INDEX

afforestation, Britain, 133
Africa, 88–91, 122; cash crops in, 91–4, 97, 128, 129; crop plants from, 5, 104; fertilisers in, 60, 93, 96–7; food crops in, 94, 95, 97–101, 128–31; livestock in, 32–3, 88–9, 98–9; soils in, 22, 23, 89, 95–6, 104, 126
agricultural advisory services:
Britain, 79–80; India, 105
agricultural holdings: numbers of, United Kingdom (1935–64), 77, 78; pressure for sub-division of, in developing countries, 112, 119, 120
alluvial soils, 19, 21–2, 96; in India, 103, 107–8
alternate husbandry, in Uganda, 44, 45
America, 55, 56, 57; see also Canada, United States
antelope, possibility of domesticating, 29
Arabia, 22, 55
artificial insemination, 31, 34, 84
Australia, 133–4; forage plants in, 28; industrialisation in, 85, 116, 120, 133; livestock in, 33, 53; rainfall in, 22, 124; soils in, 22, 52–3, 126
Baluchistan, 5
bananas, 19, 25, 26, 36, 91; in diet, 63, 64; improved varieties of, 38–9
barley, 2, 3, 5, 29, 30; yield of, England (1933–69), 50
beans, 30, 93; see also Dolichos, Phaseolus
beet, domestication of, 4; see also sugar-beet
bone meal, as fertiliser, 49
Brassicas, 4, 30
Brazil, soils in, 126
Breckland, East Anglia: intermittent cultivation of, 23, 43
Britain, 4, 8; agricultural depression in, 35, 57, 67, 81; agricultural revolution in (1950 onwards), 50–2, 61, 67–80; amount of fertilisers used in, 58–9, 77, 78; flow of food imports to, 55–6, 57; forests in, 13, 23, 133; Industrial Revolution in, 8, 55; ‘New Husbandry’ in (18th century), 7–8, 10, 11, 31–2, 48–9; output of agriculture in, 61, 77, 78, 132; soils in, 47; state support for agriculture in, 78, 79, 82–5, 137–8; see also England and Wales
buffalo (water), domestication of, 6, 104
cacao, 19, 24, 36, 38; as cash crop, 91, 129
Cajanus (red gram), 65, 102, 111
camel, domestication of, 104
cameloids (South America), domestication of, 6
Canada, industrialisation in, 85, 120
capital: for agricultural development, 8–9, 27, 49, 51; for fertiliser industry, 59, 96; for irrigation and plantation crops, 60
cash crops, 8, 35–6; distinction between food crops and, disappears with urbanisation, 94; world sufficiency of, 95, 97, 116; see also under Africa
cassava (manioc): in Africa, 91, 92, 93; in diet, 63, 64
cattle: in Africa, 32–3, 88–9, 99; in America, 57; in Australia, 33, 53; domestication of, 3, 6, 104; improved by both breeding and feeding, 31, 32, 33; in India, 111; in New Husbandry, 7, 48–9; numbers of, England and Wales (1935–70), 68, 69, 70, 72–3, 75; tropical breeds of, 34, 99
cereals: in diet, 63, 64; domestication of, 2, 5, 103; improved varieties of, 29, 40–1; increasing production of, India, 105, 110, 131; state support for production of, Britain, 68, 82, 83, 84; see also individual cereals
Chenopodium, as early food crop, 6, 28
Cicer (Bengal gram), 102
clay soils, 21, 23, 25, 27; in Britain, 51, 69; in India, 103, 109, 110
INDEX

