**CAMBRIDGE**  
UNIVERSITY PRESS

Cambridge University Press is the printing and publishing house of the University of Cambridge, and is the oldest press in the world. It is a charitable enterprise required by University Statute to devote itself to printing and publishing in the furtherance of the acquisition, advancement, conservation, and dissemination of knowledge in all subjects; to the advancement of education, religion, learning, and research; and to the advancement of literature and good letters.

CAMBRIDGE Journals

online

[journals.cambridge.org](http://journals.cambridge.org)

Cambridge Journals Online now provides online access to over 160 Cambridge journals, covering some of the world's best scholarship in a wide range of subject areas.

Key features include:

- Full text for users whose institutions subscribe
- FREE access to all tables of contents and article abstracts
- Access to current and archived volumes
- Personalisation – modify the service to suit your needs, creating direct links to articles you need most
- Email alerting service
- Enhanced searching – providing powerful and user-friendly searching capability
- Context-sensitive help facility

To find out more:

Ask your librarian or go direct to the Cambridge Journals Online service at

# Palliative & Supportive Care

## New in 2003

### Editor-in-Chief

William Breitbart  
Memorial Sloan-Kettering  
Cancer Center, USA

### Editors

Harvey Max  
Chochinov  
University of Manitoba,  
Canada

David Kissane  
St. Vincent's Public  
Hospital, Australia

*Palliative & Supportive Care* is an international journal that focuses on the psychiatric, psychosocial, spiritual, existential, ethical, and philosophical aspects of palliative care. Its aim is to serve as an educational resource for practitioners from a wide array of disciplines engaged in the delivery of care to those with life threatening illnesses along the entire continuum of care from diagnosis to the end of life. The journal's scope is broad and relates to all aspects of palliative medicine that do not directly or exclusively deal with the administration of palliative care or hospice services, or with the primary management of pain and physical symptoms in palliative care.

# The Journal of Physiology

*The Journal of Physiology* publishes original research papers that illustrate physiological principles or mechanisms. It is among the most rapidly published journals in its field, with a consistently high citation index among physiology journals. *The Journal* aims for the highest editorial and production standards. Rapid Reports of high priority are published very quickly, normally within 3 months. Papers of particular interest are highlighted in the Perspectives section. *The Journal* publishes Topical Review articles which cover a chosen area in depth. *The Journal of Physiology* Symposia take place twice a year. Topical Reviews from these symposia are published together in an issue of *The Journal*.

# Experimental Physiology

## Translation and Integration

### Chairman and Distributing Editor

J. H. Coote  
University of Birmingham,  
UK

Published for The  
Physiological Society

*Experimental Physiology* is a bimonthly journal publishing original work on all facets of physiology. Integrative studies on man and animals are emphasised and contributions range from the molecular level, through systems physiology, to the whole animal. Theoretical papers based on experimentally derived data are also included, as are pertinent methodological papers. The Rapid Communications facility provides for online publication in advance of the printed journal, usually within six weeks of submission. Critical reviews invited from researchers working in rapidly developing areas of physiology are a distinctive feature. The Psychological Society's Prize Lectures are published in the journal, as are selected papers from Physiological Society and other symposia.

# Psychological Medicine

Now in its fourth decade of publication, *Psychological Medicine* is a leading international journal in the fields of psychiatry, related aspects of psychology and basic sciences. There are eight issues a year, each featuring original articles reporting key research being undertaken worldwide, together with shorter editorials by distinguished scholars and an important book review section. The journal's success is clearly demonstrated by a consistently high impact factor.

# The International Journal of Neuropsychopharmacology

## Editor-in-Chief

Bernard Lerer  
Hadassah - Hebrew  
University Medical Centre,  
Israel

The official scientific  
journal of the Collegium  
Internationale Neuro-  
Psychopharmacologicum  
(CINP)

*The International Journal of Neuropsychopharmacology (IJNP)* serves as a major forum for the rapid publication and wide dissemination of high quality, influential research in neuropsychopharmacology. The central focus of the journal is on research which advances understanding of existing and new neuro-psychopharmacological agents, including their mode of action and clinical application, or which provides insights into the biological basis of neuropsychiatric disorders and thereby advances their pharmacological treatment. *IJNP's* rapid publication policy is facilitated by email submission and review.

