The Birth of the Palestinian Refugee Problem Revisited

Benny Morris

Benny Morris' *The Birth of the Palestinian Refugee Problem* was published in 1988. Its startling revelations about how and why 700,000 Palestinians left their homes and became refugees during the Arab-Israeli war in 1948 undermined traditional interpretations as to whether they left voluntarily or were expelled as part of a systematic plan. This book represents a revised edition of the earlier work, compiled on the basis of newly-opened Israeli military archives. While the focus remains the 1948 war and the analysis of the Palestinian exodus, the new material contains more information about what happened in Jerusalem, Jaffa and Haifa, and how events there led to the collapse of Palestinian urban society. It also sheds light on the battles and atrocities that resulted in the disintegration of rural communities. The story is a harrowing one. The refugees now number four million and their existence remains a major obstacle to peace.

A. J. Racy is well known as a scholar of ethnomusicology. In this pioneering book, he provides an intimate portrayal of the Arab musical experience. The focus is tarab, a multifaceted concept that has no exact equivalent in English and refers to the indigenous music and the ecstasy associated with it. The book examines aspects of musical craft, including the basic skills, the musician's inspiration, love lyrics as tools of ecstasy, and the relationship between performers and listeners. Lucidly written, it will engage the general reader as well as the specialist.

An Introduction to Islam is a wide-ranging account of the history and theology of one of the world’s most dynamic religions. For this revised and updated Second Edition, David Waines has added a long section tackling head-on the issues arising from Islam’s place in the changing world order at the turn of the new millennium.

‘Reviewers do not always agree with writers of blurbs, but in this case the reviewer must … the book really is essential reading for all those interested in Islamic history and culture.’

A History of Islamic Societies

Second edition

Ira M. Lapidus
University of California, Berkeley

In the second edition of this classic work, Ira Lapidus explores the origins and evolution of Muslim societies. The book, which has been completely updated, is divided into three parts. The first covers the formative era. The second traces the diffusion of Islamic societies worldwide, while the third explores their reaction to imperialism, and emergence as states. The concluding chapters consider Islam’s recent history, the formation of Islamic revival movements and global Islamic identities. The book is essential reading for students and for those seeking to understand the Muslim peoples.

‘… Lapidus is concerned not with defining an essential Islam, but rather with mapping the role of Islamic beliefs, institutions, and identities in particular historical contexts.’

*An Introduction*

**Michael Cook**
Princeton University, New Jersey

This book represents an abridgement of Michael Cook’s magisterial study that reflected upon the Islamic injunction to forbid wrongdoing. Using stories from Islamic sources for his argument, Cook unravels the complexities of the subject. The book educates and entertains, but at its heart is an important message about Islam and its values.

It was as rulers that Muslims encountered other religious communities during much of their history. Under such circumstances they dictated the nature of that relationship, which they did in accordance with their particular beliefs. In his book, Yohanan Friedmann uses the Quran and classical Muslim sources to explain their ideas. While attitudes were usually tolerant, he demonstrates that coercion was employed on occasions against marginal elements. Friedmann’s erudite study sheds light not only on medieval attitudes to interfaith relations, but also on the approach of some radical Islamic movements today.

Shawkani espoused a socio-religious order which echoed aspects of Western thinking, it was indigenous to Islamic thought. Shawkani’s ideas remain central to the intellectual debates taking place in Islam today.

Revival and Reform in Islam
The Legacy of Muhammad al-Shawkani
Bernard Haykel
New York University

Revival and Reform in Islam is both an intellectual biography of Muhammad al-Shawkani, one of the founding fathers of modern reformism, and a study of an important transitional period in Yemeni history which saw the shift from traditional Shiism to Sunni reformism. This transition propelled political, religious and social change. The book demonstrates that, while

**Emperor and Priest**
The Imperial Office in Byzantium

Gilbert Dagron
Collège de France, Paris

This is a revised and translated edition of Gilbert Dagron’s *Empereur et prêtre*, an acknowledged masterwork by one of the great Byzantine scholars of our time. The figure of the Byzantine emperor, a ruler who sometimes was also designated a priest, has long fascinated the western imagination. This book studies in detail the imperial union of ‘two powers’, temporal and spiritual, against a wide background of relations between church and state and religious and political spheres. Presenting much unfamiliar material in complex, brilliant style, it is aimed at all historians concerned with royal and ecclesiastical sources of power.

