

CONTENTS

<i>Preface</i>	<i>page</i> ix
1 THE COMPLETENESS OF THE REALS	1
1.1 The Axiom of Completeness	2
1.2 Infima and suprema	8
1.3 Postscript on the axioms for \mathbf{R}	11
2 NULL SETS	15
2.1 Countable sets	15
2.2 Null sets	18
2.3 Cantor's ternary set	20
3 THE LEBESGUE INTEGRAL ON \mathbf{R}	22
3.1 Step functions	23
3.2 Construction of the Lebesgue integral	30
3.3 Relation to the 'definite integral'	44
3.4 Relation to the 'indefinite integral'	54
3.5 Some further results	63
4 THE LEBESGUE INTEGRAL ON \mathbf{R}^k	70
4.1 Step functions on \mathbf{R}^k	70
4.2 The Lebesgue integral on \mathbf{R}^k	77
4.3 Fubini's Theorem	83
5 THE CONVERGENCE THEOREMS	93
5.1 The Monotone Convergence Theorem	94
5.2 The Dominated Convergence Theorem	106
6 MEASURABLE FUNCTIONS AND LEBESGUE MEASURE	119
6.1 Measurable functions	119
6.2 Lebesgue measure on \mathbf{R}^k	124
6.3 The geometry of Lebesgue measure	134
6.4 Transformation of integrals	146

Cambridge University Press

978-0-521-09751-2 - Lebesgue Integration and Measure

Alan J. Weir

Table of Contents

CONTENTS

7 THE SPACES L^p	<i>page</i> 162
7.1 The completeness of \mathbf{R} as a metric space	162
7.2 The spaces L^p	164
7.3 The geometry of L^2	172
7.4 Bounded linear functionals on L^2	181
7.5 Orthonormal sets in L^2	188
7.6 Classical Fourier series	202
7.7 Reflections on Hilbert space	219
 <i>Appendix</i> The elements of topology	223
 <i>Solutions</i>	241
 <i>References</i>	277
 <i>Index</i>	279
