

Contents

<i>Preface</i>	<i>page vii</i>
I Introduction	1
Introduction	3
II Candidate technology assessment	17
1 Solar energy sources	19
2 Biomass energy	67
3 Windpower	113
4 Hydroelectric power	136
5 Energy storage	153
6 Geothermal energy	188
7 Ocean energy	193
8 Nuclear fusion	200
9 Hydrogen fuel from renewable resources	207
III The prospects for technological change toward sustainability	223
10 Summary assessment of the technologies	225
11 Research and development	231
Appendices	259
<i>Appendix A Energy cost analysis</i>	261
<i>Appendix B Glossary</i>	264
<i>Appendix C The conduct and management of research and development</i>	269
<i>Index</i>	279