# Parasitology

*Parasitology* is an important specialist journal covering the latest advances in the subject. It publishes original papers on all aspects of parasitology and host-parasite relationships, ranging from the latest discoveries in biochemical and molecular biology to ecology and epidemiology in the context of the medical, veterinary and biological sciences. Each year, the proceedings of the symposia of the British Society for Parasitology are published as a supplement included in the subscription price. The 2003 supplements will be on Parasites and Environmental Pollutants: Parasites and Hosts as Indicators of Water Quality. An additional specially commissioned supplement is also included annually and in 2003 this will be on Transmission biology and epidemiology of echinococcosis.

## Fetal and Maternal Medicine Review

**Editor-in-Chief**  
Stephen Robson  
Newcastle upon Tyne, UK

*Fetal and Maternal Medicine Review* publishes high quality reviews drawn from all relevant disciplines in this rapidly expanding field. Each issue includes a selection of clinical and research reviews from experts in the field. Rapid publication and a deliberate preference for authors currently active in research ensures this journal has immediate relevance to contemporary clinical practice. Subject areas covered include fetal medicine, maternal medicine, neonatology, obstetric anaesthesia, epidemiology and basic science. It is essential reading for all engaged in the care of pregnant women and neonates including obstetricians and neonatologists, postgraduates training for specialist careers, specialist nursing and midwifery staff and others with an interest in this rapidly developing field.

## Reproductive Medicine Review

The unprecedented explosion in the knowledge base of reproductive medicine has led to new approaches to the diagnosis and treatment of disease. *Reproductive Medicine Review* publishes up-to-date reviews of reproductive medicine, particularly in relation to scientific discoveries underpinning developments in clinical practice. Coverage includes gynaecological endocrinology, infertility, andrology, assisted conception, embryology, genetics, nuclear transfer, reproductive surgery, menstrual disorders and the menopause. The journal is aimed at basic scientists and clinicians in the broad field of reproductive medicine.

# Zygote

## Editor-in-Chief

Brian Dale  
Centre for Reproductive  
Biology, Clinica Villa del  
Sole, Napoli, Italy

## Asian Pacific Editor

Alan Trounson  
Monash University,  
Australia

*Zygote* publishes original, high-quality papers, short communications and topical review articles. Studies on plants, invertebrates, lower vertebrates, mammals and humans at the molecular and cellular levels are published, leading to a unique multidisciplinary publication. Topics include gametogenesis, sperm-egg interaction, activation of gametes, polarity in oocytes and zygotes, cell-cycle control, cleavage, cell-cell interactions, and the generation of early cell lineages.

# Expert Reviews in Molecular Medicine

## Electronic Journal

*Expert Reviews in Molecular Medicine* is an exciting online journal featuring high-quality reviews of the latest developments in this fast-growing field. Coverage includes gene therapy, drug design, vaccines, genetic testing, pathogenesis, epidemiology, genomics, diagnostics and techniques. Reviews are published continually on the website. The journal's innovative functionality allows viewers to access not only the review articles, but also fully abstracted references, figures, photographs, tables, animations, molecular models and discussion groups. It also hosts pages of relevant links to other websites and a glossary. *Expert Reviews in Molecular Medicine* will be of interest to biomedical researchers, clinicians, students and researchers in the pharmaceutical and biotechnology industries.

# Epidemiology and Infection

## Senior Editor

Norman Noah  
London School of Hygiene  
and Tropical Medicine, UK

*Epidemiology and Infection* publishes original reports and reviews on all aspects of infection in man and animals. Particular emphasis is given to the epidemiology, prevention and control of infectious diseases. The field covered is broad and includes the zoonoses, tropical infections, food hygiene, vaccine studies, statistics and the clinical, social and public health aspects of infectious disease. Papers covering microbiology and immunology which have an epidemiological relevance are part of this broad field. Papers come from medical and veterinary scientists worldwide. It has become the key periodical in which to find the latest reports on recently discovered infections and new technology. For those concerned with policy and planning for the control of infections the papers on mathematical modelling of epidemics caused by historical, current and emergent infections will be of particular value.

## Genetical Research

*Genetical Research* is a prestigious, well-established journal which publishes original work of high quality and wide interest on all aspects of genetics. Major areas of research covered include population and quantitative genetics (both theoretical and experimental), QTL mapping, molecular and developmental genetics of eukaryotes. The breadth and quality of papers, reviews and book reviews make the journal invaluable to professional geneticists, molecular biologists, plant and animal breeders, medical scientists and biologists involved in evolutionary and developmental studies.