‘… This is a very significant book for Byzantine specialists … Indeed, no one interested in the varieties of earthly sovereignty should be unaware of it.’

Ottoman Empire

The Ottoman Empire and Early Modern Europe
Daniel Goffman
Ball State University, Indiana

This lucid and accessible book examines Ottoman relations with Europe in Early Modern times. The Ottoman Empire has consistently been regarded a place apart, divided from the West by culture and religion. This new study argues the Ottoman Empire slowly became part of Europe physically, institutionally and psychologically as well.

‘His typically rich and thought-provoking book will be vital reading for all those interested in enriching and bolstering constructive dialogue between Islam and the West.’

Ilan Pappe writes the story of Palestine, a land inhabited by two peoples. It begins with the Ottomans and traces Palestine’s history to the present day. While these events provide the background and explain the construction of Zionist and Palestinian nationalism, at center stage are the men, women and children who lived through these times. It is a story of coexistence, as well as oppression, occupation, and exile. Ilan Pappe’s account is lucid and typically forthright. It is a unique contribution to the history of this troubled land.

Philip Robins’ survey of Jordan’s political history begins in the early 1920s, continues through the years of the British Mandate, and traces events over the next half-century to the present day. Throughout the period, the country’s fortunes were closely identified with its head of state, King Hussein, until his death in 1999. In the early days, as the author testifies, the King’s prospects were often regarded as grim. However, both King and country survived a variety of existential challenges, from assassination attempts and internal subversion, to a civil war with the Palestine Liberation Organisation and, in the 1970s and 1980s, it emerged as an apparently stable and prosperous state. However, King Hussein’s death, the succession of his son, Abdullah II, and recent political upheavals have plunged the country...
back into uncertainty. This is an incisive account, compellingly told, about one of the leading players in the Middle East.

A History of Saudi Arabia
Madawi al-Rasheed
University of London

'Madawi al-Rasheed’s critical reinterpretation of Saudi Arabian history is not only timely, it is provocative. It is informed by both excellent scholarship and a familiarity with the subject that comes from knowing it from the inside. Both sympathizers with and critics of the country will find their stereotypes of the Saudi reality challenged.'

F. Gregory Gause, III,
University of Vermont

'Madawi Al-Rasheed’s book, just hot from the printing press, is most welcome because it contributes to the fulfilment of the critical need for scholarly works on Saudi Arabia. … This book is eminently readable, well researched and, in important parts, original. Al-Rasheed’s points are argued cogently and her interpretation of Saudi history, which challenges conventional wisdom with new perspectives, will keep the reader’s mind continually alive.'

The Middle East has changed clearly, substantially, and dramatically during the last decade. This book explains why the previous era came to end. Three interlinked themes are crucial to the book. First, a reinterpretation of the era of upheaval the Middle East has just passed through. Second, an evaluation of how the historical experience of the period between the 1940s and the 1990s undermined the old system. Third, an analysis of the region today that helps explain future developments as the Middle Eastern societies decide their relationships to the West.

Between the State and Islam
Edited by Charles E. Butterworth
University of Maryland, College Park
and I. William Zartman

Traditionally, the study of the Middle East has focused on Islam and on the regime, without accounting for the contrary forces of scepticism, liberty, and creativity. This volume examines how Middle Eastern peoples in the past two centuries lived and flourished outside the structures of established religion and the state.

Jews and Blacks in the Early Modern World
Jonathan Schorsch
Emory University, Atlanta

This book describes the ways Jews imagined and treated Blacks during the first three centuries of the Atlantic slave trade and European colonialism. Using many previously unexamined sources, it goes beyond mere inter-ethnic polemics to lay out for the first time the scope of Jewish anti-Blackness in places such as Portugal, the Ottoman Empire, Italy, Amsterdam and the Caribbean. Readers will see that Jewish attitudes and behavior remained barely distinguishable from general European trends, hardly benign, but far less intense.
