

## Subject index

---

- adiabatic gas law, *see* gas law  
 air spring, 27  
 approximation, 74–5, 114–15, 130, 139
- bicycle, 1, 4  
 buffer, hydraulic, 25–8
- case studies, 2, 3, 46–8  
 case studies, assessment of, 56–8  
 case studies, creation of, 49, 50–2  
 case studies, mathematical content of, 51  
 case studies, objectives of, 46, 50  
 case studies, student reaction to, 54–6  
 case studies, use of, 3–4, 52–4  
 centrifugal pumping, 126  
 compound interest, 82  
 computer algebra, 40  
 constraints, mathematical, 33–7, 75  
 Crank–Nicholson, 156  
 curve fitting, least squares, 97–8, 101–2
- data, accuracy of, 21, 27–8, 39, 130  
 data, incompleteness of, 39, 49, 101, 129, 130  
 data, reciprocal principle of, 39, 44, 129, 130, 157  
 data collection, 39, 129, 157  
 differential equation, 73, 127, 149, 150, 152–4  
 diffusion equation, 149–56
- elliptic integral, 36  
 energy, conservation of, 71  
 engineering mathematics, degree in, 42–3, 52  
 estimation, 27–8, 139–40  
 examinations, backwash effect of, 43, 44, 57
- flowers, 38  
 four bar linkage, 72, 110
- gas law, adiabatic, 25
- groups, working in, 3, 46, 49–50, 53  
 guided reading, 1
- human body, *see* body  
 hydraulics, 25–8
- industry, use of mathematics in, 2, 6–10, 42, 44–6  
 integration, numerical, 36, 73, 127, 131, 154–6  
 iterative methodologies, 12–17  
 iterative refinement of models, 28–33
- Laplace transform, 153–4  
 law, Jewish, 38
- machine interference, 98–100  
 mathematical judgement, 14, 45, 55  
 mathematical modelling skills, need for, 6–10, 43–6  
 mathematical modelling, learning, 4  
 mathematical modelling, methodology of, 10–18, 20–3  
 mathematical modelling, nature of, 2, 7–9  
 mathematical modelling, non-mathematical content of, 44–5, 53  
 mathematical modelling, practical aspects of, 24–40  
 mathematical modelling, teaching of, 48, 51, 53–4, 56  
 mathematical modelling, tools for, 40  
 mathematics in industry, use of, *see* industry  
 mathematics teaching to engineers, 41  
 mathematics teaching, objectives of, 1, 46  
 mechanics, 1, 71–3, 110–13, 123–9  
 methodology of modelling, complex linked, 20–3  
 methodology of modelling, iterative, 11–17  
 methodology of modelling, linear, 10–12  
 methodology of modelling, use of, 4, 23  
 methodology, systems, 18–20  
 models, working, 28