The International Journal for Healthcare  
Ethics and Ethics Committees

## Editors

Thomasine Kushner  
University of California,  
Berkeley, USA

Steve Heilig  
San Francisco Medical  
Center, USA

The *Cambridge Quarterly of Healthcare Ethics* is designed to address the challenges of biology, medicine and healthcare and to meet the needs of professionals serving on healthcare ethics committees in hospitals, nursing homes, hospices and rehabilitation centres. The aim of the journal is to serve as the international forum for the wide range of serious and urgent issues faced by members of healthcare ethics committees, physicians, nurses, social workers, clergy, lawyers and community representatives.

# International Journal of Technology Assessment in Health Care

Biomedical advances and rapid technological change are dominant characteristics of health services in all countries. The promises of new medical technology need to be critically reviewed and balanced against available resources. The social and ethical issues related to the diffusion and use of technology are other questions of great importance in health policy and practice. The *International Journal of Technology Assessment in Health Care* serves as a forum for the wide range of professionals interested in the assessment of medical technology, its consequences for patients and its impact on society. It covers the generation, evaluation, diffusion and use of health care technology. In addition to general essays and research notes, regular columns on technology assessment reports and thematic sections are published.

# Developmental Medicine and Child Neurology

## Senior Editor

Martin C. O. Bax  
Imperial College School of  
Medicine, London, UK

Distributed for  
Mac Keith Press

*Developmental Medicine and Child Neurology (DMCN)* is one of the world's leading journals on paediatric neurology, and one of the leaders in the whole field of paediatrics. In 2003 there will be twelve issues as usual, plus four supplements. *DMCN* is the officially designated journal of the British Paediatric Neurology Association and the American Academy for Cerebral Palsy and Developmental Medicine. It covers a wide range of clinical topics concerning the neurological diseases and disabilities of children. The journal is of interest both to specialists engaged in medical research and to clinicians in the fields of paediatrics, genetics, orthopaedics, neurology and other relevant areas. It features original articles, case reports, annotations, letters to the editor, and book reviews.

## Clinics in Developmental Medicine

*Clinics in Developmental Medicine* are quarterly hardcover monographs which cover a wide range of conditions affecting child development. Each thematic volume provides a comprehensive study of the theoretical and clinical aspects of a specific childhood condition or disorder. Although the volumes offer primarily a practical approach to the understanding and management of these conditions, they also address their subject matter in depth and are of considerable research interest. The volumes are also available separately and may be ordered using the ISBNs and prices shown elsewhere in Cambridge University Press catalogues. However, a subscription to all four volumes published during the year gives you a substantial saving (approximately 30%) on the price of those volumes purchased individually.

## Reviews in Clinical Gerontology

### Editor

K. Woodhouse  
University of Wales  
College of Medicine, UK

*Reviews in Clinical Gerontology* brings together specially commissioned international reviews on recent developments in geriatric medicine (including rehabilitation, nursing care and psychiatry of old age) and in biological, psychological and social gerontology. There is systematic coverage of the literature on a cyclical basis. All the major topics of interest are reviewed during the course of a five-year cycle. The issues build into a valuable source of reference for everyone working with elderly people.

# Ageing and Society

*Ageing and Society* is an interdisciplinary and international journal devoted to publishing papers which further the understanding of human ageing in the wider social and cultural context. It draws contributions and readers from a broad spectrum of subject areas. In addition to original articles, *Ageing and Society* features an extensive book review section and a regular updating on specified research areas. There are occasional review symposia and special issues on important topics.

## Advertising Opportunities in Cambridge Journals

Cambridge University Press publishes over 160 specialist journals of which more than 15 are of medical interest. Many of the journals are linked to well-established societies and associations whose influential members are at the forefront of research in their fields.

Our leading list of journals includes *Palliative and Supportive Care*, *The Journal of Physiology*, *Developmental Medicine and Child Neurology*, *Psychological Medicine* and the *Journal of the International Neuropsychological Society*.

By advertising in Cambridge medical journals, not only can you reach society members, but you can also target psychologists, paediatricians, researchers, consultants, and psychopharmacologists amongst others.

For more information on advertising opportunities and a copy of the Cambridge Journals 2003 Rates and Data Catalogue, please contact the Advertising Sales Team on
