation of stars suitable for the development of intelligent life, R*, 1961 to the present 38
*Patrick François and Danielle Briot*

3 Fraction of stars with planetary systems, $f_p$, pre-1961 53
*Matthew F. Dowd*

4 Fraction of stars with planetary systems, $f_p$, 1961 to the present 71
*Chris Impey*

5 Number of planets, per solar system, with an environment suitable for life, $n_e$, pre-1961 90
*Florence Raulin Cerceau*

6 Number of planets, per solar system, with an environment suitable for life, $n_e$, 1961 to the present 114
*Danielle Briot and Jean Schneider*

7 Fraction of suitable planets on which life actually appears, $f_l$, pre-1961 131
*Stephané Tirard*

8 Fraction of suitable planets on which life actually appears, $f_l$, 1961 to the present 145
*David J. Des Marais*

9 Fraction of life-bearing planets on which intelligent life emerges, $f_i$, pre-1961 163
*Michael J. Crowe*

10 Fraction of life-bearing planets on which intelligent life emerges, $f_i$, 1961 to the present 181
*Lori Marino*

11 Fraction of civilizations that develop a technology that releases detectable signs of their existence into space, $f_c$, pre-1961 205
*Florence Raulin Cerceau*

12 Fraction of civilizations that develop a technology that releases detectable signs of their existence into space, $f_c$, 1961 to the present 227
*Seth Shostak*

13 Length of time such civilizations release detectable signals into space, L, pre-1961 241
*David Dunér*

14 Length of time such civilizations release detectable signals into space, L, 1961 to the present 270
*Garry Chick*

*Afterword* 298
*Index* 312
