Forthcoming in 2006 • New Edition

Medical Management of the Surgical Patient

4th edition
Edited by Michael F. Lubin
Robert B. Smith
Thomas F. Dodson
Nathan O. Spell
and H. Kenneth Walker
All at the Emory University, Atlanta, USA

This comprehensive textbook, now fully revised, rewritten and up-dated in its fourth edition, provides an authoritative account of all aspects of perioperative care for patients undergoing surgical operations. Such patients frequently have associated medical problems such as coexisting heart disease or diabetes that make their care more difficult and increase the likelihood of complications or death.

All areas of medical disease are discussed with clear recommendations for management in the perioperative period. Basic discussions of surgical procedures are detailed to help non-surgeons understand the procedures and their implications for patient care. Included under each procedure are the indications for surgery, main steps in the procedure, usual postoperative course of the patient, and common postoperative complications, both in the hospital and after discharge.

This definitive account includes numerous contributions from leading experts at national centers of medical excellence. It will serve as a significant work of reference for internists, anesthesiologists and surgeons.

Features
• Detailed medical management
• Basic surgical explanations
• Includes special topics such as ethics, laparoscopic surgery, AIDS

Contents:
Part I Medical management:
Cardiology; Hypertension; Pulmonary; Gastroenterology; Hematology; Infectious disease; Renal disease; Endocrinology; Rheumatology; Neurology; Surgery in the elderly; Obesity; Psychiatric disorders; Anxiety and somatoform disorders; Psychological and emotional reactions to illness and surgery; Peripartum patients;

Part II Surgical procedures and their complications:
General surgery; Cardi thoracic surgery; Vascular surgery; Plastic and reconstructive surgery; Gynecologic surgery; Neurologic surgery; Ophthalmic surgery; Orthopedic surgery; Otolaryngologic surgery; Urologic surgery.

August 2006   840pp   69 illustrations

Until end of September 2006, thereafter £120.00.
ANAESTHESIA

New Edition

Basic Science for Anaesthetists
2nd edition
Sylva Dolenska
The William Harvey Hospital, Kent, UK

The aim of this book is to provide a concise and understandable review of the physics, mathematics, statistics, physiology and pharmacology of anaesthesia. A revised edition of a book originally titled Anaesthetic Data Interpretation, the new title better reflects the contents, which include additional chapters relevant to the Primary FRCA examination. Revisions reflect advances in technology, for example, the considerable recent advances in uses of capnographs and oxygen analysers.

Contents: Part 1: Physics, mathematics, statistics, anaesthetic apparatus; Part 2: Clinical measurement; Part 3a: Physiology: the cardiovascular system; Part 3b: Physiology: the respiratory system; Part 4: Pharmacology

Anaesthesia
A Concise Handbook
Graham Arthurs
Maelor Hospital, Wrexham, UK

Written by an experienced anaesthetic consultant and examiner, this concise handbook adopts a practical A–Z approach to modern anaesthesia to provide the reader with valuable information, useful tips on avoiding common pitfalls, and an essential quick reference to key facts for use in the busy clinical environment. With importance placed on the compilation by individual anaesthetic departments of protocols and guidelines for use on the wards, this book will fill the niche for a practical text that covers all of the common conditions and problems encountered by the trainee.

2001 165pp 50 illustrations 978 1 841 10080 7 (1 841 10080 3) • PB • £22.99

Textbook

Essential Anesthesia
From Science to Practice
Tammy Y. Euliano
J. S. Gravenstein
Both from University of Florida, USA

This is a concise, accessible introduction to the essentials of anesthesia, suitable for medical students, junior doctors, nurse anesthetists, and all operating theatre staff. It provides a brief, broad overview of the science and practice of anesthesia without overwhelming the reader with intimidating detail. The first section of the book describes the evaluation of the patient, the different approaches to anesthesia, and the postoperative care of the patient in pain. The next section introduces the essentials of physiology and pharmacology and their role in understanding the principles of anesthesia. The final section presents a step by step description of clinical cases, ranging from the simplest to the most complex. These clinical vignettes give a very real introduction to the practicalities of anesthesia and will give the non-anesthetist physician an idea of how to prepare a patient for a surgical procedure.

Contents: Part I. Clinical Management; Part II. Applied Physiology and Pharmacology; Part III. Clinical Cases.

2004 262pp 118 illustrations 978 0 521 53600 4 (0 521 53600 6) • PB • £24.99

Capnography
Clinical Aspects
Edited by Joachim Gravenstein
University of Florida, USA
Michael Jaffe
Respironics-Novametrix, Connecticut, USA
David Paulus
University of Florida, USA

Carbon dioxide in the respired gases gives evidence of life processes and the adequacy of breathing. The amount and concentration of the gas in the breath can be measured and monitored with instruments called capnographs, which are used whenever and wherever the breathing of a patient might be affected by disease or treatment. The book deals not only with the clinical application of these devices but also with the basic physiology of the generation and transport of carbon dioxide in the body. A technical section describes how the instruments work and a unique section tells the history of capnography. Over 40 contributors cover these aspects in the book, which has been edited by three experts in the field.

