Our inspection copy policy

In the UK, Australia and New Zealand books are sent out for a maximum of 28 days, after which they must be returned or paid for if they are not adopted for a course of 12 or more students. Outside the UK, Australia and New Zealand, inspection copies are sent as desk copies free of charge. Not all titles are available for inspection in all countries. Lecturers must complete and return the **Reply Slip** enclosed with each book.

Books not yet published will be sent in the month of publication.

Reading the Past

Current Approaches to Interpretation in
Archaeology

Third edition

Ian Hodder, *Stanford University, California*
and Scott Hutson, *University of California, Berkeley*

The third edition of this classic introduction to archaeological theory and method has been fully updated to address the burgeoning of theoretical debate throughout the discipline. Ian Hodder and Scott Hutson argue that archaeologists must bring to bear a variety of perspectives in the complex and uncertain task of constructing meaning from the past. While remaining centred on the importance of hermeneutics, agency and history, the authors explore cutting-edge developments in areas such as post-structuralism, neo-evolutionary theory and whole new branches of theory such as phenomenology. With the addition of two completely new chapters, the third edition of *Reading the Past* presents an authoritative, state-of-the-art analysis of contemporary archaeological theory. Also including new material on feminist archaeology, historical approaches such as cultural history, and theories of discourse and signs, this book represents essential reading for any student or scholar with an interest in the past.

Contents

Preface to the third edition; 1. The problem; 2. Processual and systems approaches; 3. Structuralist, post-structuralist and semiotic archaeologies; 4. Marxism and ideology; 5. Agency and practice; 6. Embodied archaeology; 7. Archaeology and history; 8. Contextual archaeology; 9. Post-processual archaeology; 10. Conclusion: archaeology as archaeology; Bibliography; Index.

Cambridge ... Dedicated
to Archaeology

- **This study of the ancient Maya is unique in being a holistic, theoretically integrated vision of that society**
- **Data based on the author's collaborations with the largest ongoing archaeology projects in Central America**

Ancient Maya

The Rise and Fall of a Rainforest Civilization

Arthur Demarest, *Vanderbilt University, Tennessee*

By applying a holistic view to the most recent evidence from archaeology, Arthur Demarest brings the lost civilization of the Maya to life. His theoretical interpretation emphasises both the brilliant rain forest adaptations of the ancient Maya and the Native American spirituality that permeated all aspects of their daily life. Drawing on data from the largest ongoing archaeology projects in Central America, this new study will appeal to anyone interested in the ecological bases of civilization, the function of the state and the causes of the collapse of civilizations.

Contents

1. The mystery and the challenge of the Ancient Maya; 2. Background: geography, chronology, and theoretical perspective; 3. The exploration and archaeology of the Maya: a brief history; 4. Obscure beginnings and the preclassic florescence; 5. The splinter of classic Maya florescence in the lowlands; 6. Settlement and subsistence: the rain forest adaptation; 7. Classic Maya economics; 8. Religion and ideology: beliefs and ritual of the theater state; 9. Classic Maya politics and history: the dynamics of the theater state; 10. The end of classic Maya civilization: collapse, transition, and transformation; 11. The legacy of the classic Maya civilization: postclassic, colonial, and modern traditions; 12. The lessons of Maya history and prehistory.
