Contents

		page
	List of contributors	vii
	Preface	ix
1	Self-integration – an emerging concept from the fungal mycelium *A. D. M. Rayner, Z. R. Watkins and J. R. Beeching*	1
2	Nutrient translocation and electrical signalling in mycelia *S. Olsson*	25
3	Colony development in nutritionally heterogeneous environments *K. Ritz and J. W. Crawford*	49
4	Circadian rhythms in filamentous fungi *M. Ramsdale*	75
5	Growth, branching and enzyme production by filamentous fungi in submerged culture *A. P. J. Trinci, S. Bocking, R. J. Swift, J. M. Withers, G. D. Robson and M. G. Wiebe*	108
6	Metabolism and hyphal differentiation in large basidiomycete colonies *S. Watkinson*	126
7	Role of phosphoinositides and inositol phosphates in the regulation of mycelial branching *G. D. Robson*	157
8	Stress responses of fungal colonies towards toxic metals *L. M. Ramsay, J. A. Sayer and G. M. Gadd*	178

Table of Contents
More information

9 Cellularization in *Aspergillus nidulans*
J. E. Hamer, J. A. Morrell, L. Hamer, T. Wolkow and M. Momany 201
10 Genetic control of polarized growth and branching in filamentous fungi
G. Turner and S. D. Harris 229
11 Mating and sexual interactions in fungal mycelia
G. W. Gooday 261
12 Genetic stability in fungal mycelia
M. L. Smith 283
13 Nuclear distribution and gene expression in the secondary mycelium of *Schizophyllum commune*
J. G. H. Wessels, T. A. Schuurs, H. J. P. Dalstra and J. M. J. Scheer 302
Index 326
