Contents

List of contributors vii

1 Introduction 1
Richard Dybowski and Vanya Gant

Part I Applications 29

2 Artificial neural networks in laboratory medicine 31
Simon S. Cross

3 Using artificial neural networks to screen cervical smears: how new technology enhances health care 81
Mathilde E. Boon and Lambrecht P. Kok

4 Neural network analysis of sleep disorders 90
Lionel Tarassenko, Mayela Zamora and James Pardey

5 Artificial neural networks for neonatal intensive care 102
Emma A. Braithwaite, Jimmy Dripps, Andrew J. Lyon and Alan Murray

6 Artificial neural networks in urology: applications, feature extraction and user implementations 120
Craig S. Niederberger and Richard M. Golden

7 Artificial neural networks as a tool for whole organism fingerprinting in bacterial taxonomy 143
Royston Goodacre

Part II Prospects 173

8 Recent advances in EEG signal analysis and classification 175
Charles W. Anderson and David A. Peterson

978-0-521-66271-0 — Clinical Applications of Artificial Neural Networks
Edited by Richard Dybowski , Vanya Gant
Table of Contents
More Information

9 Adaptive resonance theory: a foundation for 'apprentice' systems in clinical decision support? 192
Robert F. Harrison, Simon S. Cross, R. Lee Kennedy, Chee Peng Lim and Joseph Downs

10 Evolving artificial neural networks 223
V. William Porto and David B. Fogel

Part III Theory 235

11 Neural networks as statistical methods in survival analysis 237
Brian D. Ripley and Ruth M. Ripley

12 A review of techniques for extracting rules from trained artificial neural networks 256
Robert Andrews, Alan B. Tickle and Joachim Diederich

13 Confidence intervals and prediction intervals for feedforward neural networks 298
Richard Dybowski and Stephen J. Roberts

Part IV Ethics and clinical prospects 327

14 Artificial neural networks: practical considerations for clinical application 329
Vanya Gant, Susan Rodway and Jeremy Wyatt

Index 357
