

## Index

NOTE: page numbers in *italic* type refer to figures, page numbers in **bold** type refer to the glossary and page numbers followed by 'n' refer to notes.

- agents, xv, 68, 72  
 analog and digital skills, 46–7, 60–1, 62–4  
 arithmetic, Nico's abilities, 44, 53–4
- Bach y Rita, P., 28  
 bodily-kinesthetic intelligence, 28–9,  
 54–5
- brain  
 broken symmetry of, 66–8  
 compared with computers, 17–18  
 development of, 20–4, 93–4n.2  
 link with development, 78, 88–90  
 link with education, 12, 78, 78–84  
 link with WWW, 12–13, 58  
 models of, 14  
   on Internet, 10, 92–3n.4  
   virtual reality, 14–15, 16  
 quantitative measurement of, 18–19  
 brain images, xv, 5, 6, 10  
 brain lateralization studies, 74  
 brain lesions *see* lesion analysis  
 brain wide web (bww), 12, 58  
 brain/mind controversy, 10–12  
 brainpower  
   and efficiency, 31  
   measuring, 10–12, 18–20, 24  
 BRED triad, 78
- case histories, 3  
 catastrophe theory, xv, 82  
 Changeux, Jean-Pierre, 88  
 Chatenay, Valentine, 3  
 Chomsky, Noam, 74–5  
 Churchland, Patricia Smith, 29  
 Churchland, Paul M., 29  
 class inclusion tests, 46, 69–70, 71  
 cognitive development  
   and brain development, 22, 23–4,  
   93–4n.2  
 debate about, 74–5  
*see also* developmental tests; mental  
 development

INDEX

- cognitive equilibrium, 75
- cognitive illusion, xv, 11–12
- cognitive pathways, 71–3, 80, 81–2
- cognitive skills
- analog and digital, 46–7, 60–1, 62–4
  - and brain development, 93–4n.2
  - developmental tests, 45–6, 68–74
  - Nico's abilities *see* Nico
  - spatial perception and representation, 47–8
- Comenius, Jan Amos, 77, 84
- compensatory analysis, xv, 30–5, 72–3
- computer aided surgery, 15, 16
- computers
- compared with brain, 17–18
  - and cortical shift, 56–7, 60–5
  - as information prostheses, 40
  - as intellectual prostheses, 12, 51, 56–7, 59–65
  - links with environment and people, 57–8
  - Nico's use of, 50, 58–9, 62–5
    - access, 39–40, 65, 85
    - email, 51–2, 83–4
    - examples, 41–4
    - first experiences, 36–8
    - word processing, 40, 41–4, 82–3
  - see also* word processing; World Wide Web
- concrete operations, 68–71, 72–3
- connection prism, xv, 57–9
- Connes, Alain, 17
- conservation tests, 45–6, 68–9, 70–1, 74
- Corballis, Michael C., 7, 9
- cortical shift, xv–xvi, 56–7, 60–5
- cyclopean vision, xvi, 33–5
- Damasio, Antonio, 1–2, 25, 26, 27
- Damasio, Hanna, 25, 26, 27
- Dehaene, Stanislas, 17
- Dennett, Daniel C., 51
- Dennis, Maureen, 7–8
- Deonna, Thierry, 4
- development *see* cognitive development; mental development
- developmental tests, 45–6, 48, 68–74
- digital and analog skills, 46–7, 60–1, 62–4
- digital education, 85–6
- digital shift, xvi, 46, 60–1
- Donaldson, H.H., 19
- drawing
- analog and digital, 46, 60–1, 62–4
  - hand and speech activated, 60–1
  - Nico's abilities, 40, 46–7, 48, 49, 53, 62–4
- Eccles, John C., 7, 29
- education
- digital education, 85–6
  - link with brain, 12, 78, 78–84
  - link with development, 78, 84–8
  - Nico's experience of, 38–40, 79, 85, 86