Contents: Preface; Commonly used abbreviations; 1. Clinical perspectives; Part I. Ventilation – Adequacy of Breathing; Part II. Airway Management; Part III. Monitoring; Part IV. Capnography and Sleep; Part V. Weaning; Part VI. Special Situations; Part VII. Circulation – Transport of CO2 and Pulmonary Blood Flow; Part VIII. Metabolism – CO2 Production; Part IX. ‘Organ Effects’; Part X. Physiologic Perspectives; Part XI. Historical Perspectives; Part XII. Technologic Perspectives

Top Tips in Anaesthesia
Edited by T. M. Perris
Gloucester Royal Hospital, UK
C. S. Brudney
Duke University Medical Center, Durham, UK
Anaesthesia is a highly complex and technical specialty. Every practitioner will develop commonsense ways to deal with difficult and challenging situations. This small, but fact-filled book brings together many of these tips (how to do it) and caveats (how not to do it!), forming invaluable advice from many recognised experts at the cutting edge of anaesthesia, on both sides of the Atlantic, that can now be brought to a new and much wider audience.

Anaesthetic Aide Memoire
2nd edition
John Urquhart
John Hall
Both at West Suffolk Hospital, Bury St Edmunds, UK
With Pamela Chrispin, Jeremy Mauger, Deborah Meldrum, and John Slade
This fully updated edition of Anaesthetic Aide Memoire provides a compilation of key lists, numerical data, physiological and pharmacological formulae, procedural algorithms, important information on illnesses pertaining to anaesthesia, data on equipment, clinical measurement, and intensive care management that will serve as a valuable quick reference for senior anaesthetists in training and for consultants in anaesthesia. It will also be useful for candidates studying for the FRCA.

Morbid Obesity Peri-Operative Management
Edited by Adrian Alvarez
IMETCO, Buenos Aires, Argentina
Edited in association with Jay B. Brodsky
University School of Medicine, Stanford, USA
Martin A. Alpert
University of Missouri School of Medicine, Columbia, USA
and George S. M. Cowan
Obesity Wellness Center, University of Tennessee, USA
Written by international experts in the field, this book covers all aspects of obesity that may impact upon the practice of the anaesthetist, intensivist or other healthcare professional dealing with the obese patient. Presented in a logical manner — opening chapters cover the underlying pathophysiology of obesity and move on to discuss general risk factors, legal and ethical aspects of anaesthesia, changes in pharmacokinetics and pharmacodynamics, pre-operative assessment and management.

Contents: Part I. General Aspects; Part II. Patho-Physiology; Part III. Preoperative Management; Part IV. Perioperative Management of Co-morbidities; Part V. Pharmacology; Part VI. Monitoring; Part VII. Intraoperative Management; Part VIII. Post-Operative Care; Part IX. Conclusions.

Recent Advances in Anaesthesia and Intensive Care
Volume 23
Edited by J. N. Cashman and R. M. Grounds
Both at University of London, UK
This volume is the latest in this very successful and long-established series (previously entitled Recent Advances in Anaesthesia and Analgesia) to present a series of cutting-edge topics for anaesthetists from some of the world’s leading authorities in their subjects. As the title suggests, this volume (and the previous Volume 22) has increased input from the field of intensive care, but the emphasis will remain on producing articles of high quality and interest to the reader and providing exceptional value for money.

2005 240pp 27 illustrations 978 1 841 10145 3 (1 841 10145 1) • PB • £38.00

Anaesthesia for Minimally Invasive Surgery
Thomas Crozier, Georg-August-Universität, Göttingen, Germany

Minimally invasive or laparoscopic surgery is becoming increasingly commonplace, as technology has enabled a minimally invasive approach to be offered as a feasible alternative to conventional open surgery for a number of important surgical procedures. This up-to-date, concise and practically oriented introduction to the subject will be of value to all anaesthetists with an interest in minimally invasive techniques. The book covers the key aspects of basic physiology, patient preparation and positioning, monitoring, anaesthetic procedures and post-operative pain. Written by a leading expert in the field, from a well-known European centre of excellence, it is essential reading for anaesthetists and intensivists at all levels of expertise.

