McCormick, Cyrus H., 200, 201, 205, 217n.1, 235, 237
McCormick reaper, English trial of, 1851, 281; see McCormick, Cyrus H.; mechanical reapers; reaping machines
McGouldrick, Paul F., 107n.3, 119n.1, 120n.2, 124n.2, 129n.1, 134n.1, 153n.2, 176, 177, 178, 180n.1, 190n. to table
McFadden, D., 41n.1
machinery: and endogenous technical progress, 105; maintenance, 225, 247; service lives, 176–8, 259; in U.S. textile industry, 100, 125–6
machine tools, 82, 84; ‘learning’ in production of, 104
McKinnon, Ronald I., 95n.1, 98n.2, 107n.1
Malinvaud, E., 140n.3
manifest techniques, defined, 68
maritime trades, 97
Markov chain: and statistical mechanics, 76n.2; and technological progress, 72n.2, 76; ergodic, 78n.1
Markov property, defined, 72n.2
Marshall, Alfred, 7, 12, 78
Massachusetts, cotton industry in, 129–31
Massachusetts Hospital Life Insurance Company, 108
Massachusetts-type (cotton mill), 107–8, 129–33
mechanical engineering, 38–9
mechanical invention, 80
mechanical reapers, 89; diffusion in Britain, 235–75 passim; in Midwest, 90; self-reke type, 213–14; see reaping machines
mechanical machines: a paradigm for economics, 9, 11–13; statistical, 76n.2
mechanization: degree of, 22; of reaping in Britain, Ch. 5 passim; of reaping in Midwest, 202–20
mechanization-cum-improvement, 250–70 passim
Mehdi, J. J., 240–1
Merrimac Mill, 171
Meyer, John, 292n.1
Midwest (U.S.), 3; agriculture in, 95–9; economy of, 90–1
Mill, J. S., 97
Mingay, G. E. (and J. D. Chambers), 234n.1, 251n.2, 257n.1, 268n.1, 271
Mitchell, B. R., 282, 284, 287
modern economic growth, historical character of, 16
monopoly, over information, 85–6
monopsony power: of Blackstone Co. in labor market, 146–7; of employers and labor training, 150
Montaigne, M., Eyquem, Seigneur de, 13
Montgomery, James, 20n.1, 21
Moody, Paul, 126
Moscrop, W. J., 239n.2, 281
mowing machines, 199n.3; in Britain 239n.2; see reaper-mowers
mule spinning equipment, 88
Murphy, G. S., 247n.1
National Armories, U.S., 112
natural resources, 87; see labor-scarcity; Rothbard–Habakkuk thesis
Navin, T. R., 106n.1, 109n.1
Nelson, R. R., 58, 71n.1, 76n.1
Index

331

Nerlove, Marc, 41n.1, 292n.1, 309n.1, 312, 313n.1
neutral inventions: Hickian definition, 65n.1; Salter definition, 65n.1
‘new’ economic history, 10, 11, 15, 99, 100, 291, 293
Newton, Isaac, 13
New York State Barge Canal, 297
Nold, F. J., 73n.1
Non-Intercourse Act, 97
North, Douglass C., 99n.1
Northumberland, 241

quality of labor-force, 209–10; measuring changes in, 122–4, 169–73
quasi-neutrality, 59–70; of innovations, 7; defined, 69–70; and non-Markov processes, 72n.2
railroad, 7; construction effects, 206, 295, 304; economic impact, 3, 291–314
passim; freight charges, 227
railroad transportation: agricultural freight, 294–7; passenger, 296
rails, production of, 295
random walk, 70–80 passim; impeded, 79, 80–1; symmetrical, non-stationary, 72
Rapping, Leonard, 104, 113n.1, 116n.1, 175n.1
rate of investment, 23
rate of return: in America and Britain, 27; on investment in farm mechanization, 257–69 passim
reaping hook, labor productivity with, 285–6

reaping machines, 3; adoption in America, 195–231 passim; diffusion in Britain, 236–7; manual sheaf-delivery or ‘hand-rake’, 223, 225, 236, 257; prices of, 226–7, 259, 267, 287–8; production of, 199–200; ‘self-rake’ sheaf delivery, 223, 225, 226, 289n.2; swath-delivery, 259n.2, 270–1; see Bell reaper; Hussey reaper; McCormick reaper; reaper-mower reaper-mower, 199, 226
redundant experience, 117; defined, 112; in cotton textile production, 152, 154–60
Reese, J. E., 99n.1
representative innovator, 77–8
‘reswitching’ of techniques, 28
332 Index