climate, x, 13–22, 102; breeding crops and stock adapted to, 41
clover crop, in New Husbandry, 31, 48
coffee, 25, 26; as cash crop, 91, 92, 100
cola nuts, as cash crop, 91
Colombia, coffee in, 25
colonial stage, in Africa, 92, 116
Common Market, 120, 135
Congo, 89–90, 92
conservation: must replace exploitation, 87, 93, 115; of soils, 21, 26; of soil fertility, see under soil fertility; of water, 9
conurbations, 87, 121–2
Corn Laws, 80, 81
cotton: as cash crop, 91, 92, 100; domestication of, 5, 6, 104; improved varieties of, 30, 36, 37–8, 41–2; use of insecticides for, 61
Cotton Research Corporation, 42
cotton textiles, Indian and British, 56, 123
cowpeas, 5, 91
crop plants, 2; breeding and fertilisers in improvement of, 35–42, 51, 106; early-maturing varieties of, 110; needs of, for water, 16–18; weed and pest control for, 61
cucurbits, domestication of, 3, 7
dairying: in Africa, 97, 98–9, 130; in Britain, 31, 32; in India, 110; see also milk
day length, breeding of crop plants adapted to, 37
Denmark: early agriculture in, 4, 28, 43; industrialisation in, 116
depression in agriculture, caused by world surplus of food, 86; in Africa, 39, 92; in Britain, 35, 57, 67, 81; in India, 39; in New World, 57, 85, 128
development: agriculture and, 8–9, 27, 115–23; infrastructure for, 8
Dioscorea (yam), 5, 91
disease resistance, breeding for: cacao, 38; cotton, 37
dog/wolf, domestication of, 2
Dolichos spp. (beans), 5, 6, 91
Drainage, in domestication of soils, 24, 27
education for agricultural development, 80, 118
eggs, 31, 35, 83, 84
Egypt, 21, 38; early agriculture in, 2, 4, 55
Eleusine (finger millet, ragi), 5, 6
emmer wheat, 2
England and Wales: livestock in (1935–70), 69–70, 72–7; use of agricultural land in (1935–70), 68–9, 71–2
environment, man and, 115, 136
erosion of soils, 20–2, 86, 109, 125
Ethiopia, 2, 5, 22
Eucalyptus, in swamps, 16–17
evapotranspiration of water, 17, 125
exploitive agriculture: in Africa, 93; in India, 8, 52, 104; in New World, 25, 85; in wet tropics, 19
fallow, in mediaeval rotation of crops, 46, 48
famine, in India, 102
farmers and farm workers: and new varieties of wheat, 108; skill and versatility of, Britain, 52, 79; way of life of, 135–6
fencing, 27, 67, 95
fertilisers, x; improvement of crops by, requires soil in good condition, 9, 40, 52; interaction of breeding and, in improvement of crops, 35–42, 51, 106; make stable agriculture possible on poor soils, 19, 89; see also under Africa, Britain, India
Finland, shifting cultivation in, 43
fish, as source of protein, 3, 63
food prices: state subsidies to, Britain, 78, 79, 80–5, 137–8
food rationing, Britain, 81
foreign exchange, for developing countries, 59, 60, 97
forest areas: clearing of, 4, 13–14, 23, 24, 27, 90, 131; tropical, root crops in, 3
France, early agriculture in, 4
fuel: manure as, India, 52; peat as, Netherlands, 46
Fulani herdsmen, 46
Gandhi, M. K., 113, 123
Germany, early agriculture in, 4
INDEX

Ghana, 13, 92, 130, 131

goats, 26, 31; domestication of, 2, 3, 6, 104

granites, soils from, 23

grassland, 3, 13, 16; permanent and temporary, England and Wales (1935–70), 68–9; in tropics, 20, 44–5

Greece, 22, 25–6; early agriculture in, 2, 4
groundnuts, 6, 15, 104
guano, 58–9

Guiana, soils in, 126

guinea pig, domestication of, 6

Harappan civilisation, 5

herbicides, 50, 60, 78; and ecological balance, 11, 61, 86

Hevea (rubber), 28, 36, 92
hill land, Britain, 19, 76, 133

Hordeum, wild species of, 2, 3, 29; see also barley

horses: domestication of, 4; replaced by tractors in Britain, 57, 61

horticulture, 98, 130, 133

Howard, Sir A., 9, 52

husbandry, 43–54; in introduction of new cereals in India, 106–7; ‘New’, see under Britain

ignorance, as cause of malnutrition, 63, 94, 98

India, ix, 54, 102–13, 120, 131–2; cereal shortages in, 105, 134, 135; cereal yields in, 46; cottage industries in, 123; early agriculture in, 5, 55, 104; fertilisers in, 39, 52, 59–60, 96, 105, 131; ‘green revolution’ in, 52, 59, 63–4, 109, 120; improved crop varieties in, 39–41, 52, 106–7; livestock in, 104, 111; soils in, 9, 47, 52, 103, 104, 105, 107, 126

