Pediatric Surgery and Urology

Long-Term Outcomes

The new edition of this highly regarded book provides a unique clinical reference for all pediatric surgeons. It analyzes and updates what is known about long-term outcomes in pediatric surgery and urology. Completely revised and updated with new chapters on gonadal tumours, urolithiasis, small bowel transplantation, pancreatitis, breast disorders and a completely new section on trauma.

An understanding of long-term outcomes is critical if individual surgeons and health policy makers are to achieve optimum results in current clinical practice. The editors have succeeded in bringing together critical reviews written by leading international experts in pediatric surgery and urology.

This is an essential reference source for pediatric surgeons and urologists, pediatricians, adult specialists, and others dealing with the sequelae of childhood surgical problems.

Features

- A unique source of information on long term outcomes in pediatric surgery and urology
- Written by leading experts from around the world
- Extensive coverage of surgery in children including general, urological, transplantation, and trauma

About the authors

Professor Mark D Stringer is Professor of Paediatric Surgery and Consultant Paediatric Hepatobiliary/Transplant Surgeon at St. James’s University Hospital, Leeds, UK. He graduated from Guy’s Hospital Medical School and trained at the Hospital for Sick Children, Great Ormond Street, and at King’s College Hospital in London.

Keith T Oldham MD is Professor and Chief of the Division of Pediatric Surgery, Medical College of Wisconsin and the Marie Z. Uihlein Chairman and Surgeon-in-Chief for Children’s Hospital of Wisconsin, USA. He trained at the University of Washington in Seattle and Children’s Hospital Medical Center in Cincinnati, Ohio.

Professor Pierre D E Mouriquand is Professor of Pediatric Urology at the Debrousses Hospital, Claude Bernard University, Lyon 1, France. He is a former Consultant and Honorary Senior Lecturer in Paediatric Urology at Great Ormond Street Hospital, London.
Provides a multidisciplinary overview of developmental anomalies, disorders and intersex conditions. Contributions from leading international experts from a wide range of disciplines provide the best possible advice and practical recommendations for medical intervention. Issues such as the psychological well-being of the patient, the need for informed consent and the right to know one's diagnosis are also discussed.

Contents:
Part I. Normal Development;
