Preface	vii
1 Logic Programming: A Case Study	1
1.1 From Theorem Provers to Logic Programming	1
1.1.1 The Skolem-Herbrand-Gödel Theorem	1
1.1.2 Skolem Normal Form	3
1.1.3 Compound Instances	3
1.1.4 Testing Validity	4
1.1.5 Unsatisfiability Procedures	5
1.2 Logic Programming	7
1.2.1 Least Model Semantics	9
1.2.2 Refutations and Answers	9
1.2.3 Computational Adequacy	10
1.2.4 Negation	10
1.3 Discussion	13
1.4 Overview of the Book	14
2 Simply Typed λ-Calculus	17
2.1 Type Symbols	17
2.2 Terms	18
2.3 Conversions and Reductions	20
2.3.1 α -Conversion	20
2.3.2 β -Reduction	21
2.3.3 η -Reduction	22
2.4 Normal Forms	22
2.5 Substitutions	24
3 Higher-Order Logic	27
3.1 Automating Higher-Order Logic	27
3.2 Higher-Order Logics	29
3.2.1 Syntax	29
3.3 General Models	30
3.4 The Clausal Theory of Types	32
3.4.1 CTT and Higher-Order Logics	33
3.4.2 Normal Form CTT Terms	33
3.5 Term Structures	36
3.5.1 λ -Models	38
3.5.2 Properties of λ -Models	40

3.6	The Higher-Order Theorem	41
4	Higher-Order Equational Unification	45
4.1	Higher-Order Equational Unification	45
4.1.1	Higher-Order Term Rewriting Systems	47
4.1.2	Soundness and Completeness	51
4.1.3	Third-Order Equational Matching	54
4.2	Higher-Order Unification	55
4.2.1	Higher-Order Unifiers	56
4.2.2	Higher-Order Pre-Unification Procedure	57
4.2.3	Heuristics and Implementations	59
4.2.4	Undecidability Results	61
4.3	Higher-Order Matching	64
4.3.1	Freezing Lemma	64
4.4	Decidability of Matching	65
4.4.1	Examples of Nontermination	65
4.4.2	Removing Constant Symbols	66
4.4.3	An Algorithm for Higher-Order Matching	68
4.4.4	Plotkin-Statman Conjecture	73
4.4.5	Decidable Matching Problems	76
4.4.6	Regular Unification Problems	80
4.4.7	Discussion	84
4.5	Second-Order Monadic Unification	84
4.5.1	Decidability and the Monoid Problem	86
4.6	First-Order Equational Unification	87
5	Higher-Order Equational Logic Programming	89
5.1	Higher-Order Equational Resolution	89
5.1.1	\sim - λ -Models and Closed Resolution	91
5.1.2	The General Level	92
5.2	CTT and Logic Programming	94
5.2.1	Least CTT Models	96
5.2.2	Least Fixed Points	98
5.2.3	BF- and SLD-resolution	100
5.2.4	Soundness and Completeness	102
5.2.5	Declarative and Operational Semantics	104
5.3	Discussion	105
	Bibliography	107
	Index	121