Indian Council of Agricultural Research, 42

Industrial Revolution: and agriculture, 8, 55; and conurbations, 121; opening up of new lands by transport systems of, 55, 81, 128; in United States, 85

industrialisation, 116–18; in Africa, 130; does not now require urbanisation, 121–3; in India, 112–13, 131

industry: inputs into agriculture from, 50, 51, 55–6, 57, 58, 67, 78, 105; integration of agriculture and, 7, 8, 67, 134; labour flow from agriculture to, see under labour; support for agriculture and, compared (Britain), 85

Intermediate Technology Development Group, Britain, 123

Iran, early agriculture in, 2

Iraq, early agriculture in, 2, 3, 55

irrigation, 7, 18, 20, 55; in India, 39, 52, 55, 102, 103, 108, 109, 131

Italy, early agriculture in, 4

Jamaica, 25

jungle fowl, domestication of, 6, 104

Kenya, 89, 92, 93, 99

laboratory animals, domestication of, 28–9

labour: in agriculture, United Kingdom (1935–64), 77, 78; for cash crops, Africa, 91; exported from areas of poor soils, Africa, 90, 93; flow of, from agriculture to industry, ix, 67, 112–13, 116–19, 132; supply of, and mechanisation of agriculture, 58

Lancashire: agricultural productivity in, 133; livestock in (1935–70), 72, 73, 74, 75, 76, 77; tillage in (1935–70), 71, 72

land: with agricultural potential, 25; in excess of demand, 49, 126; lost from agriculture, United Kingdom (1935–64), 69, 78, 132–3

land tenure, in Africa, 93

Lathyrus sativus, breeding of less toxic varieties of, 111

leaching of soils, 18–19, 20–1, 22–3, 125

leguminous plants: in Africa, 91; in Australia, 22, 59; in crop rotation of New Husbandry, 48, 49; in diet, 64, 65; domestication of, 2, 3, 7, 104; improved varieties of, 65, 111; in India, 63–4, 110–11

lentils, 6

liming of soils, 27, 49
INDEX

Lincoln (Holland division): livestock in (1935–70), 72, 73, 74, 75, 76; tillage in (1935–70), 71, 72
linseed, 6
livestock, 1–2; breeding and feeding in improvement of, 31–5, 51, 98–9; drugs and sprays for, 61; integration of, into farming system, 10, 94–5; intensive rearing of, 11, 51, 84; in New Husbandry, 7, 31–2, 48–9; numbers of, England and Wales (1935–70), 69–70, 72–7

machinery, agricultural, 57, 78–9; see also tractors
maize, 3, 30; in Africa, 92, 93; in India, 104
malaria control, new land opened up by, 108, 131
Malthus, T. R., 127
manure: in Africa, 95; in husbandry of Netherlands (16th and 17th centuries), 46; in New Husbandry, Britain, 7, 48, 49; now becoming a problem in effluent disposal, 11, 51, 84; used as fuel in India, 52
marling of soils, 49
meat: breeding cattle for, 32, 34; as source of protein, 3, 63; state support for production of, Britain, 82, 83, 84; in Uganda, 130
medicine, preventive: and population growth, 8, 32, 67, 105, 124, 134
Mexico, early agriculture in, 3, 6–7
migration: into Britain, 117–18; into towns, 118–19
milk, 33–4, 56; state support for production of, Britain, 68, 83, 84
Milk Marketing Board, Britain, 84
millet, in Africa, 90; see also Eleusine, Panicum, Pennisetum
minerals, in nutrition, 62, 65, 98
mixed farming: in Africa, 89, 94–5; tendency to abandon, in Britain, 10–11, 51
Montgomeryshire: livestock in (1935–70), 72, 73, 74, 75–6; tillage in (1935–70), 71, 72
Namulonge, Uganda: Cotton Research Station at, 21, 44

