## INDEX

- Abstraction, 39  
 Allen, R. G. D., 187n.  
 Analytic statements  
   definition, 5–7  
   *ceteris paribus* statements as, 33–4,  
   37–8  
   critique of empiricist notion of, 148–52  
   and empirical statements, 140–4  
   and theory, in positivism, 71–2  
 Analytic-synthetic distinction, 38, 56,  
   110–11  
   definition, 5–10  
   historical background of, 67–71  
   in macro-economic theory, 144–8  
   and positivist account of theory, 71–5  
   and positivist method, 40  
   and relation of facts and theory, 107  
*A priori* knowledge, 140–63  
 Assumptions  
   define conditions for application of  
   models, 224  
   in neo-Classical theory, 205–32  
   realism of, 16, 33, 38–9, 188, 197–200  
   testing implications of, 40–2  
 Atomic facts, 104  
 Atomism, 19–20, 24, 155, 264–6  
 Axioms  
   defined, 179  
   in rationalism, 13, 149–50  
   as self-evident truths, 181, 204  
 Ayer, A. J., 75n., 143n.  
   and logical positivism, 5n.  
 Bacon, F., 68, 71, 74, 88, 106, 170  
 Bennett, J., 119n.  
 Behaviourism, 64, 114–29  
 Black-box problems, 175–6  
 Brody, A., 3n., 23n.  
 Burke, E., 49, 51  
 Capital  
   Cambridge vs. neo-Classical school,  
   203  
   J. B. Clark, 19  
   concept of, 105  
   as fundamental concept, 245  
   measurement of, 255  
   neo-Classical vs. Classical-Marxian  
   notions, 18–19, 141  
   and rate of interest, 229  
   scarcity and market for, 216  
   and techniques of production, 223  
   valuation of, 231–2  
 Carnap, R., 104n., 143n.  
 Causality, *see also* Laws and Correlations  
   in empiricism, 4–8  
   in positivism, 56–8  
   in rationalism, 69, 71  
*Ceteris paribus* clauses, 40–1, 43  
   and dynamic adjustment, 29–32  
   and prediction, 90–4  
   and rational behaviour, 52  
   and testing theory, 25, 27–8, 37, 40  
 Chess, 89ff., 184  
 Clark, J. B., 19  
 Class relationships, 3  
   as normative distinction, 50  
   and prediction, 19  
 Classical-Marxian tradition  
   key questions in, 13–14  
   measurement of inputs, 255  
   schema of, 16–17, 206–9, 256–8

## RATIONAL ECONOMIC MAN

- Cobweb cycle, 31
- Comparative statics, 31–2, 52, 213
- Competition  
 perfect, 228; as ideal type, 41, 230;  
 and frictionless motion, 43–6; vs.  
 imperfect, realism of, 197–9  
 and prediction, 133  
 in programming models, 133–4
- Compte, A., 48, 143n.
- Consumer sovereignty, 24, 120
- Consumption spending, predictability of, 261
- Consumption-growth tradeoff, 262–4
- Copi, I., 178n.
- Correlations  
 and causal laws, 13, 58–9, 67, 71, 78–9  
 and prediction, 80  
 and probability, 76–7
- Correspondence Principle, 31–2, 34
- Counter-factual conditionals, 80, 108
- Critical statements  
 defined, 96  
 and interrelation of terms, 102–4  
 and neo-Classical assumptions, 224  
 in Reproduction schema, 188–9  
 and testing, 25–8, 111–12
- Cyert, R. M., 61n.
- Data-language, 104–6
- Debreu, G., 2n.
- Deduction, 10  
 in M. Friedman, 200  
 in positivist method, 8  
 problem of, 12–13  
 in rationalism, 70–1  
 in L. Robbins, 202
- Deductive model of explanation, 171–87
- Definitions, *see also* Data-language  
 interdefined, 102–4, 156–8  
 operational, 100–2  
 ostensive, 109–11  
 in positivism, 12, 151  
 in rationalism, 177–81  
 L. Robbins, 202, 204
- Demand curve, 28ff.
- Descartes, R., 68, 69n., 71, 172, 179
- Determinism, 171–2, 187
- Dorfman, R., 130n.
- Dummett, M., 150n.
- Durbin, E., 29n., 130n.
- Econometrics, *see also* Identification  
 problem, Specification problem  
 Klein-Goldberger model, 124  
 measurement error in, 25, 28, 29, 32,  
 43, 100, 102, 109, 129  
 and theory, 52, 67, 74, 129, 111–13
- Efficiency  
 in allocation of income, 260, 263–4  
 production vs. marketing, 217–23
- Ellman, M., 23n.
- Empirical tests, *see* Testing
- Empiricism  
 and analytic vs. empirical statements,  
 140–4  
 definition of, 4  
 facts in, 104–5  
 tenets of, 3–10  
 theory in, 110
- Engel's Law, 202
- Equilibrium  
 analysis vs. structural analysis, 228  
 condition, 102, 146–7  
 in exchange, 259  
 in Keynesian model, 121  
 model, untestable, 231  
 neo-Classical vs. Classical-Marxian  
 notions of, 258  
 and reproduction, 251
- Ethics, *see* Normative statements
- Euler, 187
- Evans-Pritchard, E. E., 95, 111
- Exchange  
 defined, in reproduction model, 192–4  
 as fundamental concept, 244  
 neo-Classical vs. Classical-Marxian  
 notions of, 210, 258  
 payments to factors as, 206, 208,  
 216–17, 255–6  
 in production model, 253–4
- Explanation, *see also* Deductive model of  
 explanation  
 in empiricism, 5, 71–5, 112  
 and prediction, 38, 117–18, 138, 184,  
 186–7  
 in rationalism, 57, 58, 67–71, 175–7  
 and causality, 187
- Exploitation, 210, 215, 216
- Facts  
 atomic, 104–6, 135n.  
 and theory, 80–1
