curare
 action on the postsynaptic potential, 548
 action on the presynaptic potential, 548
- Curtis, H.J., 441
cylindrical cell
 analysis of transients, 635
 electric parameters, 638
 measuring electrical parameters, 631
cylindrical coordinates, 99
- Dainty, J., 217
Dale, Sir Henry, 540
Daniell cell, 286
Daniell, J.F., 286
Debye, P., 325
Debye length, 325
del Castillo, J., 551, 556, 570, 571
Denbigh, R., 238
depolarization, wave of, 485
derivative, 3
 definition, 4
 differential quotient, 4
 geometric definition, 4
 list of important function, 6
 of the inverse function, 10
 second derivative, 5
 the chain rule, 9
 typographical convention, 4
Dick, D.A.T., 255
differential, 8
 definition, 8
differential calculus, 2
diffusiom
 diffusion equation when $C \equiv C(x, y, z, t)$, 78
diffusion
 characteristic features, 70
 concentration profile and boundary values, 81
 condition of mass conservation, 77
 cylinder covered by a thin membrane, 107
 cylinder with mass consumption, 106
 driving force, 206
 equilibrium- and stationary/quasistationary states, 80
 factors which determine the flux, 72
 in cylinder with radial symmetry, 99
 Krogh's constants for frog muscle, 98
 Krogh's constant of diffusion, 98
 Krogh's cylinder, 108
 membrane covered sphere with interior mass consumption, 115
 molecular description, 140
 of O₂ in a tissue with consumption, 95
 phenemological description, 70
 plate covered with a thin layer, 89
 spectrum of displacements in time t , 143
 sphere with radial symmetry, 111
 stationary, 80

- diffusion (*contd.*)
 stationary diffusion through a cylindrical shell, 103, 114
 statistical point of view, 143
 the diffusion equation, 77
 through two different media, 84
 with concurrent mass production, 79
- diffusion
 concentration profile varies with time and distance, 73
- diffusion and migration superimposed, 181
- diffusion cell, 70
- diffusion coefficient, 74
 and mechanical mobility, 201
- diffusion coefficient and 'random walk' considerations, 153
- diffusion coefficient, temperature dependence, 179
- diffusion equation
 adjusting the constants, 82
 general solution, 82
 in cylinder with radial symmetry, 101
 sphere with radial symmetry, 112
 sphere, stationary diffusion with radial symmetry, 114
 stationary diffusion with radial cylindrical symmetry, 102
- diffusion potential
 the Planck regime, 342
 a binary electrolyte, 337
 between solutions of different composition, 341
 electric mobilities, 341
 elimination using KCl salt bridge, 339
 Planck's expression, 348
 Planck's general relations, 343
 qualitative description, 336
 salt bridge once more, 351
 separation of positive and negative space charges, 337
 single binary electrolyte, 339
 the Henderson regime, 349
 use of salt bridge, 338
- diffusion through a plate, 81
- dimensionless potential, 273
- distribution coefficient, 209
- Donnam regime, collapse of, 336
- Donnan, F.G., 313
- driving force, 67, 68
- Du Bois-Reymond, E., 414
- Duhamel, J.M.C., 126
- dummy variable of integration, 119
- Dutrochet, R., 233
- Einstein, 145, 169, 202
 Einstein's relation, 269
 Einstein, A., 140
 Einstein-Smoluchowski equation, 169
 Einstein-Smoluchowski relation, 156, 202
 Einstein-Stokes' relation, 204
 Einstein relation, 203, 272
 electric charges, 260
 electric conductance, 268
 electric conductance, S.I. units, 268
 electric current density, 267
 electric current, carried by a flux of ions, 267
 electric equivalent circuit of the Planck regime, 346
 electric field, 262
 electric field, action on ions, 266
 electric mobility, 267
 electric potential, 263
 electric potential gradient and field, 265
 electric resistance, 268
 electrochemical equilibrium, 277, 279
 electrochemical potential, 273, 316
 electrode current, 295
 electrode potential, kinetic treatment, 291
 electrode potentials, 289
 electrodes, types of, 288
 electrodiffusion equations, 274
 electrodiffusion through membranes
 a single salt, 353
 diffusion potential, 354
 electroneutrality, 359
 equivalent diagram for a single salt, 358
 membrane resistance, 356
 resistance of a single pore, 356
 electromotive force, 286
 electroneutrality, departure from, 276
 electroneutrality, macroscopic, 259
 electrostatic force, Coulomb's law, 261
 elegance
 Boltzmann and Einstein on, 61
- end-plate
 action of prostigmin, 555
- end-plate, 542
 choline acetyltransferase, 543
 postsynaptic potential, 546
 presynaptic potential, 546
 structure, 542
 synaptic delay, 546
 terminal longitudinal axon current, 545
- end-plate potential, 548, 549
 antagonistic effects of Ca^{2+} and Mg^{2+} , 571
 action of curare, 548
 block caused by increased Mg^{2+} , 571
 block caused by reduced Ca^{2+} , 571
 effect of spider venoms, 582
 effect of sustained depolarization, 582
 passive axial spread, 553
 quantal fluctuations, 573
 time course, 553

