<i>Foreword to the Japanese edition</i>	ix
<i>Foreword to the English edition</i>	xi
<b>1 Fundamentals of nuclear fusion</b>	1
1.1 The energy problem and nuclear fusion	1
1.1.1 <i>Energy and human societies</i>	1
1.1.2 <i>Energy in classical mechanics</i>	4
1.1.3 <i>Chemical energy</i>	5
1.1.4 <i>Atomic energy</i>	6
1.1.5 <i>The Coulomb force and the nuclear force</i>	6
1.1.6 <i>The nuclear fission reaction</i>	9
1.1.7 <i>Energy from nuclear fusion</i>	10
1.2 The nuclear fusion reaction	12
1.2.1 <i>Thermal motion</i>	12
1.2.2 <i>The equilibrium distribution function</i>	13
1.2.3 <i>The tunnel effect</i>	14
1.2.4 <i>Cross-sectional area and mean free path</i>	14
1.2.5 <i>Important fusion reactions</i>	15
1.2.6 <i>Energy in fusion reactions</i>	17
1.2.7 <i>Advanced fusion reactions</i>	18
1.3 The Lawson criterion	18
1.3.1 <i>Heating of plasma by fusion reactions</i>	18
1.3.2 <i>Bremsstrahlung</i>	19
1.3.3 <i>Self-ignition temperature</i>	21
1.3.4 <i>The Lawson criterion</i>	22
1.3.5 <i>Confinement of plasma</i>	24
<b>2 The magnetic confinement method</b>	25
2.1 The fundamentals of the magnetic confinement method	25
2.1.1 <i>The motion of charged particles in magnetic fields</i>	25
<i>Cyclotron motion</i>	25
<i>Drift motion due to electric fields</i>	27

	<i>Drift motion due to gravity</i>	29
	<i>Drift motion due to curvature of the magnetic field</i>	29
	<i>Motion due to the gradient of the magnetic field</i>	30
	<i>Motion due to divergence of the magnetic field</i>	30
2.1.2	<i>Maxwell stress and pinch motion</i>	32
2.1.3	<i>Sausage-type instability</i>	36
2.1.4	<i>Kink-type instability</i>	38
2.1.5	<i>Spiral instability</i>	42
2.1.6	<i>The <math>\beta</math>-value</i>	43
2.2	<i>The Tokomak</i>	43
2.2.1	<i>Structure of the Tokomak</i>	43
2.2.2	<i>Electrical conductivity of plasma</i>	45
2.2.3	<i>Neutral-beam heating</i>	50
2.2.4	<i>Wave heating</i>	52
2.2.5	<i>Safety factors and the rotational transfer angle</i>	55
2.2.6	<i>Diffusion of plasma</i>	58
2.2.7	<i>Instabilities in the Tokomak plasma</i>	65
2.2.8	<i>The present state of Tokomak research</i>	70
2.3	<i>Magnetic-confinement fusion using devices other than the Tokomak</i>	70
2.3.1	<i>Reversed-field pinch</i>	70
2.3.2	<i>The stellarator and the heliotron</i>	72
2.3.3	<i>The Miller field</i>	73
2.3.4	<i>The cusp field</i>	74
2.3.5	<i>The baseball field</i>	77
2.3.6	<i>The bumpy torus</i>	78
2.3.7	<i>The compact torus</i>	78
2.3.8	<i>The theta-pinch machine</i>	79
2.3.9	<i>The z-pinch machine</i>	83
2.3.10	<i>The plasma focus</i>	84
<b>3</b>	<b>The inertial confinement method</b>	85
3.1	<i>The fundamentals of the inertial confinement method</i>	85
3.1.1	<i>The Lawson criterion</i>	85
3.1.2	<i>Compression of fuel</i>	88
3.2	<i>Absorption of laser light</i>	91
3.2.1	<i>Plasma oscillation</i>	91
3.2.2	<i>Propagation of electromagnetic waves in plasma</i>	94
3.2.3	<i>Classical absorption</i>	96
3.2.4	<i>Parametric instability</i>	99
3.2.5	<i>Resonance absorption</i>	108
3.2.6	<i>Laser light of short wavelength</i>	112
3.3	<i>Implosion of the target</i>	113

