Abbott, I., 379, 422, 425, 427, 428, 433–4, 435, 438, 439, 444, 468–9
Abele, L. G., 425, 428
Able, K. P., 513, 515–16, 517, 520, 531
Accuracy, song learning, 484–5
Acorn Woodpecker (*Melanerpes formicivorous*), cooperative breeding, 96–7, 103–4, 130
Acquisition, resource, 141–3
Actitis macularia, energy and incubation, 144–5
Aepyornithidae, 323
Aetosaurus, 302
Aggregation, and predator-prey interactions, 200
Aimophila, 42
Alexornis, 310, 341, 342, 343
Alexornithiformes, 310
Ambiortiformes, 340
Ambiortus, 340–1
American Federation of Aviculturists, 25
American Jacana (*Jacana spinosa*), polyandry, 62
American Kestrel (*Falco sparverius*), doubly labeled water turnover rates, 150
Anatidae, 327
Andean Condor (*Vultur gryphus*), bred in captivity, 26–7, 30
Andean Hillstar Hummingbird (*Oreotrochilus estella*), energy and winter, 148
Andersson, M., 185
Anseriformes, 320
Apatornis, 318–19
Apodiformes, 25
Apteryges, 324
Aquatic birds, of Mesozoic, 310–22
Archaeopteryx, 9–10, 293, 294, 295, 296, 299–301, 316, 330, 339–41, 342, 345
  and terrestrial birds of Mesozoic, 302–10
Archosaurs, 294, 296–7, 299
Arctic Skua (*Catharacta skua*), assortative mating, 61
Area effect, 425–6
Asiatic White Crane (*Grus leucogeranus*), bred in captivity, 30
Assembly
  of communities for study, 363–7
  rules, 440–1
Assortative mate selection, 61
Audubon Breeding Bird Censuses, 368–9, 371
Audubon's Warbler (*Dendroica coronata*), hybridization, 6
Avian energetics, allometric equations, 160
Avian genome, 17
Avian studies, microevolutionary processes, 228–37
Avise, J. C., 237, 262

Baird, S. F., 37
Baker, R. R., 544, 545
Bald Eagle (*Haliaeetus leucocephalus*), hacking, 23
Ball, I. R., 411, 443
Baltimore Oriole, hybridization, 6
Baptista, L. F., 489
Baptornis, 313, 315, 322
Barbour, E. H., 331–2
Barn Swallow (*Hirundo rustica*), cooperative breeding, 125
Barrington, D., 483
Barrowclough, G. F., 16, 262
Barun Goyot Formation, 309, 342
Bathornithidae, 327
Behavior, and sperm competition, 66–9
Behavioral Studies of Birds (BSB), 26
Benvenuti, S., 526, 528
Bingman, V. P., 517–18, 520, 534
Biochemical studies, 15–17
Biogeography, 10–12, 411–12
  commentary, 456–72
  dispersal paradigm, 412–13
  dynamic equilibrium model, 420–32
  historical, 412–20
  patterns and community composition, 432–43
  vicariance paradigm, 413–20