National Agricultural Advisory Service, Britain, 79–80
National Seed Corporation, India, 107
neocolonialism, 116
Netherlands, husbandry in (16th and 17th centuries), 46–7, 48
New Zealand, 55, 85, 86
Nigeria, water control in, 9
nitrogen fixation: industrial, 58; natural processes of, 48, 59; nitrogenous fertilisers, 58–9, 60; amount used, United Kingdom (1935–64), 60, 77, 78
nomadic herding, 88–9
Norfolk: farming in, 7, 19; livestock in (1935–70), 72, 73, 74, 75, 76; tillage in (1935–70), 71; nutrition, human, 62–5, 81, 94; urbanisation and, 98, 100

oak scrub, Greece, 26
oats, domestication of, 2, 4, 30
oil palm, 19; as cash crop, 91, 129
output of agriculture: United Kingdom (1935–64), 61, 77, 78, 132
United States, 132
Oxals spp., as early food crop, 6
Pakistan, ix, 55, 135
Palestine, early agriculture in, 2, 3
Panicum (millet), domestication of, 4
peas, 5, 91
peaty soils, 27, 51
Pennisetum (bulrush or pearl millet, bajra), domestication of, 5, 6
pest resistance: breeding for, 37, 38; cropping practice and, 42; of newly introduced varieties, 41
pesticides, 50, 60, 78, 93; and ecological balance, 11, 61, 86
pH of soil, 24
Phaselus spp. (beans), 3, 6, 65, 91
phosphates: deposits of, Uganda, 96; in fertilisers, 59, 60; soils deficient in, 51, 59
pigs: domestication of, 4, 104; numbers of, England and Wales (1935–70), 69, 70, 75; Swedish landrace breed of, 32
pollen diagrams, showing clearing of forest, 4
pollution of water, 86

INDEX

**Polygonum**, as early food crop, 28
polyplody, in crop plants, 30–1, 37
population: critical density of, 127;
percentage of, in agriculture,
(Britain) ix, (India) 112, (United
States) 85, 132
population growth: in Africa, 100;
aricultural productivity usually
matched to, 80, 81, 124, 127, 134;
in England, 127; in India, 105,
120, 131; preventive medicine and,
8, 32, 67, 105, 124, 135; in
Tehuacan valley, Mexico, 6–7
potash, in fertilisers, 59, 60
potatoes, 6, 30, 68, 104; control of
acreage of, Britain, 84
poultry, 34–5; in Africa, 97, 99–100,
130; domestication of, 4, 104;
numbers of, England and Wales
(1935–70), 69, 70; state support for
production of, Britain, 83, 84
poverty, as cause of malnutrition, 63,
81, 98, 132
productivity of agriculture: breeding and
feeding of livestock and crops in
improvement of, 31–42, 51, 99,
106; recent increases in, ix, 10,
124; usually matched to popula-
tion growth, 80, 81, 124, 127, 134
protein in diet, 3, 33, 62, 63, 64; in
Africa, 94; in India, 110
pulses, see leguminous plants
quality: breeding for, in cottons, 37;
in food, a matter of local prefer-
ence, 41; of new wheat and rice
varieties, 107
railways, 55, 56
rainfall: and agriculture, 14–16, 18–
20, 52, 71, 124–5; and erosion, 21;
in India, 105, 109
rice, 19, 20; domestication of, 5, 6,
104; improved varieties of, 30, 40–
1; in India, 103, 106, 107, 108;
mechanised cultivation of, 90;
protein content of, 110
river floods, prediction and exploita-
tion of, 55
Romans, practice of manuring by, 48
root crops, 3, 19; in diet, 63, 64
rotation of crops: in New Husbandry,
Britain, 7, 48, 49
rubber, 19, 28, 36, 92
rye, domestication of, 4
sandy soils, 23, 27, 89
seed supply, in India, 107
seed/yield ratio, for wheat (13th to
19th centuries), 45
sesame, 5, 30
sheep: in Australia, 53; domesticata-
tion of, 2, 3, 6, 104; Finnish
landrace breed of, 32; in New
Husbandry, 7, 48, 49; numbers of,
England and Wales (1935–70), 68,
69, 70, 74, 75–6; wool of, 31, 83
shifting (cut and burn) cultivation,
4, 9, 19, 43–4, 95; in Africa, 22,
88, 89–90; in Zambia, 87, 126–7
sisal, 92
soil fertility: conservation of, 7, 9–
10, 11, 52, 53; improvement of, 49;
in New Husbandry, 24, 49; trans-
fer of, 46–7, 126; varieties of crop
plants responsive to, 40–1
soils, ix, 14, 20–7, 125–6; domes-
tication of, 24, 27; erosion of, see
erosion; fertility of, see soil fer-
tility; improvement of, 4, 46,
49, 53; leaching of, see leaching;
storage of water in, 20–1, 103, 107;
structure of, 11, 53, 54; see also
under Africa, Australia, India
Sorghum (dura, jowar), 37, 90;
domestication of, 5, 6
specialisation, in farming practice, 51
steamships, 55, 56
stones, clearance of, 27
subsistence farming, in Africa, 90, 91
Sudan: irrigation in, 60; nomadic
cattle herding in, 88–9; shifting
cultivation in, 43, 90; soils in, 21,
25, 55
sugar, price of, 83
sugar-beet, control of acreage of;
Britain, 83; yield of, England
(1935–69), 59
sugar-cane: as cash crop, 91, 92;
excess production of, 20, 128;
improved varieties of, 30, 36–7
sulphur, in fertilisers, 96
swamp land, 16–17, 27; rice in, 19,
20
sweet potatoes: in Africa, 91, 92; in
diet, 63, 64
INDEX

