The Dynamics of Socio-Economic Development

Adam Szirmai
Technische Universiteit Eindhoven, Holland

Advance praise:
“This monumental study is historically grounded, balanced, nuanced, rigorous, eclectic, and reader-friendly. All serious scholars and practitioners of economic development will want to have a copy on their shelves. The volume is ideally suited as a text for a development economics course.”

Hal Hill, H.W. Arndt Professor of Southeast Asian Economies, Australian National University

‘Now in a new Cambridge University Press edition, the Szirmai text offers a scholarly and comprehensive treatment of development economics that is accessible to a wide range of social science and development studies students. Its treatment of health issues, education policy, and rural development, along with its comprehensive data tables, are unsurpassed in the development economics field.’

Kenneth A. Reinert, Associate Professor of Public Policy, George Mason University

Comprehensive, non-technical introduction to development
Annotated further reading lists at end of each chapter guide students through key debates
Draws on unique comparative data set from twenty-nine developing countries
Companion website (www.dynamicsofdevelopment.com) allows students to work with data themselves and contains extra resources for instructor and student

The Dynamics of Socio-Economic Development

Adam Szirmai
Technische Universiteit Eindhoven, Holland

Why are poor countries poor and rich countries rich? How are wealth and poverty related to changes in nutrition, health, life expectancy, education, population growth and politics? This modern, non-technical introduction to development economics takes a quantitative and comparative approach to contemporary debates, examining historical, institutional, demographic, sociological, political, cultural and ecological factors. Chapters contain comparative statistics from twenty-nine developing countries. Assuming no prior knowledge of economics the book is suited for use in inter-disciplinary development studies programmes and economics courses, and will interest practitioners pursuing careers in developing countries.

Contents

1. Developing countries and the concept of development;
2. Development of the international economic order, 1450–2000;
