AA (acquaintance-appearance) relation, 19
abelian integers, 168, 172
ability hypothesis, 56, 73
Acquaintance theory, 9, 19–25, 28–29, 51, 56, 244
action outcomes, 151
afterimages, 113–116
Akins, Kathleen, 257
animals, 93, 98, 182–183, 185–187, 199–200
Aristotle, 57, 202
Armstrong, David, 76, 124
Armstrong, Louis, 249
assertoric force, 35
attention schema theory (AST), 184, 185, 260
automorphisms, 169–172
Avery, Robert, 241

Berger, Jacob, 123, 127, 129, 144, 155, 256–257
Berkeley, George, 25, 63
Black, Max, 172
blindsight, 95–96, 104–105, 120, 125, 144, 249, 268
Block, Ned, 120, 139, 167, 190
  color perception, 263
  conscious overflow, 264–265
  consciousness and perception, 15
  on afterimages, 113–114
  on consciousness, 16
  on higher-order theory, 194–195, 203
  on mental qualities, 110
  on mental reality, 249
  on perception, 18, 101, 120
  phenomenal consciousness, 256
Brown, Richard, 251
Byrne, Alex, 78–79, 135, 140, 257, 260

Chalmers, David J., 54, 57, 60, 125–126, 129–130
change blindness, 262
chromatic sensorium, 64
Chudnoff, Elijah, 23
Churchland, Paul, 55, 56, 58, 60
Clark, Austen, 65, 123, 149, 159, 236, 255, 258
Cleeremans, Axel, 267
cognition, 15, 18, 20–21, 24, 25
Cognitive Sciences, 19, 181, 184
cold control theory, 230, 233, 236–237
Coleman, Sam, 56
color, 20–22, 56–62, 63, 73–74, 111–117, 153–155, 160, 161, 173–176
  ability hypothesis, 73
  afterimages, 113–116
  as mental quality, 110, 119, 123
  as phenomenal concept, 49, 57–61
  as secondary quality, 21
  blindness, 52
  conscious experience and, 120
  counterparts, 110
  differentiation, 63, 64, 68–70, 102, 111
  double-meaning theory, 111
  functional role, 175
  hyponsis and, 234
  inversion, 160–161, 165, 174–175
  knowledge by acquaintance, 56, 71
  mixing, 169
  naive realism, 214
  objective existence of, 63
  p-colors, 63, 64
  perceptual complexity, 50
  qualia and, 56, 61, 73, 139, 160
  quality space of, 66, 69, 103, 133, 145, 149, 169
  representationalist accounts, 14, 18, 130
  spatial differentiation and, 156
color vision, 49, 57, 59, 64, 74–75
complex numbers, 172–173
computational-representational (CR) theory of mind, 14, 21
Computational-Representational theory of mind, 14
conceptual content, 35, 134–137, 146
conceptual-role semantics (CRS), 134
confidence, 91–92, 94–101, 105, 268–269
confidence ratings, 91–93, 95, 97–100, 105
