List of authors viii
Preface xiii

1 Evolution and functions of the immune system
A.J.S. Davies 1

Cellular components of the immune system

2 Lymphocyte subpopulations in the mouse
R. Scollay 32

3 Definition of lymphocyte subpopulations in man
P.C.L. Beverley 45

4 Definition of lymphocyte populations in cattle using lectins
C. Fossum 60

5 Monoclonal antibodies to bovine leucocytes define heterogenicity of target cells for *in vitro* parasitosis by *Theileria parva*
P.A. Lalor, W.I. Morrison and S.J. Black 72

6 Construction of a library of monoclonal antibodies for the analysis of the major histocompatibility gene complex and the immune system in ruminants
W.C. Davis, L.E. Perryman and T.C. McGuire 88

The major histocompatibility complex

7 The human lymphocyte antigen system
J.A. Sachs 116

8 The bovine major histocompatibility complex
R.L. Spooner 133

Edited by W. Ivan Morrison
Table of Contents
More information

9 Biochemical analysis of products of the bovine major histocompatibility complex
D. Lévy, M. Hoang-Xuan and M.T. Zilber 152

10 The role of the major histocompatibility complex in immune responses and susceptibility to disease
R.V. Blanden 168

11 The bovine major histocompatibility complex and disease resistance
T.E. Adams and M.R. Brandon 178

Structural organization and ontogeny

12 The lymphoid apparatus of the sheep and the recirculation of lymphocytes
B. Morris, N.C. Pedersen and W. Trevella 204

13 Cellular constituents and structural organization of the bovine thymus and lymph node
W.I. Morrison, P.A. Lalor, A.K. Christensen and P. Webster 220

14 Ontogeny of immune responses in cattle
B.I. Osburn 252

Cellular immune responses

15 Regulatory and effector cell interactions in immune responses
R.N. Germain 261

16 The analysis of the effects of lymphokines on cytotoxic T-cell responses
M.A. Skinner, N. Christensen and J . Marbrook 281

17 Bovine mixed leucocyte reactions and generation of cytotoxic cells
B.M. Goddeeris, P.A. Lalor and W.I. Morrison 299

18 Bovine alloreactive cytotoxic T cells
A.J. Teale, W.I. Morrison, R.L. Spooner, B.M. Goddeeris, C.M. Groocock and D.A. Stagg 322

19 Antibody-dependent cellular cytotoxicity and natural killer cell activity in cattle: mechanisms of recovery from infectious diseases
M.P. Lawman, D. Gauntlett and F. Gallery 346

Humoral immune responses

20 Structure and function of immunoglobulins: the symbiotic interplay between parasites and antibodies
R. Hamers, W. van der Loo and P. De Baetselier 373

21 Biological properties of bovine immunoglobulins and systemic antibody responses
A.J. Musoke, F.R. Rurangirwa and V.M. Nantulya 391

22 The physiology of secretory immunity
J.G. Hall 409

23 The mucosal immune system with particular reference to ruminant animals
A.K. Lascelles, K.J. Beh, T.K. Mukkur and D. L. Watson 429

Table of Contents
More information

Role of immune responses in protection against infectious diseases

24 Effector mechanisms against viral infections
L.D. Pearson and K.A. Knisley 458

25 Immunogenicity of different physical forms of viral antigenic subunits
B. Morein 478

26 Mucosal mast cells, basophils, immediate hypersensitivity reactions and protection against gastrointestinal nematodes
H.R.P. Miller 496

27 Host responses which control *Trypanosoma brucei* parasites
S.J. Black 525

28 Studies on the protection of cattle against *Babesia bovis* infection
D.F. Mahoney 539

29 Protective immune respones in bovine theileriosis
W.I. Morrison, D.L. Emery, A.J. Teale and B.M. Goddeeris 555
