INDEX

Absolutely extreme form, 30
Adjoint form (adj f), 25
Automorph (S), 11

Binary form, 1

Class, 7
Coarsen, 8
Congruence class, 68
Congruentially equivalent ($\cong$), 68
Cubic form, 1

Decomposition, 8
Definite form, 4
Denominator (den R) of rational matrix, (R), 85
Diagonal coefficients, forms, 2
Discriminant (d), 2
Disjoint form, 1
Divisor of form, 4

Equivalence transformation, 5
Equivalent ($\sim$) forms, 5
Equivalent rational matrices, 84
Exceptional integers, 116
Extreme form, 30

Form (f), 1

Generic conditions, 79
Genus, 72

Hermite-reduced form, 17
Hilbert symbol $(a, b)_{\mathfrak{p}}$, 35

Indefinite form, 4
∞-adic square, zero form, 38
Integral form, 4
Invariant, 8

Leading coefficient, 2
Legendre symbol $(a \mid p)$, 33
Linear form, 1
Linear transformation, 5

Matrix (A) of quadratic form, 2
Minimal vectors, 30
Minimum (min f) of quadratic form, 13
Minkowski-reduced form, 27

n-ary form, 1
Negative form, 4
Norm (norm R) of rational matrix, 86

p-adic (quadratic) class, 33
p-adic rational invariants, 45
p-adic square, 32
p-adic zero form, 33
p-adically equivalent, 50
Parallel transformations, 14
Pellian equation, 133
Perfect form, 30
Positive form, 4
Primitive form, vector, 4
Properly (represent), 4

Quadratic form (f), 1
Quadratic non-residue, 33
Quadratic residue, 32

Rank (n), 4
Rationally related, 5
Reciprocal forms, 25
Reduced form, 14, 17, 27
Refine, 8
Reflexion (U), 11
Reflexive, 7
Represent, 4

Semi-equivalent ($\simeq$), 72
Signature (s), 4
Spinor-genus, 105
Spinor-related ($\dot{\sim}$), 104
Splits off, 9
Substitution, 5
Symmetric property, 7

Ternary form, 1
Transitive, 7

Unary form, 1

Weight ($w(R)$) of rational matrix (R), 86

Zero form, 4
