## ACKNOWLEDGEMENTS

There are a number of people I would like to thank for their help and encouragement while I was working on this book. I first would like to thank the individual authors for their participation. Each chapter is an original contribution written for this volume. Many authors took the time to read and comment on the other chapters. This interaction among the individual authors makes the book more integrated than are many edited volumes. I also would like to sincerely thank my friends at the University of New Mexico where the book was conceived and written, at the University of Kentucky where it was revised and reviewed, and at Old Dominion University where the final draft was put together.
