Cambridge Bibles

How to use this catalogue

Cambridge publishes Bibles and Prayer Books in a number of versions and translations and in a great many styles and bindings. In order to make it easier to identify the Bible or Prayer Book which best suits the customer's needs, this catalogue is primarily organised by version, and then by edition.

Features common to all styles in an edition are clearly identified at the beginning of each description. Those features which are particular to individual styles of Bible or Prayer Book are listed in the columns at the edge of each page. Also included here are the code (see details on page 38), colour, ISBN (International Standard Book Number) and price. Text samples (reproduced to actual size) are included for many editions, to give an accurate representation of clarity and readability.

This is one of our most popular Bibles, combining contemporary style with a handy size and useful study aids. It comes in a choice of binding styles and colours.

Inside are translators' notes, maps to give context to the people, places and events of the Bible – and over 50,000 cross-references.

It is printed on Bible paper with gilt edges and bound in a choice of fine leathers and colours.

- more than 50,000 centre-column references
- popular modern translation
- available in a choice of colours and binding styles

Also available with Zip fastener

Bibles with covers secured by zip fasteners (originally a Cambridge innovation) are becoming increasingly uncommon. The zipped binding protects the delicate pages and makes this compact Bible even more portable than before.

Cambridge offers here a unique Bible – the popular NIV translation printed on pre-punched pages. The pages are trimmed (wider, but shorter, than A4) so that readers can interleave the text with their own off-the-shelf paper, tabs and reference materials to produce a unique Bible study aid. Pre-punched with the standard two holes, the Bible pages can be organised in one or more of the reader’s own A4 ring-binders for ultimate adaptability.

Jesus Anointed at Bethany

12 Six days before the Passover, Jesus arrived at Bethany, where Lazarus lived, whom Jesus had raised from the dead. ²Here a dinner was given in Jesus' honor. Martha served, while Lazarus was among those reclining at the table with him. ³Then Mary took about a pint^a of pure nard, an expensive per-

Jesus and putting them in his hair.

The Triumphal Entry

¹²The next day the crowd that had come for the Feast heard that Jesus was on his way to Jerusalem. ¹³They took palm branches and went out to meet him, shouting,

"Hosanna!"

An innovative edition for those who want to read the whole Bible in a systematic way. The readings are arranged in short passages from both the Old and New Testaments. Each day's readings take only 5–10 minutes, so that the whole Bible can be read in two years. As the readings are numbered rather than dated, readers can start at any point in the year and proceed at their own pace.

- start on any day of the year
- readings interspersed with Psalms and Proverbs to provide variety

King James Version / Revised Version

The Revised Version was produced in the nineteenth century by British and American scholars. It was the first real revision of the Authorized Version (or King James Version) and the basis for the American Standard Version. It draws on manuscripts discovered in the nineteenth century and incorporates the improved understanding of Hebrew and Greek which came from them.

The King James or 'Authorized' Version was commissioned when James 1 became King of England. It was first published in 1611 and attained a unique authority, gradually superseding all previous versions. The first Cambridge printing was in 1629, establishing a tradition of care for the accuracy of the text that has been maintained to this day. The KJV is a classic of the English language and remains a very widely accepted and revered translation.

Cambridge's Pitt Bibles were originally launched in the 1930s, in the wake of the typographic revival which took place in England after the First World War. They were notable for their slimness – achieved by using a typeface specially cut by the famous *Times* typographer Stanley Morison for Cambridge University Press.

The Pitt Minion Reference Edition was also the first Bible to employ the innovative Cambridge bold-figure cross-reference system. All in all, it is a neat and elegant book, easy to slip into a pocket or handbag.

Cambridge Bibles

Cambridge University Press has been publishing the Bible since 1591. Cambridge Bibles continue to be of the highest quality, created by craftsmen and women using traditional methods and materials.