reversible scale effects, in cotton textile production, 142–4
Rhode Island-type spinning mill, 129 ‘Ricardo effect,’ 265–8, 273
ridge-and-furrow, 238, 274; see farm terrain
risk-aversion, 255–6, 272
Robertson, Ross M., 201n.2, 222n.1, 224n.1
Rogin, Leo, 198n.3, 300n.1, 202n.1, 204, 205n.1, 210n.1, 215n.2, 222, 223, 224, 225n.1, 226n.1
Rosenberg, Nathan, 21n.1, 27, 33n.2, 34n.1, 35n.1, 36, 37n.1, 38, 59, 82, 83, 84n.1, 88
Rosovsky, Henry, 3n.1
Rostow, W. W., 196n.2, 295
Rothbard, Erwin, 19–89 passim
Russell, Lord Robert, 215 rye, see grain
Saco–Lowell (machine) shops, 106n.1
Salter, W. E. G., 34, 35n.2, 58, 63–5, 86, 245n.1, 246n.2, 249, 256n.1, 266
Samuelson, P. A., 13n.1, 28n.1, 32, 34n.1, 44n.2, 46, 47n.1, 49n.1, 50, 53
Sandberg, Lars, 88
Saul, S. B., 222n.1
Saville, John, 234n.1
scale of production, and farm mechanization, 204, 207–12; see economies of scale; decreasing returns; diseconomies of scale; increasing returns; threshold scale
Scheiber, Harry W., 297n.1
Schmookler, Jacob, 37
Schuette, H. L., 71n.1
scythe, labor productivity with, 285–6 self-rakers, see mechanical reapers service life (machinery), 176–8, 259; see depreciation rate
Shannon, Fred A., 208n.1
sharing, of farm equipment, 208
Shaw, E. S., 107n.1
Sheshinski, Eytan, 105, 113n.1, 175n.1
sickle, labor productivity with, 285–6 simple mechanization: defined for grain harvesting, 265; threshold acreage (Britain), 260, 262n.4
Slater, Samuel, 109
Slight, James, 242, 287
Smith, Adam, 15
Smith, T. C., 160n.1
’social savings,’ attributable to railroad, 293–310
Socrates, 13
‘Solovian jelly,’ 189n.1
Solow, Robert, 161, 178n.1
Spaventa, Luigi, 28n.1
Spence, Clark C., 240n.6, 250n.2, 254n.1, 270n.1
spill-over, technical, 54–5, 60, 67
spindles: as measure of capacity, 124, 131; in operation, 172; basis of capital input index, 124–5
spinning: fine English yarn, 98n.2; integrated with weaving, 98
spinning mills, Rhode Island type, 129, 133 steam ploughing, 270; in Britain, 241 steam railroads, U.S.: capital stock, 310–11; earnings, 310; freight ton mile age, 297; growth of real output, 301–2; revenues, 296, 310; social rate of return, 311–14; ‘social saving,’ 293–310
Stephens, Henry, 286
stitches (in Suffolk), 239–40
Stettler, H. Louis, 99, 100, 119, 120n.1, 121n.1, 122n.1, 124n.1, 125n.1, 126n.1, 128, 129n.1, 130n. to table, 131n. to table, 132, 152n.1, 172n. to table, 179n.2
Stiglitz, Joseph E., 55, 57, 59, 61n.2
stooping, see binding and stooping
Strassman, W. Paul, 165n.2
strategic bombing, theory of, 293–4, 302 structural changes, in economic relationships, 14
Suffolk, 239, 240
’take-off,’ of American economy, 295 Tariff Act (1816), 98; (1828), 135; (1833), 167
tariff policy, U.S.: evaluation of, 95–113; redistributed income, 168
tariff protection: advocated by Hamilton, 30; proponents of, 29
taussig, F. W., 95–8, 101, 103, 124n.1, 168
Taylor, Frederick W., 84n.1
Taylor, George R., 292n.1
Taylor, John, 286
technical change: capital-augmenting, 165; embodied, 188–9, 190–1; factor-augmenting taxonomy, 189n.2; ‘neutral,’ 175
technical complementsaries, in cotton mills, 124; see technical interrelatedness
technical ’imbalances,’ 83–5
technical interrelatedness, 3; among production activities, 81; in grain farming, 244–57; in textile mills, 124, 245–46; between transportation and storage, 296–99; source of quasi-neutrality in learning effect, 77, 81–6
Index 333

