CHILDHOOD LEUKEMIAS
SECOND EDITION

edited by
CHING-HÓN PUI
ST. JUDE CHILDREN’S RESEARCH HOSPITAL, MEMPHIS, USA

CURRENT • COMPREHENSIVE • AUTHORITATIVE
Childhood Leukemias represent nearly one third of all cancers in children and present a unique challenge to oncologists, pediatricians, hematologists, and other health professionals. Dr Ching-Hon Pui has assembled an expert team of authors to develop the most comprehensive, clinically-oriented, and authoritative reference dedicated to these diseases.

Childhood Leukemias moves from the laboratory bench to the patient bedside in four easily-accessible sections. Part one presents an historical overview, whilst part two presents an in-depth review of topics needed to understand the pathobiology of leukemia. Part three builds upon this scientific foundation by explaining practical approaches to clinical diagnosis, evaluation, and treatment, and part four outlines major clinical complications which may arise during and after treatment, along with chapters on supportive care, psychosocial issues, and nursing.

Fully referenced and up-to-date, Childhood Leukemias is an absolute ‘must-have’ for any physician or investigator who deals with leukemias in childhood.

Reviews from 1st Edition
‘… the first [book] completely dedicated to childhood leukemias with a real holistic approach … an outstanding team of contributors … highly recommended not only to pediatric hemato-oncologists and general pediatricians but also to clinical scientists and laboratory researchers involved in the field of leukemia … an excellent and useful book.’
Annals of Oncology

‘There is something in this book for everyone – codes for geneticists, infections for microbiologists, drugs for pharmacologists and survival curves for statisticians. However, clinical imperatives remain at the heart of the book and it is clear that the philosophy of the editor and contributors is to place the result of their bench and computer work at the bedside of the sick patient.’
Journal of The Royal Society of Medicine

About the author
Dr Ching-Hon Pui is regarded to be one of the most prominent investigators and teachers in the field of leukaemia. According to the ISI Essential Science Indicators he is one of the most highly cited investigators in Clinical Medicine in the past ten decades, and has received numerous awards for his research accomplishments. His ability to solely assemble virtually all leaders in pediatric leukaemia research as authors in two impressive books attest to his leadership in the field.

COMPREHENSIVE TEXT WITH JUDICIOUS BLEND OF CLINICAL AND BIOLOGICAL TOPICS

NEW CHAPTERS ON CHEMoresistance, ADVANCES IN therapy-related leukemias, Antibody-targeted therapy, pain management, genetic predisposition and treatment possibilities in countries with limited resources

WRITTEN BY LEADING INTERNATIONAL EXPERTS IN THE FIELD OF CHILDHOOD LEUKEMIAS
