Advanced Proton Source, 54
Al-transition metal alloys
  solidification, 105
Al clusters, 105
Al_2O_3
  conductivity, 162
  diffusion, 174
  dynamics, 169
  emissivity, 163
  kinematic viscosity, 173
  optical properties, 162
  physical properties, 165
  shear viscosity, 173, 174
  solidification, 169, 175
  sound velocity, 171
  structure, 165
Al_2O_3-SiO_2, 202
Al_2O_3-Y_2O_3-La_2O_3, 190
Al_2O_3-Y_2O_3-La_2O_3-SiO_2, 190
Al–Co
  structure, 113
Al–Co–Fe
  structure, 114
Al–Cu
  structure, 117
Al–Cu–Co
  solidification, 117
  structure, 118
Al–Cu–Fe
  solidification, 117
Al–Fe
  structure, 106, 113, 117
Al–Mn
  icosahedral short-range order, 110
  magnetization, 109
  structure, 109, 110
Al–Ni
  diffusion, 118
  icosahedral short-range order, 112
  structure, 110, 116
Al–Pd–Mn
  magnetization, 109
  structure, 109
Al–Ti
  stucture, 106
Argonne National Laboratory (ANL), ix
Ashcroft–Langreth definition, 56

B
  compounds, 161
  conductivity, 155
  dynamics, 158
  emissivity, 155
  liquid–liquid transition, 158
  longitudinal viscosity, 160
  physical properties, 156
  structure, 156
$BaAl_2O_4$, 201
BaO-Al_2O_3, 201
BaO-Al_2O_3-TiO_2, 201
Bernouilli effect, 7
Bhatia–Thornton definition, 45
Bragg peaks, 44

C, 205
CaO-Al_2O_3
  cooling curve, 70, 200
  dynamic crossover, 199
  glass transition, 197
  relaxation, 193
  structure, 193, 195
CaO–Al_2O_3–SiO_2, 202
Casimir force, 21
Centre de Recherche sur les Matériauxà Hautes Températures (CRMHT), 6
charging, 17
chemical scale, 179
Commission Énergie Atomique, Grenoble, 20
compressibility, 44
conductivity
  electric, 28, 31
  optical, 37
  thermal, 41
Containerless Research Inc. (CRI), 4
coordination number, 46

  conductivity, 124
  hypercooling, 126
  magnetic structure, 123
  magnetic susceptibility, 120
  magnetization, 120
  physical properties, 124
  specific heat, 125
  solidification, 129
  structure, 126
correlation function, 45
crystalline material, 44
crystallization front, 26

de Gennes narrowing, 58
dense random packing limit, 108
density, 37
density fluctuations, 83
Density Functional Theory, 63
Deutsche Forschungsanstalt für Luft- und Raumfahrt (DLR), 10
dielectric function, 37
differential cross section, 43
  double, 55
  macroscopic, 48
diffraction, 42
  neutron, 43
    isotope substitution in the case of, 46
  X-ray, 44
drop tubes, 20, 68
Drude theory, 134
dynamics, 53

Earnshaw's theorem, 12
elastic scattering, 58
electrical conductivity, 33
electrodynamics, 8
electromagnetic properties, 28
electrostatic field, 16
emissivity
  spectral, 25, 37
  total hemispherical, 40, 41
  enthalpy of fusion, 68
entropy fluctuations, 83
European Synchrotron Radiation Facility, 54

Faber–Ziman definition, 45
Faraday balance, 33
Fe
  optical properties, 87
Fe–B, 161
Fe–Ni
  solidification, 93
form factor, atomic, 44
Frank–Kaspar phases, 80, 89
free-fall experiments, 20
free-electron laser sources, 205

Ge
  amorphous–amorphous transition, 154
  conductivity, 152
  liquid–liquid transition, 154
  physical properties, 152
  solidification, 155
  structure, 153
generalized hydrodynamics, 81
glass transition, 69
glasses, 44
Gor'kov equation, 19
Graz University of Technology, 25
Guinier approximation, 49

heat of fusion, 40
heating
  electromagnetic, 23
  laser, 23
  resistive pulse, 24
hydrodynamic regime, 58
  generalized, 58
hypercooling, 68
  limit, 41, 68

icosahedral short-range order (ISRO), 76
induction motor, 33
inelastic scattering, 53
  neutron (INS), 53
    one-phonon, 57
  X-ray (IXS), 54
Institut Laue-Langevin, 47
Institute for Materials Research, Tohoku University, 11
interaction
  chemical shift, 62
  direct dipole, 61

Japan Microgravity Centre, 137
Jet Propulsion Laboratory (JPL), 16

Kirchhoff's law, 36

levitation
  acoustic, 18
  aerodynamic, 4
  conical nozzle, 4
  electromagnetic, 9
  electrostatic, 16
  gas film, 19
  magnetic, 7, 11
  optical, 19
  quantum, 21
  superconducting, 13
Levitron, 3, 12
light scattering, 58
liquid–glass transition, 69
liquid–liquid transition, 70
liquids
  structure, 44
  dynamics, 58
Local Density Approximations, 63
Lorentz force, 9, 13

magnetic force, 11
magnetic inhomogeneities, 51
magnetic moment, 46
