Our inspection copy policy
In the UK, Australia and New Zealand books are sent out for a maximum of 28 days, after which they must be returned or paid for if they are not adopted for a course of 12 or more students. Outside the UK, Australia and New Zealand, inspection copies are sent as desk copies free of charge. Not all titles are available for inspection in all countries. Lecturers must complete and return the Reply Slip enclosed with each book. Books not yet published will be sent in the month of publication.

Purchasing Copies
Should you wish to purchase copies of this book, you can do so online via our website at [www.cambridge.org/order](http://www.cambridge.org/order) or by phone +44 (0) 1223 326050, fax +44 (0) 1223 326111, or email directcustserve@cambridge.org. When ordering, please quote the catalogue code.

Cambridge Textbooks... all your students need to know
An Introduction to Ordinary Differential Equations

James C. Robinson, Warwick University

This refreshing, introductory textbook covers standard techniques for solving ODEs, and introduces students to qualitative methods such as phase-plane analysis. The presentation is concise and informal, but rigorous. A graphical approach to the equations and their solutions is encouraged, and so the book is highly illustrated; MATLAB files to produce the figures are provided on the website. Numerous worked examples provide motivation for and illustration of key ideas and show how to turn theory to practice.