technical progress, see technological progress

technical stagnation, 100

techniques of production: as linear processes, 62; latent set, 63, 68; manifest set, 68

technological change: evolutionary drift, 61; factor-augmenting effects, 40–44; factor-saving bias, 31n.1; interaction with locational change, 217–18; rate of, 32; see technological progress

technological information, effects of monopoly over, 85–6; see patents

technological innovation: contribution to economic growth, 291–3, 307–14; response to engineering challenges, 83

technological leadership, 248

technological practices, travelers’ descriptions, 21–2, 24

technological progress, 1; capital-deepening bias, 33, in U.S. economy, 55; control over, 4; embodied v. disembodied, 178, see ‘embodiment hypothesis’; endogenous through ‘learning,’ 113, bias of, 189–90; evolutionary process, 69, 76; labor-saving bias, 61; localized, 54–5, in capital-intensive region, 57, neutrality of, 65, 68–86 passim; neoclassical conception, 52–3, 57; stochastic process, 68–9, non-Markovian, 81, random walk, 70–80; rate of, 37, 118; see diffusion; innovation; invention; learning by doing; productivity growth; technical change

technological retrogression, 56–7

technological stagnation, in American textile machinery, 100, 165

Temen, Peter, 10n.1, 21n.1, 24–6, 28–30, 31n.1, 87, 99n.1, 174n.1, 195n.1, 205n.3, 234n.2, 291n.1

tenancy, effects of, 253, 254; see land tenure

textiles, U.S. tariffs on, 96–101; see cotton textiles

textile industry, technical progress in, 48; see cotton textile industry; woolens industry

textile machinery industry: Lawrence Co., 176–8; Southern New England, 109–10; shops in New England, 106

Thomas, Keith, 29n.1

Thompson, F. M. L., 251n.2, 252n.1, 257n.3, 264, 265n.1

Thompson, H. S., 258n.1

Thompson, R. J., 262n.1, 281 thriving, 286

threshold acreage: defined, 6, 208, 211, for mechanization-cum-improvement, 278, for ‘simple’ harvest mechanization, 247, 276; estimates of, 213, 229, 231, 257–62; gross rate of return related to, 247n.1, 278; price effects on, 267–9, 278–80

threshold scale, for farm mechanization, 6, 208, 211, 276; see threshold acreage

threshold functions, 213, 266; derived, 220–2

Toulmin, Stephen (and J. Goodfield), 13n.1

tractors, 245n.2, 275

trade unionism, 36

Trafalgar, Battle of, 13 training: effects of, 99; of workers, 103n.2, 107n.2

transportation equipment, 295

transportation innovations, 291–314 passim

Turvey, R., 299 ‘two-thirds’ rule, 81n.2; see economies of scale

Ulmer, M. J., 310n. to table, 311n.1

uncertainty, 253–6

uniformity of matter, concept of, defined, 12–13

Union Stockyards, 298

van de Klundert, Th., 31n.1, 42, 189n.2

Vatter, Barbara, 108n.1

Veblen, Thorstein, 3, 246n.3, 248, 273

‘vintages’ of machinery, 188–9, 273–4

wage rates: agricultural labor, 214–15, 227–99, 267, 268–9, 272–3, 287; sex differentials in, 122; textile industry labor, 169, 171

wages’ share for textile industries, in U.S. and U.K., 48

wagon carriage, 7

Wallis, George, 21

Walras, Léon, 9n.1, 13, 15

Waltham, Mass., 135

Waltham system, 99

water-borne transportation, 7

water-furrows, 238, 239, 240; see farm terrain

Weiszäcker, C. von, 32, 46, 49, 50

Wharncliffe, Lord, 281

wheat acreage harvested in U.S., 202–3; see grain

Whetham, Edith H., 233, 243n.1, 245n.2, 252n.1, 253, 254, 270n.2, 288

Whitin Machine Works, 250n.1

Whitworth, Joseph, 21

‘Wicksell effect,’ 265–8, 273
