

CONTENTS

Topic 1 PRODUCTION AT BOUNDARY SYSTEMS

Physical controls on phytoplankton production at tidal fronts [Keynote Lecture] <i>J. W. Loder and T. Platt</i>	3
Numerical modelling of the influence of the vertical thermal structure on phytoplanktonic growth in the English Channel <i>A. Agoumi, P. Gosse and M. Khalanski</i>	23
Influence of a Gulf Stream intrusion on abundance and activity of phytoplankton and bacterioplankton off the coast of Florida, U.S.A. <i>T. R. Jacobsen, R. E. Hodson, A. E. MacCubbin and L. R. Pomeroy</i>	39
Some estimates of carbon and nitrogen flux through pelagic communities in coastal waters <i>R. C. Newell, M. I. Lucas, S. J. Painting and J. G. Field</i>	51
Production and concentration of plankton at boundary water masses: perspectives of investigations [Keynote Lecture] <i>T. S. Petipa</i>	61
Heterotrophic activity and carbon flow via bacteria in waters associated with a tidal mixing front <i>K. Lochte and C. M. Turley</i>	73
Biological activities at a front in the western Irish Sea <i>G. E. Fogg</i>	87
A persistent chlorophyll <i>a</i> maximum coinciding with an enriched benthic zone <i>F. Creutzberg</i>	97
Primary production at the deep chlorophyll maximum in the western Mediterranean <i>M. Estrada</i>	109
Secondary production of <i>Calanus finmarchicus</i> (Copepoda: Calanoidea) in a transitional system of the Fladen Ground area (northern North Sea) during the spring of 1983 <i>H. G. Fransz and S. DieI</i>	123

vi CONTENTS

Vertical distribution of zooplankton biomass during summer stratification in the western Mediterranean 135
M. Alcaraz

Ushant thermal front: digestive enzymes and zooplankton production 145
J. Moal, J. F. Samain, C. Koutsikopoulos, J. R. Le Coz and J. Y. Daniel

Topic 2 DYNAMICS OF DEEP-SEA LIFE

Studies on the feeding of a hydrothermal-vent mytilid from the East Pacific rise 159
M. Le Pennec, D. Prieur and A. Lucas

Preliminary studies on the relationship between the Pompeii worm, *Alvinella pompejana* (Polychaeta: Ampharetidae), and its epibiotic bacteria 167
A. M. Alayse-Danet, F. Gaill and D. Desbruyères

Basal and active metabolic rates of deep sea animals in relation to pressure and food ration 173
R. Y. George

Colonization studies in the deep sea: are results biased by experimental designs? 183
C. R. Smith

Bioturbation, geotechnics and microbiology at the sediment-water interface in deep-sea sediments 191
P. S. Meadows and J. Tait

The analysis of population dynamics in deep-sea benthos 201
J. D. Gage

Analysis of continuous reproduction in deep-sea seastars 213
A. Grant

Observations on continuous reproduction in large deep-sea epibenthos 223
P. A. Tyler, A. Muirhead and J. Colman

Further studies on the biology of the deep-sea spider crab *Dorhynchus thomsoni*: instar sequence and the annual cycle 231
R. G. Hartnoll and A. L. Rice

Topic 3 COMMUNITY ORGANISATION IN THE BENTHOS

The stability of a benthic community of soft sediment 245
J. S. Gray, V. Valderhaug and K. I. Uglund

The stability of a benthic copepod community 255
C. Heip and P. M. J. Herman

A hierarchical approach to modelling soft-bottom successional dynamics 265
R. N. Zajac and R. B. Whitlatch

CONTENTS		vii
Succession in soft-bottom benthic environments: are pioneering species really outcompeted?		277
<i>E. J. Chesney</i>		
The establishment, succession and dynamics of a zoobenthic community – an experimental study		287
<i>E. Bonsdorff and C.-S. Österman</i>		
Benthic community development and seasonal variations in an Alaskan fjord		299
<i>C. I. Winiecki and D. C. Burrell</i>		
Predator control in marine tidal sediments		311
<i>K. Reise</i>		
Predatory infauna and trophic complexity in soft-bottom communities		323
<i>J. A. Commito and W. G. Ambrose</i>		
Geographical distribution of macrofauna on sublittoral sediments of continental shelves: a modified trophic ratio concept		335
<i>D. J. Wildish</i>		
Observations on size-structure and pelagic coupling of some shelf and abyssal benthic communities		347
<i>P. Schwinghamer</i>		
The trophic system of the benthic communities in the Bay of Douarnenez (Brittany)		361
<i>Ph. Bodin, D. Boucher, J. Guillou and M. Guillou</i>		
Structural patterns of marine benthic assemblages and their relationship with empirical statistical models		371
<i>P. J. D. Lamshead and H. M. Platt</i>		
Species-abundance distributions: arbiters or artifacts?		381
<i>R. G. Hartnoll, M. T. Burrows and F. M. Ellard</i>		
A hypothesis concerning the influence of competition and stress on the structure of marine benthic communities		391
<i>R. G. Hughes</i>		
Dynamic stability in two contrasting epibenthic communities		401
<i>G. F. Warner</i>		
Chemical defences and the structure of subtidal epibenthic communities		411
<i>P. E. J. Dyrinda</i>		

Topic 4 ADAPTIVE ASPECTS OF PHYSIOLOGICAL AND BIOCHEMICAL VARIABILITY

Adaptive aspects of biochemical and physiological variability [Keynote Lecture]	425
<i>R. K. Koehn</i>	
Studies on heterozygosity and size in the scallop, <i>Pecten maximus</i>	443
<i>A. R. Beaumont, E. M. Gosling, C. M. Beveridge, M. D. Budd and G. M. Burnell</i>	

viii	CONTENTS	
	The physiological energetics of growth in the clam, <i>Mulinia lateralis</i> : an explanation for the relationship between growth rate and individual heterozygosity	455
	<i>D. W. Garton, R. K. Koehn and T. M. Scott</i>	
	Genetic basis of physiological variation in natural populations of sea anemones: intra- and interclonal analyses of variance	465
	<i>J. M. Shick and H. B. Dowse</i>	
	Physiological responses to temperature in two latitudinally separated populations of the mussel, <i>Mytilus edulis</i>	481
	<i>R. J. Thompson and R. I. E. Newell</i>	
	Genetic variation in nitrogen metabolism in <i>Mytilus edulis</i> : contribution of the <i>Lap</i> locus	497
	<i>T. J. Hilbish and R. K. Koehn</i>	
	Thermal adaptation and the properties of phosphoglucose isomerase allozymes from a sea anemone	505
	<i>R. J. Hoffmann</i>	
	Immuno-electrophoretic studies of genetic relations between populations of <i>Mytilus edulis</i> and <i>M. galloprovincialis</i> from the Mediterranean, Baltic, East and West Atlantic, and East Pacific	515
	<i>V. Brock</i>	
	Size-specific reproductive effort in <i>Chlamys islandica</i> : reproductive senility or stabilizing selection?	521
	<i>O. Vahl</i>	
	Relationship between weight-standardized oxygen consumption and multiple-locus heterozygosity in the mussel, <i>Mytilus edulis</i>	529
	<i>W. J. Diehl, P. M. Gaffney, J. H. McDonald and R. K. Koehn</i>	
	Alphabetical list of papers by authors	535
	List of European Marine Biology Symposia	539
