Contents

Editors' introduction page vii
List of contributors ix

Part I. Dynamic structural modeling

1. Efficient instrumental variables estimation of systems of implicit heterogeneous nonlinear dynamic equations with nonspherical errors
Charles Bates and Halbert White 3
2. Envelope consistent functional separability
Ernst R. Berndt 27
3. Flexible functional forms for profit functions and global curvature conditions
W. Erwin Diewert and Lawrence Ostensoe 43
4. Likelihood inference in the nonlinear regression model with explosive linear dynamics
Ian Domowitz and Lars Muus 53
5. Exact inference in models with autoregressive conditional heteroscedasticity
John Geweke 73
6. Control of a linear regression process with unknown parameters
Nicholas M. Kiefer and Yaw Nyarko 105
7. Some tests of nonparametric regression models
Adonis John Yatchew 121

Part II. Linear time series modeling

8. A central-limit result for instrumental variables estimators of linear time series models
Lars Peter Hansen 139

Table of Contents

[More information](#)

vi	Contents	
	9. Exact and approximate distribution of the t ratio test statistic in an AR(1) model <i>Alberto Holly and Georg Michael Rockinger</i>	157
	10. The use of ARIMA models in unobserved-components estimation: an application to Spanish monetary control <i>Agustín Maravall</i>	171
	Part III. Chaotic attractor modeling	
	11. The aggregation-theoretic monetary aggregates are chaotic and have strange attractors: an econometric application of mathematical chaos <i>William A. Barnett and Ping Chen</i>	199
	12. Theorems on distinguishing deterministic from random systems <i>W. A. Brock and W. D. Dechert</i>	247
	Part IV. Applications	
	13. Investment and sales: some empirical evidence <i>Andrew B. Abel and Olivier J. Blanchard</i>	269
	14. Me and my shadow: estimating the size of the U.S. hidden economy from time series data <i>Dennis J. Aigner, Friedrich Schneider, and Damayanti Ghosh</i>	297
	15. Estimating structural models of unemployment and job duration <i>Dale T. Mortensen and George R. Neumann</i>	335
	16. Comparison of dynamic factor demand models <i>Peter E. Rossi</i>	357