The Cambridge Guarantee

Cambridge Bibles are unconditionally guaranteed for life against defective materials or workmanship of any kind. Each Cambridge Bible has been made with skill and care from the best and most appropriate materials. Treated with reasonable care and respect as befits a well-made and valuable article, it will give years of use.

The cover material used in the binding of fine Bibles is a natural product, and many of the binding processes still require craft techniques and skills, so making each leather Bible unique. However, if any customer has reason to believe that a Bible suffers from defects in materials or workmanship and that its condition is not the result of normal use or damage after purchase, they should return it to the place where it was purchased. We will arrange to inspect it and, if a replacement is warranted, we will provide one free of charge.

The World's Best Leather Bibles

Cambridge University Press is committed to the finest printing and binding. We have our own Printing House in Cambridge which is unique in being able to trace its history back to the very beginnings of printing with moveable type. Its sheet-fed process produces the very best Bible pages. In our dedicated Craft Bindery, each volume is treated with the same attention to craftsmanship as was our first Bible in 1591. A hallmark of Cambridge quality is the care taken in choosing the finest leathers from around the world. Each hide is scrutinised and, if accepted, is then cut to size for making the leather cases for the Bible pages. Cambridge uses a range of leathers, with different grains appropriate to the size of the Bible (see page 40).

Care and Handling

Leather, unlike many modern materials, will maintain its attractiveness if you follow a few simple guidelines. Keep the Bible away from sources of extreme heat and from water. Use a slightly damp cloth to clean it but please do not use any detergents or packaged Bible cleaning products. The best preservative for leather bindings is a natural substance – the oils transferred from your hands. The more you handle the Bible, the more quickly it will become supple to the touch.

The combination of very thin paper and a generous layer of gilding means that sometimes the pages stick together until they are separated for the first time. If this happens, hold the pages between your thumb and index finger and rub them together with just enough pressure as is necessary to release the pages.

Cambridge Bible Codes

Cambridge Bible codes comprise a number of elements representing different Bible features.

Stitching

The stitching used to sew the pages together is tough but thin, so open the pages carefully at first to allow the threads to settle. Incidentally, when you open a Cambridge Bible, you may see an extra row of stitching along the inner edge of some of the pages. This is evidence of the extra step our binder takes to secure the pages against strain. This extra stitching is added to the first and last sections of the larger Cambridge Bibles to protect the most vulnerable pages.

Ribbon markers

Ribbon markers allow you to keep your place while looking up cross-references and to mark a particular passage to which you want to return. If the Bible is one of our larger volumes, it may have two ribbons – so you can keep your place in both the Old and the New Testaments at the same time. At Cambridge we take special care in choosing ribbon markers. Strong ribbons of appropriate breadth for the size of each Bible are selected, so that they will not curl up, become thread-like and, in extreme cases, cut through the thin Bible pages. A generous length is specified, too, so that the ribbons do not get lost within the pages.

Paper

Because of their length, Bibles traditionally have been printed on thin paper to ensure compact volumes. Cambridge Bibles are printed on paper much thinner and finer than ordinary book paper – yet also strong and opaque, so that 'show-through' from one page to another is minimised. Our paper buyers carefully choose the kind of paper best suited to each Bible type and size. They balance considerations of strength, thinness and opacity, and use only papers that meet the highest environmental standards.

Note-taking

The wide variety of pens and markers available nowadays makes it impossible to give an unconditional guarantee that notes written on the Bible pages will not smudge or bleed through over time. If using pens or markers, we suggest that you take care in the choice of writing implement and the pressure that is applied.

Head and tail bands

All Cambridge Bibles have the traditional 'head and tail' bands which were once used to help people take the books down from densely stocked shelves. Nowadays, they are added as a decorative item and the colours are chosen to complement the shade of leather and gilding used in the binding.

Gilt edges and blocking

Many Cambridge Bibles and Prayer Books are decorated with metallic gold and silver on their covers and on the edges of their paper. The material that is used in this process gives a rich, bright and attractive finish to the book. However, care must be taken to protect the Bible or Prayer Book, as the metallic foil may peel when exposed to moisture.