2004 210pp 187 illustrations
978 1 841 10191 0 (1 841 10191 5) • HB • £55.00

Fundamentals of Regional Anaesthesia
H. B. J. Fischer
C. A. Pinnock
Both at Alexandra Hospital, Redditch, UK

This superbly illustrated book provides a comprehensive overview of all aspects of regional anaesthesia for the trainee and practising anaesthetist alike. Written by a team of experts who are well known in the field of regional anaesthesia, the book is structured logically, with essential anatomy being followed by indications and then the block techniques themselves, all sections being organised by region of the body, for ease of reference. Fully illustrated in colour throughout with all illustrations produced especially for this book, it is the essential, one-stop guide to regional anaesthesia for all anaesthetists.

Contents: Part I. Principles and Practice; Part II. Peripheral Nerve Blocks; Part III. Central Neuroaxial Blocks; Part IV. Appendix; Index of specific techniques; Further reading.

2004 180pp
978 1 841 10126 2 (1 841 10126 5) • HB • £55.00

Fundamentals of Anaesthesia
2nd edition
Edited by Colin Pinnock
Alexandra Hospital, Redditch, UK
Ted Lin
Glenfield Hospital, Leicester, UK
Tim Smith
Alexandra Hospital, Redditch, UK

Written and edited by a team of expert contributors, it provides a comprehensive but easily readable account of all of the information required by the FRCA Primary examination candidate and has been expanded to include more detail on all topics and to include new topics now covered in the examination. As with the previous edition, presentation of information is clear and concise, with the use of lists, tables, summary boxes and line illustrations where necessary to highlight important information and aid the understanding of complex topics.

‘Fundamentals of Anaesthesia is an excellent book, which I enjoyed reading, and which will be valuable to practising and training anaesthetists throughout the world … I encourage those preparing for their Part 1 FRCA examination to purchase this book … This book will also be a welcome addition to departmental libraries and private reference collections.’

EUROPEAN JOURNAL OF ANAESTHESIOLOGY

Contents: Part I. Clinical Anaesthesia; Part II. Physiology; Part III. Pharmacology; Part IV. Physics, Clinical Measurement and Statistics.

The Anaesthesia Science Viva Book
Simon Bricker
Countess of Chester Hospital, Chester, UK

The clinical science viva voce examination is an important component of the Final FRCA examination, covering applied pharmacology, anatomy, physiology and physics. Written by the author of the best-selling Short Answer Questions in Anaesthesia, Second edition, this new book is the definitive guide to this part of the FRCA exam and is also the perfect companion volume to The Clinical Anaesthesia Viva Book by Mills et al.

2004   348pp   978 0 521 68248 0   (0 521 68248 7) • PB • £35.00

The Clinical Anaesthesia Viva Book
Simon J. Mills
Simon L. Maguire
Julian M. Barker
All on the North West Rotation, UK

The Final FRCA examination is an essential qualification for every anaesthetist wishing to practice anaesthesia as a consultant in the UK. Several books deal with the written and basic science viva component of the FRCA Final, but none deal specifically with the clinical case/scenario part of the viva examination. This book has been designed to fill this gap and offers not only well-researched, relevant and carefully constructed scenarios (both long and short cases), but also invaluable advice on preparation for the clinical vivas, based on the authors’ recent experience.

2001   272pp   20 illustrations   978 0 521 67695 3   (0 521 67695 9) • PB • £27.99

Concise Anatomy for Anaesthesia
Andreas G. Erdmann
Peterborough District Hospital, Peterborough, UK

Presents the core anatomical knowledge required for the Primary and Final FRCA examinations in a simple and straightforward manner. Adopting the philosophy of the examination itself, the many illustrations in the book are clear and designed to be easy to understand at a glance. The illustrations are accompanied by explanatory text throughout and for each anatomical region, sample examination questions are included which follow the format of those asked in the examinations. This book is essential reading for all anaesthesia Primary and Final candidates, as well as providing a valuable quick reference for busy anaesthetists at all levels of experience.

2001   208pp   70 illustrations   978 0 521 86909 6   (0 521 86909 9) • HB • £35.00

New for 2006
The Structured Oral Examination in Anaesthesia
Practice Papers for Teachers and Trainees
S. Balasubramanian
C. Mendonca
Colin Pinnock
All at Alexandra Hospital, Redditch, UK

Comprises of questions and answers that closely simulate the Royal College of Anaesthetists’ oral examination format. Set up as complete exam papers, the book enables candidates to assess their knowledge accurately and within time limits. The answers are presented thoroughly, constructed from basic scientific facts, and further clarified through tables and line diagrams. Thorough revision with this book will cover virtually all requirements for anaesthesia oral examinations worldwide. This is an essential aid to study for trainees and a great tool for trainers.

