

## Contents

|  |         |
|--|---------|
| <i>Contributing Authors</i>  | page ix |
| <i>Foreword</i><br><i>Lionel March</i>   | xi      |
| <i>Preface</i>   | xv      |
| <i>Introduction</i>  | xvii    |
| <b>1 Vitruvius Redux</b><br><i>William J. Mitchell</i>   | 1       |
| <b>2 How to Calculate with Shapes</b><br><i>George Stiny</i>   | 20      |
| <b>3 Engineering Shape Grammars</b><br><i>Jonathan Cagan</i>   | 65      |
| <b>4 Creating Structural Configurations</b><br><i>Panos Y. Papalambros and Kristina Shea</i>                 | 93      |
| <b>5 Microsystem Design Synthesis</b><br><i>Erik K. Antonsson</i>  | 126     |
| <b>6 Function-Based Synthesis Methods in Engineering Design</b><br><i>Kristin L. Wood and James L. Greer</i> | 170     |
| <b>7 Artificial Intelligence for Design</b><br><i>Thomas F. Stahovich</i>                                    | 228     |
| <b>8 Evolutionary and Adaptive Synthesis Methods</b><br><i>Cin-Young Lee, Lin Ma, and Erik K. Antonsson</i>  | 270     |
| <b>9 Kinematic Synthesis</b><br><i>J. Michael McCarthy and Leo Joskowicz</i>                                 | 321     |
| <b>10 Systematic Chemical Process Synthesis</b><br><i>Scott D. Barnicki and Jeffrey J. Siurola</i>           | 362     |

|   |     |
|---|-----|
| <b>11 Synthesis of Analog and Mixed-Signal Integrated Electronic Circuits</b> | 391 |
| <i>Georges G. E. Gielen and Rob A. Rutenbar</i>                               |     |
| <b>12 Mechanical Design Compilers</b>   | 428 |
| <i>Allen C. Ward</i>  |     |
| <b>13 Scientific Discovery and Inventive Engineering Design</b>               | 442 |
| <i>Jonathan Cagan, Kenneth Kotovsky, and Herbert A. Simon</i>                 |     |
| <i>Index</i>  | 467 |
