INDEX

aerosols 20, 22, 31, 33, 49
air conditioning 2, 25, 46, 47, 313–20
air movement 11
air quality 1, 2
air temperature 11
allergic rhinitis 41–2
allergies
  animal-induced 186
  contact 184
  food 185
  inhalation 184
amphiboles 81
arsenic 240
asbestos 6, 78–81, 83–5, 90–4
Aspergillus fumigatus 29, 31, 39
asthma 6, 35–41, 50, 71–3, 121, 161, 167–9
atmosphere dynamics 280–2

bacteria 29–55
benzene 136
biocides 25, 26, 47, 50
birds 6, 29, 184
bonfire smoke 278
brakes 91
bronchial cancer 106
bronchitis 6, 161, 163, 164, 275
burning, as source of pollutants 277–8
byssinosis 174–8

carbon monoxide 3, 63
carbon tetrachloride 143
cardiovascular disease 227–9
castor bean dust 39
Chagas disease 32
chickenpox 48
chillers 38, 53, 54
chlorinated hydrocarbons 142
chloroform 143
chrysotile 80, 83, 84
cinnamon dust 173
clean air act 1, 6
coffee bean dust 172
common cold virus 48
cooling towers 20, 21, 47
cotton 178, 179
cotton mill dust 176–8
crop burning 277

danders 183–90
decipol 13
demolition sites 279
Dermatophagoides pteronyssinus 35, 41
dichloromethane (methylene chloride) 142
dichlorvos 151, 152
dust, *see* vegetable dusts 161–81

electromagnetic fields, sources of 267
electromagnetic radiation, extremely low frequency 263–72
  biological interactions 270, 271
  and health 268, 269
environmental monitoring 251–4
environmental tobacco smoke (ETS) 4, 68, 193–234
  carcinogens in 202–4, 221
  and cardiovascular disease 227–9
  effects on foetus 229–31
  epidemiology 208–21
  and health risk 204–7
  and lung cancer 220–221
  measurement of exposure levels 196–202
  and pulmonary function 223–5
  respiratory effects 225–7
epidemiology 4
erionite 88
ethylbenzene 137
ETS, *see* environmental tobacco smoke
extremely low frequency (ELR) electromagnetic radiation 263–72
extrinsic allergic alveolitis 29–32

fibres, *see also* mineral fibres *and* man-made mineral fibres
  as causes of disease 85–90
  in lung samples 94
fibrosis 85
filters 283, 284
flax 179

Index
More information

flour dust 170, 171
fog, pea soup 1
formaldehyde 4, 117–27
  carcinogenicity 122–4
  control of 124
  effects on health 120–4
  exposure levels 118, 119
  ocular toxicity 121
  regulatory aspects 126–7
  risk assessment 124–6
  skin toxicity 121
  uptake 119, 120
fungi 29–55

gas-burning appliances 63, 69–73, 119
glycol esters 147
grain dust 170, 171

hay fever 184
hemp 179
n-hexane 139
hot water systems 20
house dust mite 7, 35, 41
humidifier fever 32–5
humidifiers 38, 53, 54
humidity 11
hyperchlorination, to control Legionnaires' disease 22
hypersensitivity pneumonitis 164–6

incinerators 278
indoor plants 43
industrial environments 239–60
  control of pollutants 257–60
  and safety 260
infections, transmission of 48–50

jute 180

laboratory animals, allergic reactions to 186–90
Legionella 19–26
  control of 24, 25, 26
  design considerations 24, 25, 26
Legionella feeleii 21
Legionella micdadei 23
Legionella pneumophila 19, 21, 315
Legionellosis 3
Legionnaires' disease 3, 19–26
local exhaust ventilation LEV 258, 259
lung cancer 4, 5, 6, 85, 95, 106–8, 210–13, 220, 221

man-made mineral fibres (MMMF) 82–3, 85, 94, 256
maximum exposure limits 248
mean radiant temperature (mrt) 11
measles 48
mesothelioma 6, 85, 87, 88, 95
methyl n-butyl ketone (2-hexanone) 142
methyl n-ethyl ketone (2-butanone) 141
methylene chloride 257
microorganisms 29–55
  control of 53, 54
mineral fibres 77–96, 255

nitrogen, measurement of exposure 68, 69
  mechanism of toxicity 67, 68
  oxides of 63–74
  and respiratory disease 69–73
  toxicity of 64–7
nitrogen monoxide 3
nuisance threshold level 13

occupational disease 4, 166–80, 241
occupational exposure limits (OELs) 248
occupational hygiene 242
olf 13
olfactory effects 12
organic dust toxic syndrome 174
outdoor air quality 276
ozone 281, 282

paint spraying 279, 280
para-dichlorobenzene 152, 153
pesticides 149, 150–3, 257
petrol 145, 146, 256, 280
phenol 257
photocopiers 43
pneumonia 19, *see also* Legionella
pollen 173
polychlorinated biphenyls (PCB) 153, 154
pontiac fever 19, 21, 23, *see also* Legionella
power lines 267–69
prescribed disease 239
psycho-organic syndrome 147

Radon 4, 99–114
  control of 108–11
  effects on health 106–8
  exposure levels 99–104
  risk management 111
  uptake 104, 105
relative humidity 11
rhinitis 41, 42
rice dust 171, 172
risk assessment 51, 52
room air movement 292, 293

More information

short term exposure limit (STEL) 248
sick building syndrome 42–7, 133
sisal 179
smallpox 48
smog 275
solvent abuse 141, 146
solvent-induced pre-senile dementia 147
solvents 132–54
  long-term effects of 147–50
soya bean dust 39
styrene 128
sulphur dioxide 6

tea dust 172
temperature 11
tetrachloroethylene 143, 144
thermal environment 9–12
threshold limit value 134
tobacco dust 173
tobacco smoke, *see also* environmental tobacco smoke 63, 64, 66
toluene 138
1,1,1-trichloroethane 144
trichloroethylene 144, 145
tuberculosis 49

urea-formaldehyde foam insulation (UFFI) 117, 118

vegetable dusts 161–81
  control and prevention 180, 181
  and respiratory disease 163–9
ventilation 283, 287–324
  air conditioning 313–20
  buoyancy assisted room air diffusion 299–308
  carbon dioxide 289
  draught 296, 297
  efficiency of 297, 298
  and environmental tobacco smoke 290
  full fresh air systems 309
  minimum ventilation rates 289
  odour control 290
  room air diffusion design 294
  room air movement 292, 293
  stack effect 311
  vortex assisted room air diffusion 308
  wind effect 312
virus infections 48
visual display unit (VDU) 265
volatile organic compounds (VOCs) 15, 16

waste disposal 278
water droplets 20
water systems 24–6
white spirit 146, 147
wood dusts 169, 170

xylene 139