The Anaesthesia Viva
A Primary FRCA Companion
Volume 1: Physiology and Pharmacology
2nd edition
John Urquhart
West Suffolk Hospital, Bury St Edmunds, UK
Mark Blunt
Queen Elizabeth Hospital, King’s Lynn, UK
Colin Pinnock
Alexandra Hospital, Redditch, UK
With contributions by Mark Dixon
This two volume series is an indispensable aid to success in the anaesthesia viva examinations and appropriate to both the Primary FRCA and the Final FRCA. The first volume covers the essentials of physiology, pharmacology, and statistics and gives the candidate a comprehensive range of possible questions and exemplary model answers to provide the perfect self-learning tool, and it is also useful as a concise reference for the established anaesthetist, being packed with up-to-date information on fundamental questions that face the anaesthetist on a daily basis.

The Objective Structured Clinical Examination (OSCE) assesses key practical aspects of anaesthetic competence and forms a key part of the Primary examination of the Royal College of Anaesthetists. In the examination, the candidate moves through a series of stations which test clinical assessment, data interpretation, communication, and technical skills. This book helps the trainee to practise the examination. In the wider context, it will also help the anaesthetist to develop essential practical skills, such as history taking and communication. This new edition of the book has been expanded and updated to reflect recent changes to the OSCE examination.

MCQs for the Final FRCA
Khaled Elfouri
Graham Arthurs
Both at Maelor Hospital, Wrexham, UK
Multiple-choice questions (MCQs) are used by many examination boards as a way of testing a broad spectrum of knowledge in an easily administered and unbiased way. They form a critical part of both the Primary and Final FRCA (Fellowship of the Royal College of Anaesthetists) examinations.

Contents: Preface; Introduction; 1. Short trial paper (30 questions in 60 minutes); 2. Questions; 3. Answers.
2004     230pp     978 1 841 10212 2   (1 841 10212 1) • PB • £22.99

Short Answer Questions in Anaesthesia
2nd edition
Simon Bricker
Countess of Chester Hospital, Chester, UK
Vastly expanded and completely re-written, this is the definitive companion and revision aid for the short answer paper which forms part of the Final FRCA examination. It includes a comprehensive introduction to this section of the examination together with details of examination technique (much of which applies both to oral and to written questions). It contains 180 sample questions which cover the breadth of the specialty and which are divided into subspecialty areas. Each question is prefaced with a comment about the topic which attempts to place it in context to suggest the underlying rationale and to indicate its importance.

Percutaneous Tracheostomy
A Practical Handbook
Henry G. W. Paw
York District Hospital, UK
Andrew R. Bodenham
Leeds General Infirmary, UK

This well illustrated, practical text provides the newcomer to percutaneous tracheostomy with a perfect introduction to this increasingly widely used technique. It provides an overview of the history of the technique, the basic anatomy of relevance to the user, and the indications and contraindications for its use, and goes on to describe the key advantages of the technique over other methods, which kits are currently available for use (and their relative merits), equipment and aids for percutaneous tracheostomy, and the anaesthetic techniques involved.

Operating Department Practice A-Z
Edited by Brian Smith
Tom Williams
Both at Edgehill College of Higher Education, Liverpool, UK

As in many parts of the world, the UK is witnessing significant changes to Operating Department Practice (ODP) education, a change that is bringing with it the need for new publications aimed specifically at the operating department practitioner. This book follows a familiar ‘dictionary-like’ format to present alphabetically the key topics of interest to ODPs in training and in practice. Each entry has its own detailed explanation and the book has a user-friendly format to allow rapid access to information.

‘… the book has a user-friendly format to allow rapid access to information. It is an essential purchase for ODPs, as well as being a handy quick reference for medical students and a useful information source for recovery/theatre nurses.’

THE OPERATING THEATRE JOURNAL

Contents: Preface; Foreword; Acknowledgements; Medical terminology; Abbreviations; A to Z entries; Useful web sites; Table of normal values.

2004 276pp 30 illustrations 978 1 841 10193 4 • PB • £27.99

Fundamentals of Operating Department Practice
Edited by Ann Davey, John Moores University, Liverpool, UK
Colin S. Ince, Whiston Hospital, Merseyside, UK

This book seeks to embrace the knowledge needed for the generic theatre worker, be they nurse or anaesthetic assistant, as envisaged in the Bevan Report. It clarifies the underlying principles needed for an understanding of anaesthetic and surgical practice. It both defines the level of knowledge required for the ODP Level III qualification and covers the practical aspects of operating department practice, wherever relevant.

British Journal of Anaesthetic and Recovery Nursing
Editor-in-Chief: M. Oakley
Surrey, UK
Published quarterly, the British Journal of Anaesthetic and Recovery Nursing is devoted to issues affecting clinical practice in the field of peri-anaesthetic nursing and is the official publication of the British Anaesthetic & Recovery Nurses Association (BARNAs). The Journal publishes articles from the specialty of anaesthetic and recovery nursing and content includes editorials, original articles, brief reports, reviews, conference reports, news and notices.
