Figure Captions	<i>page</i> xiv
Table Headings	xviii
Foreword	xix
Preface	xxi
1 Introduction	1
The Context for Perception	1
Elements of Consciousness	2
The Illusion of Publicity	2
Stimulation and Common Sensory Response	3
Aspects of Reality	4
Direct and Indirect Aspects	4
Virtual Reality and Nonveridical Experience	5
Brain as Mind Machine	6
The Relation of Structure to Function	6
A Role for Motor Systems in the Study of Perception	7
Egocentrically Speaking	8
2 Some Basic Concepts of Physiological Optics	10
Introduction	10
Images	11
Light Vergence	12
Lenses	17
Why Lenses and Prisms Change the Path of Light	20
	ix

x Contents

Prism Diopters and Ocular Convergence	22
Dioptrics of Deduced and Reduced Eyes	24
3 Oculomotor Systems	29
Introduction	29
Types of Eye Movements	29
The Teleology Game, or “What Is Its Function?”:	
Two Nonmutually Exclusive Answers	30
Directional Eye Movements and Ocular Muscles	31
Accommodation	35
The Basic Mechanism in Primates	35
Reflexive Accommodation and the Dark Focus	36
Voluntary Control of Accommodation	39
Pupillary Movements and the Iris	39
Functional Aspects	40
Vergence	41
Definition, Functionality, Decussation, and Stereopsis	41
Vergence-Stimulated Accommodation	43
Voluntary Vergence	45
Vergence Resting Level and Its Adaptation	48
The Saccadic System	51
Saccadic Suppression	51
Pulses and Steps	53
Basic Attributes	55
Adaptation within the Saccadic System	56
The Optokinetic Reflex (OKR), Smooth Pursuit (SP), and the Vestibulo-Ocular Reflex (VOR)	57
Functional Significance	57
Optokinetic Reflex	57
Smooth Pursuit	58
Vestibulo-Ocular Reflex and Its Adaptations	59
The Otolith–Ocular Reflexes	66
Signalling Mechanisms	66
Ocular Counterrolling and the Doll Reflex	68
Otolith–Ocular Adaptation in Outer Space	72
An Overview of Oculomotor Systems	73
Categories of Oculomotor Function	73

4 Oculomotor Factors in Perception	75
Introduction	75
Information Extraction and Perceptual Attribution	76
Perceptual Properties of Oculomotor Systems	76
Radial Egocentric Direction	76
The Egocenter and the Cyclopean Eye	77
Perceptual Effects of Biased Horizontal Eye-Position	
Information	80
Apparent Visual Direction	80
Apparent Frontal-Plane Orientation	87
Perceptual Effects of Biased Vertical	
Eye-Position Information	88
Apparent Horizon and the Pitch Box	88
Apparent Visual Direction and the Doll Reflex	90
Induced Vertical Phoria and Apparent Height	91
Apparent Vertical Orientation in the Pitch Plane	95
Apparent Vertical and Horizontal Orientation	
in the Frontal Plane	97
Perceptual Effects of Vergence and Accommodation	101
Direct Affect on Distance Perception	101
Indirect Affect on Apparent Size and Apparent Depth	105
Perceptual Instability After Biasing the VOR	109
Eliminating the VOR	110
Atypical Stimulation	110
Perceptual Effects of Adapting the Amplitude and	
Direction of the VOR	111
Illusions of Motion and Extent Resulting from Pursuit,	
Saccades, and the Pursuit Suppression of the Optokinetic	
Reflex	113
Pursuit	113
Saccades	118
Pursuit Suppression of the Optokinetic Reflex	120
Illusory Percepts After Vibrotactile Stimulation	
of Extraocular Muscle	121
5 Theoretical Issues and Underlying Mechanisms	124
Introduction	124

xii Contents

Compensation Theories: Role of Reflexive and Voluntary Eye Movements in Normative Perception and Illusions	125
Position Constancy	126
Sources of Sentience	127
Oculogyral Illusion	130
Light vs. Dark Environments	130
The Paralyzed-Eye Paradigm	131
The Eye-Press Paradigm	134
Eye-Press and Altered Vergence Innervation	135
The Adaptation Paradigm and Altered Vergence Innervation	136
Ocular Muscle Vibration	137
Eye Movements and Vection	138
Introduction	138
Oculomotor Mechanisms vs. Cognitive State	138
Ocular Muscle Vibration, Again	142
Conclusion	143
Eye Movements and Motion Sickness	143
Virtually Ubiquitous	144
Functional Significance	146
Treisman's Neurotoxin–Mimetic Theory	146
Positional Alcohol Nystagmus (PAN): A Better Model for the Inner Ear Facilitation of the Emetic Response to Poisons	147
Eye Movements and the Vagus Nerve Connection	148
The Coriolis Maneuver and Eye-Muscle Traction	150
Supporting Evidence	153
6 Concluding Remarks	154
Summary	154
Implications	155
Unresolved Issues	155
The Perceptual-Integration Problem	155
The Vection Problem	156
The Sentience Problem	157
The Mind–Brain Problem	157
Appendix The Ametropias and Other Common Visual Anomalies	159
Introduction	159

Myopia	160
Hyperopia	162
Refractive Error and Axial Length Distributions	162
Presbyopia	164
Astigmatism	166
Anisometropia and Aniseikonia	166
Amblyopia and Strabismus	167
Glaucoma	167
Heterophoria	169
Asthenopia	170
References	173
Subject Index	201
Author Index	206
