

## Contents

<i>Preface</i>	<i>page</i>	vii
1	Classical scattering	1
	1.1 Particle scattering	2
	1.2 Geometric optics	12
2	Scattering of scalar waves	20
	2.1 Spherically symmetric geometry	22
	2.2 The impenetrable sphere	28
	2.3 The high-frequency reformulation	44
3	Scattering of electromagnetic waves from spherical targets	63
	3.1 The electromagnetic formalism	64
	3.2 Vector scattering theory	71
	3.3 Spherically symmetric scatterers	80
	3.4 Measurable quantities	89
4	First applications of the Mie solution	107
	4.1 Small size parameters	107
	4.2 Larger size parameters	115
	4.3 Geometric optics of the transparent sphere	119
	4.4 Perfectly conducting spheres at high frequencies	133
5	Short-wavelength scattering from transparent spheres	141
	5.1 The Debye expansion	144
	5.2 The first Debye term – direct reflection	156
	5.3 The second Debye term – direct transmission	161
	5.4 The third Debye term – internal reflection	167
	5.5 A summary of the first three Debye contributions to the scattering amplitudes	183
6	Scattering observables for large dielectric spheres	187
	6.1 The various efficiency factors	187
	6.2 Meteorological optical phenomena	195

vi	<i>Contents</i>	
	6.3 Theory of the rainbow	201
	6.4 Theory of the glory	211
	6.5 General rainbow and glory scattering	230
7	Scattering resonances	233
	7.1 A preliminary assessment	233
	7.2 Semiclassical potential analysis	241
	7.3 The complex angular-momentum plane	245
	7.4 Properties of the resonances	251
	7.5 Internal and near fields	258
	7.6 Observations and applications	265
8	Extensions and further applications	267
	8.1 Inhomogeneous dielectric spheres	268
	8.2 Incident beams and wavepackets	275
	8.3 Proximate spheres	283
	8.4 Bubbles and $n < 1$	288
	8.5 Nonspherical particles	294
	<i>Mathematical appendices</i>	300
	<i>Appendix A</i> Spherical Bessel functions	301
	<i>Appendix B</i> Airy functions	307
	<i>Appendix C</i> Asymptotic properties of cylinder functions	313
	<i>Appendix D</i> Spherical angular functions	320
	<i>Appendix E</i> Approximation of integrals	334
	<i>Appendix F</i> A note on Mie computations	347
	<i>References</i>	349
	<i>Name index</i>	363
	<i>Subject index</i>	367