- end-plate potential and acetylcholine
 direct exposure to end-plate, 551
 end-plate potential and acetylcholine,
 549
 direct exposure to end-plate, 550
 energy barrier separating initial and final
 states, 176
 energy of activation, 175
 Engbaek, L., 571
 equilibrium potential, 277, 279
 Erf (x) and Erfc (x), 586
 erythronium, 555
 Euler, L., 22
 Euler, Ulf v., 541
 excitability, 411
 exponential function, 24
 derivative, 25
 integral, 25
 series expansion, 31
- Falk, G., 544
 Faraday's constant, 267
 Faraday, M., 411
 Fatt, P., 555
 Fatt, P., 554, 565, 569, 572, 623
 Feldberg, W., 541
 Fick's law, 74, 75, 83
 derivation, 74
 Fick's law and Brownian motion
 a more exact derivation, 164
 Fick's law in cylinder with radial symmetry,
 100
 Fick's second law, 78
 Finkelstein, A., 256, 257
 Fitzhugh, R., 524
 Flaherty, B.P., 528
 flux, 65, 69
 flux ratio and convective diffusion, 409
 flux ratio and electrodiffusion, 406
 flux ratio criterion, 405
 flux ratio, sign convention, 228
 Fokker, D.A., 195
 FORTRAN 77 program for Erf (x), 587
 Fourier, J.B.S., 494
 Frankenhaeuser, B., 453
 Franklin, B., 261
 freezing point depression, 250
 freezing point depression and osmotic
 pressure, 251
 Frenkel, J., 176, 246
 friction coefficient, 67
 frictional force, 67
 frog muscle fiber, 544
 action potential, 544
 active Na^+/K^+ transport, 399
 changing extracellular K^+ -concentration,
 397
 changing extracellular Na^+ -concentration,
 398
 constant $C_{\text{Cl}}^{(o)} \times C_{\text{K}}^{(o)}$ product, 392
 coupling ratio of active Na^+/K^+ transport,
 400
 electrogenic/electroneutral pump, 403
 equilibrium potentials of Na,K and Cl-ions,
 390
 input impedance of preamplifier, 387
 internal longitudinal resistance, 545
 length constant, 545
 membrane conductances of Na,K, and
 Cl-ions, 391
 membrane potential, 384, 387
 membrane potential convention, 385
 membrane time constant, 545
 microelectrode for impalement, 385
 modes of stimulation, 544
 origin of membrane potential, 388
 resting membrane potential, 544
 Ringer's solution, 386
 tail of action potential, 544
- function, 2
 approximate expansion, 32
 chain rule for partial derivatives, 47
 compound, 9
 continuous, 3
 dependent variable, 2
 discontinuous, 3
 first-order approximation, 32
 geometrical representation, 40
 increment approximated, 6
 independent variable, 2
 integration using approximate
 expansion, 32
 inverse, 2
 L'Hospital rule, 33
 of several variables, 38
 partial derivatives, 41, 42
 partial total differential, 44
- Fürth, R., 188
- Galvani, L., 413
 galvanic cell, 286
 gas constant, 281
 gas tension in a liquid, 97
 gas, concentration of molecules dissolved in a
 liquid, 95
 Gauss, C.F., 61
 Gerard, R.W., 386, 430
 giant axon of squid
 resting membrane potential, 428
 threshold depolarization, 439
 action potential intracellular recording, 428
 conductance changes attending the action
 potential, 441
 diameter, 427

- giant axon of squid (*contd.*)
 effect on action potential by changes in external Na^+ -concentration, 443
 extra- and intracellular ionic content, 431
 internal current electrode is anode, 439
 internal current electrode is cathode, 437
 membrane potential and Goldman regime, 432
 perfused axons, 445
 ratio of permeabilities $P_{\text{Na}}/P_{\text{K}}/P_{\text{mCl}}$, 433
 resting membrane potential, 431
- giant axon of *Sepia*
 mobility of K^+ in axoplasm, 434
- Gibbs function, for a pure substance, 239
- Gibbs, J.W., 238, 313
- Gibbs–Donnan equilibrium, 313
 concentration and potential profiles, 322
 criteria of equilibrium thermodynamics, 316
 Donnan potential, 315
 Donnan ratio, 315
 heuristic argument of, 315
 high polyelectrolyte concentration, 321
 incorporating the macroion, 319
 low polyelectrolyte concentration, 320
 macroscopic electroneutrality, 319
 neglecting individual ionic activities, 318
 osmotic pressure difference between phases, 321
 osmotic pressure in, 318
 Poisson–Boltzmann equations, 326
