Section A Letters and sounds

1 Bye, buy Introducing letters and sounds 10
2 Plane, plan /eI/, /æ /
3 Back, pack /b/, /p /
4 Rice, pack /s/, /z /
5 Down town /d/, /n /
6 Meet, met /i:/, /e /
7 Carrot, cabbage /l/, /l /
8 Few, view /f/, /v /
9 Gate, Kate /ɡ/, /k /
10 Hear, we’re, year /h/, /w/, /j /
11 Wine, win /w/, /w /
12 Sheep, jeep, cheap /ʃ/, /dʒ/, /tʃ /
13 Flies, frites /l/, /r /
14 Car, care /ɛ(r)/, /æ(r)/
15 Some, sun, sung /s/, /s/, /ŋ /
16 Note, not /n/, /n /
17 Arthur’s mother /ɔ(r)/, /ɔ(r)/
18 Sun, full, June /ʌ/, /ʌ/, /ʌ /
19 Shirt, short /ʃ(r)/, /ʃ(r)/
20 Toy, town /ɔ(w)/, /ɔw /

Section B Syllables, words and sentences

21 Eye, my, mine Introducing syllables 50
22 Saturday September 13th Introducing word stress 52
23 Remember, he told her Introducing sentence stress 54

Syllables

24 Oh, no snow! Consonants at the start of syllables 56
25 Go – goal – gold Consonants at the end of syllables 58
26 Paul’s calls, Max’s faxes Syllables: plural and other –s endings 60
27 Pete played, Rita rested Syllables: adding past tense endings 62

Word stress

28 REcord, reCORD Stress in two-syllable words 64
29 Second hand, bookshop Stress in compound words 66
30 Unforgettable Stress in longer words 1 68
31 Public, publicity Stress in longer words 2 70
Sentence stress

32 DON'T LOOK NOW! Sentences with all the words stressed 72
33 THAT could be the MAN Unstressed words 74
34 I’ll ask her (Alaska) Pronouns and contractions 76
35 She was FIRST Pronouncing the verb be 78
36 WHAT do you THINK? Auxiliary verbs 80
37 A PIECE of CHEESE Pronouncing short words (a, of, or) 82
38 Pets enter, pet centre Joining words 1 84
39 After eight, after rate Joining words 2 86
40 Greet guests, Greek guests Joining words 3 88

Section C Conversation

41 Could you say that again? Understanding conversation 90
42 ‘Was that the question?’ he asked. Reading aloud: ‘pronouncing punctuation’ 92
43 A shirt and a tie / a shirt and tie Grouping words 94
44 Ehm … Showing that you want to continue 96
45 Well, anyway … Telling a story 98
46 I mean, it’s sort of like … Understanding small talk 100
47 Right, OK … Understanding instructions 102
48 ‘Like father like son’ as they say Quoting speech 104
49 He will win Introduction to emphatic stress 106
50 Schwartz … Pedro Schwartz Emphasising added details 108
51 I think you’re in my seat Emphasising important words 110
52 Chips or salad? Emphasising contrasting alternatives 112
53 Fifty? No, fifteen! Emphasising corrections 114
54 Look who’s talking! Introducing tones 116
55 Here? Yes, here! Asking and checking tones 118
56 Where were you born? Tones in asking for information 120
57 We’re closed tomorrow Tones in new and old information 122
58 Oh, really? Continuing or finishing tones 124
59 It’s fun, isn’t it? Agreeing and disagreeing tones 126
60 It was brilliant! High tones 128

Section D Reference

D1 Introduction to phonemic symbols 130
D2 Pronunciation test 137
D3 Guide for speakers of specific languages 141
D4 Sound pairs 144
D5 Sentence stress phrasebook 161
D6 Glossary 162

Key 166

Acknowledgements 200
To the student

*English Pronunciation in Use* is a book to help students of English to work on pronunciation, for both speaking and understanding. It is written mainly for students of intermediate level.

What will I need?

You will need a cassette or CD player to listen to the recorded material that goes with this book. It will be very useful if you have equipment to record your own voice, so that you can hear your own progress. This symbol \( \text{(A1)} \) indicates the track number for recorded material i.e. CD or cassette A, track 1.

