The Cambridge Handbook of Visuospatial Thinking
Edited by Priti Shah, University of Michigan, Ann Arbor
and Akira Miyake, University of Toronto

In a single volume, the handbook presents an overview of basic and applied research on visuospatial thinking - how people differ on visuospatial abilities, how people perform complex visuospatial thinking tasks and how to use what we know about visuospatial thinking in applied contexts, such as map reading and multimedia design.

Contents
1. Functional significance of visuospatial representations;
2. Visuospatial images; 3. Disorders of visuospatial working memory; 4. Individual differences in spatial abilities; 5. Sex differences in visuospatial abilities: more than meets the eye;

May 2005   228 x 152 mm   454pp      71 line diagrams   4 half-tones

The Cambridge Handbook of Thinking and Reasoning

Edited by Keith Holyoak, University of California, Los Angeles and Robert Morrison, University of California, Los Angeles

The Cambridge Handbook of Thinking and Reasoning is the first comprehensive and authoritative handbook covering all the core topics in the field of thinking and reasoning. Written by the foremost experts from cognitive psychology, cognitive science, and cognitive neuroscience, individual chapters summarize basic concepts and findings for a major topic, sketch its history, and give a sense of the directions in which research is currently heading. The volume also includes work related to developmental, social and clinical psychology, philosophy, economics, artificial intelligence, linguistics, education, law, and medicine. Scholars and students in all these fields and others will find this to be a valuable collection.

Contents

Preface; Part I. The Nature of Human Concepts; Part II. Reasoning; Part III. Judgment and Decision Making; Part IV. Problem Solving and Complex Learning; Part V. Cognitive and Neural Constraints on Human Thought; Part VI. Ontogeny, Phylogeny, Language, and Culture; Part VII. Thinking in Practice.