<i>Contents</i>	vii
3.3.1 <i>The hydrodynamics of implosion</i>	113
3.3.2 <i>The Rayleigh–Taylor instability</i>	117
3.4 <i>Lasers</i>	121
3.4.1 <i>Inverse population and stimulated emission</i>	121
3.4.2 <i>The neodymium glass laser</i>	125
3.4.3 <i>The carbon dioxide laser</i>	128
3.4.4 <i>The iodine laser</i>	130
3.4.5 <i>The hydrogen fluoride laser</i>	131
3.4.6 <i>The excimer laser</i>	132
3.4.7 <i>The free-electron laser</i>	133
3.4.8 <i>Experimental research facilities for laser fusion</i>	134
3.5 <i>Electron beams</i>	136
3.5.1 <i>Relativistic electron beams</i>	136
3.5.2 <i>The Marx generator</i>	137
3.5.3 <i>Intermediate storage capacitors and the pulse-forming line</i>	138
3.5.4 <i>The impedance conversion line and the plasma-erosion opening switch</i>	139
3.5.5 <i>The diode</i>	140
3.5.6 <i>Propagation of relativistic electron beams</i>	142
3.5.7 <i>Coulomb scattering of the beam at the target</i>	143
3.5.8 <i>Abnormal interaction of the beam with the target</i>	145
3.6 <i>The light-ion beam</i>	147
3.6.1 <i>Characteristics of the beam</i>	147
3.6.2 <i>Generation of the beam</i>	148
3.6.3 <i>Magnetically-insulated transmission lines</i>	150
3.6.4 <i>Propagation of the beam</i>	155
3.6.5 <i>Interaction of the beam with the target</i>	163
3.7 <i>The heavy-ion beam and projectile</i>	167
3.7.1 <i>The heavy-ion beam</i>	167
3.7.2 <i>The projectile</i>	169
<b>4 The fusion reactor</b>	<b>171</b>
4.1 <i>The structure of the fusion power reactor</i>	171
4.1.1 <i>The concept of the fusion power reactor</i>	171
4.1.2 <i>The central plasma</i>	175
<i>Heating the plasma</i>	175
<i>Supply of fuel</i>	175
<i>The particle balance and burn fraction</i>	177
4.1.3 <i>The first wall</i>	178
<i>The wall loading</i>	178
<i>Wall damage by atoms</i>	179
<i>Plasma contamination and protection</i>	182
<i>Wall damage by neutrons</i>	185

viii	<i>Contents</i>	
4.1.4	<i>The blanket shield layer</i>	187
	<i>The fuel cycle</i>	187
	<i>The tritium breeder and coolant</i>	188
4.1.5	<i>The superconducting magnet</i>	191
	<i>Coils for high-energy and high-intensity magnetic fields</i>	191
	<i>The structure and support of the electromagnetic force</i>	194
	<i>Pulse operation</i>	194
	<i>Radiation damage</i>	194
	<i>Remote handling</i>	195
4.2	<i>Design of fusion power plant</i>	196
4.2.1	<i>Design of fusion power plant of the Tokomak type</i>	196
	<i>An example of the design</i>	196
	<i>The power density and wall loading</i>	197
	<i>The toroidal magnet</i>	199
	<i>Steps toward the development of the reactor</i>	201
4.2.2	<i>Design of mirror-type fusion power plant</i>	202
4.3	<i>Power reactors using inertial-confinement fusion</i>	208
4.3.1	<i>Design of laser fusion power reactors</i>	208
	<i>Characteristics of the power reactor for inertial-confinement fusion</i>	208
	<i>The solase-type laser fusion reactor</i>	210
4.3.2	<i>The waterfall-type reactor for light-ion beam fusion</i>	212
4.4	<i>Natural-resource requirements and safety of the fusion power reactor</i>	217
4.4.1	<i>Natural resources required</i>	218
	<i>Fuel resources</i>	218
	<i>Resource materials other than fuel</i>	219
4.4.2	<i>Safety of the nuclear fusion power reactor</i>	219
	<i>Safety problems related to nuclei</i>	220
	<i>Safety problems not related to nuclei</i>	222
	<i>Appendix</i>	225
	<i>References</i>	234
	<i>Index</i>	238