Also, when you are studying individual sounds, it is sometimes useful if you have a mirror. With this, you can compare the shape of your own mouth to the mouth in diagrams like this one from Unit 8.

See page 163 for a labelled diagram of the mouth and throat.

How is *English Pronunciation in Use* organised?

There are 60 units in the book. Each unit looks at a different point of pronunciation. Each unit has two pages. The page on the left has explanations and examples, and the page on the right has exercises. The 60 units are divided into three sections of 20 units each. Section A is about how to say and spell individual sounds. Section B is about joining sounds to make words and sentences. Section C is about pronunciation in conversation.

After the 60 units, there is a fourth section, Section D, which contains the following:

- Introduction to phonemic symbols
- Pronunciation test
- Guide for speakers of specific languages
- Sound pairs
- Sentence stress phrasebook
- Glossary

At the end of the book there is a Key with answers.

With the book, there is also a set of four cassettes or CDs, one for each section of the book.

What order shall I do the units in?

It is better if you balance the work that you do from the three sections: first, do a unit from Section A, then a unit from Section B, then a unit from Section C, then another unit from Section A, and so on.

So, for example, you could begin like this:

Unit 1, then Unit 21, then Unit 41, then Unit 2, etc. At the end of each unit, you will find a note telling you where to go next.

If you have problems in hearing the difference between individual sounds in Section A of the book, you will be directed to one of the exercises in Section D4 Sound pairs.
You may want to focus your work more closely. If so, here are more ideas:

- Do the Pronunciation test in Section D. Count your score for each section. If you did specially well in any one of the sections, then you may want to miss the units in that section of the book.
- Look at Section D3 Guide for speakers of specific languages. Find your own language (the languages are in alphabetical order). The notes there will tell you which units are less important for speakers of your language and which sound pairs in section D4 are recommended.

**Do I need to know the phonemic symbols?**

It is possible to use this book without knowing phonemic symbols. However, it is useful to learn them because they make it easier to analyse the pronunciation of words. Also, many dictionaries use phonemic symbols to show pronunciation. In Section D1 Introduction to phonemic symbols, you will find a table of the phonemic symbols, plus a set of puzzles to help you learn them.

**Is this book only about pronunciation in speaking?**

No, it isn't. Pronunciation is important for both listening and speaking. In many of the units, especially in Sections B and C, the pronunciation point is more important for listening than speaking. For example, when they are speaking fast, many native speakers join words together in certain ways. You need to be able to understand this when you hear it, but it does not matter if you do not speak in this way. People will still understand you. Pronunciation points like this are shown with a grey background and this sign:

```
Important
for listening
```

It is your choice whether you want to just focus on listening, or whether you want to try to speak that way too.

**What accent of English is used in this book?**

For a model for you to copy when speaking, we have used only one accent, a Southern British accent. But when you are listening to people speaking English, you will hear many different accents. If you are not used to these, it can be very difficult to understand what is being said. For this reason, you will hear a variety of accents in some parts of the listening material for this book.

**What is the Sentence stress phrasebook?**

It can help you to speak more fluently if you say some very common expressions with a fixed pronunciation, like a single word. In Section D5 Sentence stress phrasebook, some common expressions are given, and they are grouped together by the way they sound: by their sentence stress or rhythm. You can practise listening and repeating these to improve your fluency.

**What is in the Glossary?**

In this book, there are some words which are specific to the subject of pronunciation. You can find an explanation of the meaning of these words in Section D6 Glossary.

**How should I use the recordings?**

When you are working with the recording, you should replay a track as often as you need to. When you are doing an exercise you may also need to pause the recording after each sentence to give you time to think or to write your answers. When you are instructed to repeat single words there is a space on the recording for you to do so, but if you are repeating whole sentences you will have to pause the recording each time.
To the teacher

Although *English Pronunciation in Use* has been written so that it can be used for self-study, it will work equally well in a class situation. In a classroom context, the learners can get immediate guidance and feedback from the teacher. Also, they can practise some of the dialogues and other exercises in pairs. You can direct students with particular pronunciation difficulties to do specific units on their own.