Glossary

Features

Apocryphal/ Deuterocanonical books

An influential group of ancient writings studied as aids and additions to the accepted canon of Scripture.

Art-gilt edges

A decorative finish to the page edges in which a red dye and gilt foil combine to add richness and lustre to the finished volume.

Bible paper

Thicker than India paper, but still much thinner than common book papers.

Book-wove paper

Term used to indicate a non-lightweight paper.

Button snap

A style of binding in which the back cover is extended in a flap to fold around the fore-edge, snapping shut to protect the gilt page edges.

Coloured edges

A decorative technique by which the page edges of a hardback book are tinted to reflect the colour of the binding.

Concordance

An alphabetical list of words used for locating a Bible verse or identifying related material. It catalogues the places in the text where particular words may be found, with their chapter and verse.

Cross-references

A system by which verses which have a similar wording or theme are linked throughout the Bible. They may be located in the centre of the page or at the margin.

Dictionary

Short histories of biblical characters, as well as explanations of terms and background information, usually presented in alphabetical order.

Family record

A decorated page bound into a Bible or prayer book on which the owner can record births, deaths, marriages and other significant family events.

Gilt edges

A decorative finishing style in which a gold-coloured metallic foil is applied to the edges of the pages after they have been cut and rubbed smooth. Silver foil is often applied to the page edges of volumes bound in white.

See also art-gilt edges.

Gilt line

A plain gold line or 'frame' on the inside covers.

Leathers

Goatskin

A beautiful and very durable top-quality leather. Rugged yet flexible, it is used for the finest bindings. Traditionally known as 'Morocco' leather.

Calfskin leather

A traditional high-quality leather used in fine bindings. It is long-lasting, and its suppleness increases with use. Cambridge Calfskin bindings use only top-grain leather.

Berkshire leather

This leather is pigskin – the material most commonly used by publishers when 'genuine leather' is the description used.

French Morocco leather

Cambridge uses this term for leather taken from a split calfskin, slightly thinner than other grades and therefore flexible and soft even when new. A French Morocco binding offers real leather at an economical price.

Bonded leather

Cambridge uses only bonded leather which is made from 100% real leather fibres, reconstituted with a strong resin bonding. That is simply the best quality bonded leather available – supple, handsome, durable, and with many of the attractive characteristics of full leather.

Imitation leather

An inexpensive material that has a good resemblance to real leather. It is tough and easily cleaned.

Most Cambridge leather-bound Bibles have flexible covers. Some of the larger Bibles – those described as 'over boards' – have a sturdy non-flexible binding.

India paper

The paper traditionally used for the best quality Bibles. The name is now generally used for papers that weigh less than 30 grammes per square metre ('20lb' paper in the USA.)

Presentation page

A decorated page bound into a Bible or prayer book on which may be inscribed the name of the giver of the book, the name of the recipient and the date of the gift.

Pronunciation marks

A phonetic system indicating how names should be pronounced, showing the vowel sounds and stressed syllables, as in a dictionary. These volumes are sometimes called 'self-pronouncing'.

1 **A** husband's, a mighty man of wealth, of the family of **E**-lim'-**ē**-lēch; and his name was Boaz.

Red-letter Edition

A Bible in which the words of Christ are printed in red, a practice introduced in 1899 by the American publisher Dr Louis Klopsch.

Reference Edition

A Bible that includes cross-references to guide the reader to other parts of the Bible where similar subjects are treated. Footnotes give variant readings of the text. Reference editions often include a concordance, maps and other study material.

Text Edition

A Bible in which the text only is provided, without cross-references.

Thumb index

Thumb-index editions have semi-circular cuts made by hand in the outer margins of the pages. The abbreviated names of the books of the Bible are stamped on small tabs, which are firmly glued on to the first page of the individual books, to enable the reader to find the page quickly.

Zip fastener

A zip sewn into the edge of the cover that may be closed to protect the gilt edges.