Tanganyika, groundnut scheme in, 15
Tanzania, soils in, 23
tea, in Africa, 92
technology: application of, to agriculture, 55–61, 78–9
Tehuacan valley, Mexico: agriculture in, 3, 6–7
temperature, and crops, 14, 102, 124
tillage: acreage of, as percentage of total crops and grass, England and Wales (1933–70), 71–2
tobacco, as cash crop, 91
tomato, domestication of, 6
tractors, 10; in Britain, 57, 61, 77, 78, 79; in developing countries, 58; in India, 111
transport, in development of agriculture, 56
tree (plantation) crops, in tropics, 19, 56
Trinidad: cacao in, 24, 38; infant industries of, 121
Triticum, wild species of, 2, 3, 29; see also wheat
Tropaeolum, as early food crop, 6
trypanosomiasis, 88
Turkey, early agriculture in, 2, 3
turkey, domestication of, 6
turnip crop, in New Husbandry, 31, 48
Uganda, 56, 100–1; cotton in, 92; food farming in, 47, 129–30, 131; livestock in, 33, 99; mechanised Busoga farms in, 94, 129; phosphate deposits in, 96; rotation of arable and grass in, 24–5, 44
ulluca, as early food crop, 6
unemployment, in industry and agriculture, 119
United States of America, 36, 43, 86, 133; industrialisation in, 85, 116, 120; poor soils in, 89, 126
urbanisation: in Africa, 130; a drain on soil fertility, 126; in India, 108
vegetable medicine, in developing countries, 32, 61, 89, 99
Vigna (cowpea), 5, 91
volcanic soils, 23, 26, 96; rice on, 19
Wales (1933–70), 71–2
warfare, problems of disposal of, 87, 122
water: agriculture and availability of, 14–20, 102, 134; conservation of, 9; in improvement of nomadic herding, 98; for new varieties of crop, 106, 107–8; pollution of, 86; stored in soil, 20–1, 103, 107; supply of, to cultivations, 122–3
weeds: shifting cultivation as means of controlling, 41, 45, 94; in Sudan, 43, 90
Welfare State, food prices in, 81
West Indies, 13, 31; nutrition in, 63; volcanic soils in, 23, 26
wheat, 128; climate and, 102; domestication of, 2, 5, 30; improved varieties of, 40–1, 52, 106; protein content of, 110; Yeoman variety of, 10; yields of, 40, 45, 50
wool, 31, 83
yams, 5, 91
yields: breeding crop plants for, 35, 61; of wheat, barley, and sugar beet, England (1933–69), 50; of wheat in India, 40, 107; see also seed/yield ratio
Zambia, shifting cultivation in, 89, 126–7
zebu, domestication of, 6

possible without, 121–3; provides markets for farmers, 94, 97–8, 117

Venezuela, soils in, 44, 126