In order to simplify the jargon in the book, many of the terms you may be familiar with are not used. For example, the term *initial consonant cluster* is not used. The unit on initial consonant clusters is called *Unit 24 Oh, no snow!: Consonants at the start of syllables*. The following is an explanation of how the book is organised, ending with the map of contents described in phonological terms.

Section A aims to cover the sounds of English and their main spellings. The units are organised by letters rather than sounds. The intention is that this would be a more intuitive route in for non-specialist users. At the same time, this organisation helps to highlight sound–spelling regularities in English.

The vowels are covered first via the five vowel letters of the alphabet, and their ‘long’ and ‘short’ pronunciations, for example the letter A as in *tape* or *tap*. The remaining vowel sounds are presented as vowels which typically occur before a letter R. The consonant sounds are presented through either their most common spelt letter, or by one of their main spellings. The ordering of these units is more or less alphabetical.

The units in Section A are not presented as minimal pairs. Vowels are paired according to their spelling, not their potential for being confused with one another. Consonants are paired mainly where they share the same place of articulation. The units were not organised as minimal pairs for two reasons:

- Any sound can form a minimal pair with a number of other sounds, not just one. Organising units according to minimal pairs would therefore lead to a huge number of units and a lot of duplication.
- Many minimal pairs will be redundant for any given learner, so learners need to be selective. Potentially confusing minimal pairs are gathered together in Section D4 *Sound pairs*. Learners are encouraged to select from these according to their own needs.

Alternatives are included for those areas of pronunciation which are especially susceptible to variation across different varieties of English. For example, where there is a letter R with no vowel after it, many speakers do not pronounce the R and many other speakers do pronounce it, and both varieties are presented.

Many vowel sounds are treated as local variants of vowel + R. For instance, the diphthong /aʊ/ is initially presented not as a sound in itself, but as a variant of /ə/ when it occurs before R or L.
Some of the pronunciation points in the book are potentially irrelevant to some learners. For instance, for learners whose aim is mainly to communicate with other non-native speakers of English, accurate production of the sounds /T/ and /D/ is probably not necessary. Research suggests that where speakers substitute these sounds with other approximations such as /t/ and /d/, communication is not impeded (Jennifer Jenkins: 2000)*. In many such cases, readers are advised of this fact in the units. These pronunciation points are nevertheless included. My feeling is that a distinction can be drawn between what we aim for and what we settle for. Thus, a learner might aim for /T/ and settle for /t/ (or /s/).

Similarly, even in cases where a learner does aspire to communicate with native speakers, there are many pronunciation features where receptive competence would be sufficient. For instance, such a learner would need to understand speech with weak forms, but not necessarily produce it. This is indicated in the units by a grey background shade and the sign ‘Important for listening’. Nevertheless, there may be exercises which ask the learner to produce such features. I have observed that in many cases, there is no better awareness-raiser than to attempt to produce, even if the aim is receptive competence.

Section B focuses on pronunciation units which are bigger than individual sounds. The units are in three blocks, dealing in turn with syllables, word stress and sentence stress. As the title of the section suggests, these features are looked at more or less in isolation from a communicative context. For instance, in the case of word stress, it is the form as it may appear in a dictionary that is dealt with here. Similarly, in the case of sentence stress, we focus on an unmarked form in Section B. For example, ‘What do you think?’ is presented with the stress pattern OooO. In a specific conversational context, this same sentence could be said with the stress pattern ooOo, but sentences in conversational context are dealt with in Section C rather than Section B.

Section C focuses on pronunciation features which emerge in the context of conversation. These include discourse organisation, prominence and tone. Note that there is a lot of grey shading in this section, indicating material that is more important for listening than for production. It is felt that while productive mastery of many features of intonation will be beyond the reach of many learners, they may nevertheless benefit from a receptive awareness of them.

Note: The material in Section D3 Guide for speakers of specific languages is based on the pronunciation notes in Learner English (Michael Swan and Bernard Smith: 2001)**. Nevertheless, I have had to extrapolate from the information presented there, as many of the minimal pairs presented in this book are not specifically mentioned in the pronunciation notes in that book.
